 School and public libraries often provide programs and activities for children in preschool through the sixth grade, but there is little available to young adults. For them, libraries become a place for work—the place to research an assignment or find a book for a report—but the thought of the library as a place for enjoyment is lost. So how do librarians recapture the interest of teenagers? This just might be the answer. Here you will find theme-based units (such as Cartoon Cavalcade, Log On at the Library, Go in Style, Cruising the Mall, Space Shots, Teens on TV, and 44 others) that are designed for young adults. Each

includes a display idea, suggestions for local sponsorship of prizes, a program game to encourage participation, 10 theme-related activities, curriculum tie-in activities, sample questions for use in trivia games or scavenger hunts, ideas for activity sheets, a bibliography of related works, and a list of theme-related films. The units are highly flexible, allowing any public or school library to adapt them to their particular needs.

Karol Mysliwiec surveys a turbulent time in Ancient Egyptian culture and history -- the eight hundred years between the eleventh century B.C.E. and the conquest of Egypt by Alexander the Great in 332 B.C.E., after which Egypt became part of the Hellenistic world. It was a time when Libyans, Kushites, Persians, and Greeks ascended

to the throne more frequently than did indigenous kings. The history of this phase of pharaonic Egypt, marked by rapid changes in rule, has been relatively neglected until now. Egypt had become increasingly involved in the affairs of its Near Eastern neighbors (Assyria, Babylon, and Persia) and of the Mediterranean world. These many cultures greatly enriched and influenced pharaonic traditions. At the same time, Egyptian civilization extended far beyond the borders of Egypt itself. One of the most important cultural products of this period is the Old Testament, called here "an inestimable source of information on daily life in pharaonic Egypt". Mysliwiec perceives in recent archaeological discoveries clear evidence that the First Millennium B.C.E. was witness to more than a slow, progressive dying out of the pharaonic past; new and creative elements profoundly altered the culture of Ancient Egypt. Originally published in Polish, *The Twilight of Ancient Egypt* appeared in 1998 in a German edition. The Cornell edition has been updated by the author and also contains previously unpublished photographs of recently discovered treasures.

In SPQR, an instant classic, Mary Beard narrates the history of Rome "with passion and without technical jargon" and demonstrates how "a slightly shabby Iron Age village" rose to

become the "undisputed hegemon of the Mediterranean" (Wall Street Journal). Hailed by critics as animating "the grand sweep and the intimate details