A successful entrepreneur and nonprofit founder shares his plan of action to help the American economy by assisting America's poor. John Hope Bryant,

successful self-made businessman and founder of the nonprofit Operation HOPE, says business and political leaders are ignoring the one force that could truly re-energize the stalled American economy: the poor. If we give poor communities the right tools, policies, and inspiration, he argues, they will be able to lift themselves up into the middle class and become a new generation of customers and entrepreneurs. Raised in poverty-stricken, gang-infested South Central Los Angeles, Bryant saw firsthand how our institutions have abandoned the poor. He details how

business loans, home loans, and financial investments have vanished from their communities. After decades of deprivation, the poor lack bank accounts, decent credit scores, and any real firsthand experience of how a healthy free enterprise system functions. Bryant radically redefines the meaning of poverty and wealth. (It's not just a question of finances; it's values too.) He exposes why attempts to aid the poor so far have fallen short and offers a way forward: the HOPE Plan, a series of straightforward, actionable steps to build financial literacy and expand opportunity

so that the poor can join the middle class. Fully seventy percent of the American economy is driven by consumer spending, but more and more people have too much month at the end of their money. John Hope Bryant aspires to “expand the philosophy of free enterprise to include all of God's children” and create a thriving economy that works not just for the one percent or even the ninety-nine percent but for the one hundred percent. This is a free enterprise approach to solving the problem of poverty and raising up a new America. “Economic immobility is the defining issue of America in the twenty-first century. John Hope Bryant makes an engaging case for why we must make our economy work for everyone. How the Poor Can Save Capitalism is a must-read for business leaders, policymakers, and community leaders who want to make the American Dream a reality for all our children.” —Ben Jealous, former CEO, NAACP “John and I want the same things. And the goals of this book are the same goals of my Rebuild the Dream campaign. He has provided the road map to economic recovery for this country at a time when economic inequality is at its

peak. I, for one, will be following the steps laid out in the HOPE Plan.” —Van Jones, former Presidential Advisor to Barack Obama and current host of CNN's Crossfire

Building business credit should be one of your top priorities as you grow your small business. A strong business credit profile can help you qualify for bank loans or other sources of funding at competitive interest rates. If you've been denied a small-business loan, it might be because you have bad personal or business credit. Thirty-six percent of small-business borrowers who get a “no” from creditors are turned down because of their credit scores, while another 30% are denied for new or insufficient credit history, according to a study by the Federal Reserve Banks of New York, Atlanta, Cleveland, and Philadelphia. Borrowers with bad credit might also have higher interest rates, higher insurance premiums, and less favorable payment terms with suppliers. You can get a small-business loan despite bad personal credit. But if you take steps first to build your business credit, you'll qualify for lower interest rates, cutting the total cost of your loan. If your business is new and doesn't have a credit history, use this guide to start building your business credit score.

This book will help a person with a plan, yet funding caused everything to come to a complete stop. It will also help someone bridge the distance between ambition and destiny. I sometimes look at it as my bridge to fulfill my purpose in life. I feel that knowledge is power. So many people don't understand financial institutions. I feel I need to share the information with people to help someone. I found myself in this position after I graduated from college. I had a degree but no job. I had goals and ambition to get to that point in life. I just didn't understand how to get my plan funded past this point. I had 65,000

dollars in debt from loans in college, so my social security number was just a little over leveraged. I had no idea what an EIN number was at the time. I realized I had an IT degree, but I needed a business financial mentor. This book explains what I learned of the next few years to drive my net worth over a million dollars. I have streamlined the process for people now: AllenRevenueSolutions.com. I have the entire process step by step for anyone in this position in life. Many people have a plan but can't get the money to get it started. I just simply want to help these people reach their goals, which I call their divine destiny in life.

The capability to distinguish blueprints, tendencies, and significant trade procedures is a first nature to becoming a part of the world's best trading associates—in respective to this, you need to be trained to see these blueprints through careful explanation, real-world examples as mentioned in this book, and a lot of many other examples. Today's business market is constantly changing every day. As you begin your hunt for the perfect business, consider starting close to the New York Stock Market, the Stock Market or the World Trade Center itself. For instance, if you're currently employed by a small business you like, find out whether the present owner would consider selling it. Or, ask some business associates and friends who are already buying and selling stocks for leads on similar businesses that may be on the

market. Many of the best business opportunities surface by word of mouth or you can check the bulletin—and are snapped up before their owners ever list them for sale. Other avenues to explore include newspaper or online ads, trade associations, real estate brokers, and business suppliers. Finally, there are business brokers—people who earn a commission from business owners who need help finding buyers. It's fine to use a broker to help locate a business opportunity, but it's foolish to rely on a broker—who doesn't make a commission until a sale is made—for advice about the quality of a business or the fairness of its selling price.
