Accelerated Education in Nursing

Duke University Press

The increase of online nursing education programs has furthered the need for nursing faculty to have specific preparation for online teaching. Drawing from the authors' extensive experience teaching online nursing education programs, *Online Nursing Education: A Collaborative Approach* is unlike any other text. It was written and designed for faculty teaching online post-licensure students in a nursing education degree program, post-master's certificate program, advanced practice program, or other advanced education-related degree program. This unique text takes a

theoretical approach and includes practical examples as well as sample curriculum, course design, and policies. Topics covered include strategies for teaching online, learning through writing in an online classroom, experiential learning in online programs, generational differences in online learning, and more practical discussions backed by evaluation studies and qualitative research. *Online Nursing Education: A Collaborative Approach* Springer Publishing Company Praise for *Educating Nurses* "This book represents a call to arms, a call for nursing educators and programs to step up in our preparation of nurses. This book will incite controversy, wonderful debate, and dialogue among nurses and others. It is a must-read for every nurse educator and for every nurse that yearns for nursing to acknowledge and reach for the real

difference that nursing can make in safety and quality in health care." —Beverly Malone, chief executive officer, National League for Nursing "This book describes specific steps that will enable a new system to improve both nursing formation and patient care. It provides a timely and essential element to health care reform." —David C. Leach, former executive director, Accreditation Council for Graduate Medical Education "The ideas about caregiving developed here make a profoundly philosophical and intellectually innovative contribution to medicine as well as all healing professions, and to anyone concerned with ethics. This groundbreaking work is both paradigm-shifting and delightful to read." —Jodi Halpern, author, *From Detached Concern to Empathy: Humanizing Medical Practice* "This book is a landmark work in

professional education! It is a must-read for all practicing and aspiring nurse educators, administrators, policy makers, and, yes, nursing students." —Christine A. Tanner, senior editor, *Journal of Nursing Education* "This work has profound implications for nurse executives and frontline managers." —Eloise Balasco Cathcart, coordinator, Graduate Program in Nursing Administration, New York University

Updated and revised to meet all current standards This is a concise step-by-step guide for novice nurse educators on the development of new programs and curricula or the revision of existing ones that meet the standards of the National Council of State Boards of Nursing, the CNEA, the ACEN, and the CCNE. The second edition of this quick-access guide is updated to meet all new and revised standards for program approval and covers the full scope of the development process from conception through evaluation. The resource's thoughtful organization and bullet-point format enable users to access the information they need in seconds, and an abundance of updated examples clarify each step of the way. The book uses concepts and principles of Systems Theory to guide curriculum development and evaluation. It addresses the major components of the educator role: teaching, curriculum, developing a mission statement and program philosophy, selecting an organizational framework, using information technology, and evaluating both students and programs. It stresses use of evaluation procedures in which decisions are based on data. Each step of the process is organized into manageable parts that build upon each other, instilling the confidence and know-how to build quality programs. Chapters define key terms, summarize important points, and list resources for additional study. New to the Second Edition: Meets all of the new and revised standards for program approval according to the National State Boards of Nursing, the CNEA, the ACEN, and the CCNE Features updated examples demonstrating each step of the process Highlights collaborative curriculum development Includes New guidelines for each step of the process Introduces Career Ladder and Design Learning Discusses Educational/Competency Outcomes *Nursing* Springer Publishing Company

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. The state-of-the-art concept-based, student-centered introduction to nursing: first of two volumes, focused on 30 essential concepts associated with patients' psychosocial and reproductive concerns; with the nurse's professional domain; and with the nurse's roles and responsibilities in the broader healthcare system. Today, nurses must be able to transfer their knowledge to new situations, and stay current with new disorders, treatments.

Nursing Education Needs in Michigan

Springer Publishing Company

Achieving Distinction in Nursing Education, based on the National League for Nursing (NLN) Hallmarks of Excellence in Nursing Education Model, provides in-depth discussions of the eight core elements for superior nursing education: Engaged Students Diverse, Well-Prepared Faculty Culture of Continuous Quality Improvement Innovative, Evidence-Based Curriculum Innovative, Evidence-Based Approaches to Facilitate and Evaluate Learning Resources to Support Program Goal Attainment Commitment to Pedagogical Scholarship Effective Institutional and Professional Leadership This book also presents accompanying indicators to assist nurse educators in assessing the strengths of their programs and identifying areas for further development. Featuring contributions from 15 recognized experts and thought leaders in nursing education, administration, and research, this innovative resource is designed to challenge and inspire you to advance toward unparalleled outcomes for your career and your institution.

Curriculum Development in Nursing Education

Lippincott Williams & Wilkins "Just as a neighborhood is unique so must be every community-based nursing education program. Each of these programs demonstrates a unique way in which principles of community based education ... may be implemented with either in a portion of or across the curriculum."--Preface page xiv.

Competency Based Nursing Education

Springer Publishing Company

Considered the "gold standard" for evaluation and testing in nursing education, this fifth edition of the classic text helps educators to assess the level of learning achieved in the classroom, in clinical settings, and online with expanded coverage of essential concepts in assessment, evaluation, and testing in a wider variety of learning environments. It

presents new content on evaluation in online programs and testing and features a new chapter on using simulation for assessment and high-stakes evaluations. Also included is updated information on clinical evaluation and program evaluation along with current research featuring new examples and tools. The fifth edition expands content on standardized tests, including how to write test items for licensure and certification exam prep, and provides new information on developing rubrics for assessing written assignments. The fifth edition is distinguished from other texts by its focus on developing a framework that integrates all types of evaluation in a nursing program. It addresses how to develop a test blueprint and assemble, administer, write, and analyze tests. It provides rubrics for scoring tests and written assignments along with examples. Its guidelines for preventing cheating and conducting productive post-test discussions are especially helpful to educators.

Additionally, the book explores important social, ethical, and legal issues associated with testing and evaluation. It meets National League for Nursing's Certification Competency #3: Use Assessment and Evaluation Strategies. NEW TO THE FIFTH EDITION: Expanded coverage of essential concepts in assessment, evaluation, and testing in classroom and clinical education A new chapter on using simulation for assessment and high-stakes evaluation New information on evaluation in online courses, programs, and testing Expanded content on clinical evaluation and program evaluation Current research and new examples and tools How to write test items that prepare students for licensure and certification exams Expanded coverage on developing rubrics for assessing written assignments KEY FEATURES: Describes how to develop a test blueprint and assemble, administer, write, and analyze tests Provides sample grading rubrics Demonstrates strategies for evaluating higher levels of learning Explains how to evaluate written assignments with sample scoring rubrics Includes an Instructor's Manual with sample syllabus, PowerPoint slides, and an online course with 17 modules, each with student learning activities, discussion questions, and online resources

Teaching and Learning in a Concept-Based Nursing Curriculum

The Future of Nursing Results are presented of a study of nursing and nursing education that focused on the need for continued federal support of nursing education, ways to attract nurses to medically underserved areas, and

approaches to encourage nurses to stay in the profession. Findings are presented on whether the aggregate supply of generalist nurses will be sufficient to meet future demand, and how changes that could occur in the health care system might affect demand. Attention is also directed to: how the current and future supply of nurses may be influenced by the costs of nursing education and the sources of education financing; and education for generalist positions in nursing. In addition, the supply and demand situation for nurses educationally prepared for advanced professional positions in nursing is examined. The influence of employer policies and practices in utilization of nursing resources on demand and supply is also addressed. Finally, areas in which further data and studies are needed to better monitor nursing supply and demand are identified. In addition to 21 recommendations, appendices include information on Nursing Training Act appropriations, state reports on nursing issues, certificates for specialist registered nurses, projections of registered nurse supply and requirements, and doctoral programs in nursing. (SW)

Community-based Nursing Education
Springer Publishing Company

This new addition to the Fast Facts series is a pithy guide for novice nurse educators to the development, revision, and evaluation of programs and curricula that meet the standard requirements of the National Council of State Boards of Nursing, the NLNAC, and CCNE. Applying the concepts and principles of Systems Theory, the guide moves through the development process to include evaluation procedures where decisions are based on data. It addresses the common definitions of curriculum, how to design a curriculum, and how to design courses in accordance with the organizing elements of the program. The guide covers the purposes and development of a mission statement and of a program philosophy, as well as how to select an organizational framework. Curriculum implementation and faculty development requirements are also explored, in addition to educational and program outcomes and their evaluation. Organized for quick access and ease of use, each chapter defines key terms, summarizes important points, and lists resources for additional study. Key Features: Designed for use by all nursing educators regardless of educational environment or type of learner Breaks each step of the program development process into manageable parts that build on each other Uses concepts and principles of Systems Theory to guide

curriculum development and evaluation Assists new nurse educators in quickly identifying the individual elements of a program and grasping the connections between them

Report of the Commission to Develop a State-wide Plan for Nursing Education

Lippincott Williams & Wilkins
As the need for high-quality nursing programs, new programs, and new delivery methods continues to grow, systematic and ongoing program evaluation is increasingly critical to the success of nursing schools at all levels of education. A Systematic Approach to Evaluation of Nursing Programs, Second Edition, equips nurse educators, administrators, and others involved in program evaluation with truly transformative strategies for conducting ongoing formative and summative evaluation of nursing programs. This approachable resource combines in one concise volume detailed coverage of the concepts nurse educators must understand to engage in program evaluation and accreditation as well as examples and practical strategies for successfully applying those concepts. Updated with the latest perspectives from respected authorities across the field of nursing education and new chapters, this second edition provides the current, comprehensive support needed to confidently engage in program evaluation and build stronger nursing education programs.

Associate Degree Nursing Education Programs in California, 1953-1965

National Academies Press
This book addresses curriculum theory and practical applications that guide nurse educators in creating nursing curricula. *Curriculum Development and Evaluation in Nursing, Second Edition* Springer Publishing Company
Teaching and Learning in a Concept-Based Curriculum: A How-To Best Practice Approach provides specific, practical tools and strategies for teaching and evaluating students in the conceptbased curriculum model. The text includes sample lesson plans and study guides to show how a concept is taught in the classroom, clinical teaching activities that connect classroom and clinical learning, and clinical evaluation tools to assess student competence in a concept-based curriculum.

Trends in Contemporary RN Nursing Education

Jones & Bartlett Learning
The second edition of the current leading nursing text in curriculum development and evaluation continues to serve nurse educators in academic settings as well as

in the practice arena. It is a practical guide for developing, revising, and evaluating nursing curricula and educational programs, complete with case studies and details on conducting a needs assessment to determine the extent of revision necessary within current curricula. This text focuses on evidence-based practice, safety and quality assurance concepts, and the role of creative and critical-thinking aspects. It highlights NLN and AACN core competencies in developing and evaluating curricula in all levels of nursing programs. Additionally, it includes a comprehensive list of critical evaluation and accreditation tips, directions on how to prepare for an accreditation visit, and two proposed curricula for nurse educators to consider adapting into educational materials. Key features: Discusses the continuing growth of technology and its application in nursing programs Examines health care reform legislation that is expected to change the way care is delivered Contains updates on the continuing career-ladder and entry-level issues related to nursing Provides details on pedagogical methods, objectives, discussion points, learning activities, and references Includes a glossary of commonly used terms in curriculum development and evaluation This revised edition further examines several major objectives of the text, including major milestones for the past 100 years in the American nursing education system, program review and accreditation processes, and evaluating current trends in nursing education and their role in curriculum development.

Evaluation and Testing in Nursing Education

F.A. Davis
In numerous, oftentimes seemingly small ways, faculty in schools of nursing are implementing the recommendations of the Institute of Medicine report, *The Future of Nursing: Leading Change, Advancing Health*. These practices are the building blocks that will lead to a future of excellence in nursing education. Building the Future of Nursing links the NLN mission and its core value of excellence to this important work. The chapters in this text (originally accepted for publication in the Innovation Center of the NLN peer-reviewed research journal, *Nursing Education Perspectives*) highlight how faculty are using the recommendations for all types of nursing education, nationally and internationally.

A Systematic Approach to Evaluation of Nursing Programs Springer Publishing Company

"This is a detailed yet practical guide to planning, developing, and evaluating

nursing curricula and educational programs. It provides a comprehensive and critical perspective on the totality of variables impacting curricular decisions...This book provides readers with a comprehensive overview of curriculum development, redesign, and evaluation processes...92 - 4 Stars" --Doody's Book Reviews Reorganized and updated to deliver practical guidelines for evidence-based curricular change and development, the fourth edition of this classic text highlights current research in nursing education as a springboard for graduate students and faculty in their quest for research projects, theses, dissertations, and scholarly activities. It also focuses on the specific sciences of nursing education and program evaluation as they pertain to nursing educators. New chapters address the role of faculty regarding curriculum development and approval processes in changing educational environments; course development strategies for applying learning theories, educational taxonomies, and team-building; needs assessment and the frame factors model; ADN and BSN and pathways to higher degrees; and planning for doctoral education. The fourth edition continues to provide the detailed knowledge and practical applications necessary for new and experienced faculty to participate in essential components of the academic role—instruction, curriculum, and evaluation. At its core, the text discusses the importance of needs assessment and evidence as a basis for revising or developing new programs and highlights requisite resources and political support. With a focus on interdisciplinary collaboration, the book addresses the growth of simulation, how to help new faculty transition into the academic role, and use of curriculum in both practice and academic settings. Additionally, the book describes the history and evolution of current nursing curricula and presents the theories, concepts, and tools necessary for curriculum development. Chapters include objectives, discussion points, learning activities, references, and a glossary. New to the Fourth Edition: Reorganized and updated to reflect recent evidence-based curricular changes and developments Highlights current research New chapter: Implementation of Curriculum – Course Development Strategies for the Application of Learning Theories, Educational Taxonomies, and Instruction Team-Building New chapter on Planning for Undergraduate Programs New content on Needs Assessment and the Frame Factors Model New content on Planning for Doctoral Education in Nursing New content

on curriculum evaluation, financial support, budget management, and use of evidence Key Features: Supports new faculty as they transition to academe Addresses the need for preparing more faculty educators as defined by IOM report, the ACA, and the Consensus Model Describes the scope of academic curriculum models at every practice and academic level Threads the concept of interdisciplinary collaboration in education throughout Serves as a CNE Certification Review

Encyclopedia of Nursing Education

Springer Publishing Company

Written by luminaries in the field of nursing education, this is the only current and comprehensive compendium of important topics in nursing education. It contains more than 175 detailed entries, and will be a valuable reference text for doctoral- and master's-level nursing students, nursing faculty, university and hospital libraries worldwide, and hospital nursing departments and schools. The listing of entries has been carefully culled from recent nursing literature and six volumes of the Annual Review of Nursing Education. Each entry follows a standard template that includes definition, application in nursing education, a synopsis including a brief summary of what is in the literature on the topic, and a concluding summary discussing future development in nursing education. Listings are alphabetized for easy access, and are accompanied by a comprehensive reference list. KEY FEATURES: The only current compendium of important topics in nursing education Includes all topics relevant to nursing education based on a review of the literature Alphabetized and consistently formatted for easy access to information Includes comprehensive reference lists per topic Written by expert nurse educators A listing of teaching topics compiled by the editors is available to instructors

Continuing Education Program of the Intercollegiate Center for Nursing Education of Eastern Washington University, Washington State University, Whitworth College Springer Publishing Company

Designated a Doody's Core Title! "The construction of the doctor of nursing practice (DNP) and the clinical nurse leader (CNL) set in motion a sea change in graduate nursing education. In this book, Fitzpatrick and Wallace document the history, the driving forces, and the expectations for these new roles while providing a starting point for capacity building for the development of DNP and CNL educational programs." --Nursing

Education Perspectives The Research Journal of the National League for Nursing "This [book] is essential reading for graduate nursing students who are considering pursuing an advanced degree in nursing." Score: 100, 5 stars - -Doody's This is the first book to document and analyze the development and integration of the Clinical Nurse Leader (CNL) and Doctorate of Nursing Practice (DNP) programs in graduate nursing institutions. Editors Fitzpatrick and Wallace, established authorities in nursing education, present this text as an introduction to these exciting new degrees. The contributors, ranging from architects of the programs to graduates from the programs, offer valuable information on the objectives, curricula, and expected outcomes of these two educational tracks. Ultimately, the book explores how the development of these new degrees has influenced health care delivery at large. Highlights of this book: Delineates core program requirements and outlines what is expected of students in both clinical and academic arenas Provides guidance to students making the transition from masters level nursing programs to doctoral level programs Includes two chapters written by the AACN Taskforce on the new degrees, with essential information on how to gain and sustain accreditation Identifies critical issues underpinning future DNP and CNL program development, and discusses the impact of the new degrees on nursing education, patient outcome, and health care Offering comprehensive coverage of the DNP and CNL development, this book is required reading for students considering doctorates in nursing, as well as nurse educators and administrators working within the programs.

Achieving Distinction in Nursing Education

Springer Publishing Company

The need for competency-based education (CBE) in nursing has been recognized for years. CBE provides a way to help ensure that learners are competent at the end of educational endeavors. This book is designed as a resource for nurse educators who are responsible for diverse education programs. Authors Anema and McCoy bring together all the elements of CBE, and provide a road map to develop, implement, and evaluate competency-based approaches to nursing education. The book provides valuable guidelines for developing organizational strategies, new care delivery approaches, and project planning tools. Guidance on performance assessment tools and data collection is also included. Key features: Explains why CBE is needed and how it can help

improve current education programs
Presents practical guidelines on how to transition to the CBE approach
Provides helpful guidance on developing valid and reliable assessments
Includes critical information on data collection and the use of data to verify achievement of outcomes
Contains practice activities at the end of each chapter to simulate real-life situations

Curriculum Development in Nursing Education Springer Publishing Company
Curriculum Development in Nursing Education, Second Edition continues its dedication to the advancement of nursing

education, and in particular, to the ongoing development of relevant yet dynamic nursing education curricula. This Second Edition offers current, accessible, and comprehensive tips and tools and incorporates a balance of theoretical perspectives and practical applications. The Second Edition has been completely revised and updated and includes an expanded focus on developing a context-relevant curriculum. A major determinant in any nursing education curriculum is the context in which the curriculum is developed and offered. This context is the

professional, societal, health care, and educational situations to which the curriculum must respond, and is what makes each school's curriculum unique. Curriculum Development in Nursing Education helps nurse educators create a program of study that will meet the contextual needs of their individual setting. What's New: Expanded focus on developing a context-relevant curriculum
New sections on educational technologies, distributed learning, and curriculum evaluation. New chapters on preparing for external program review, building a curriculum, and evaluation of a curriculum.
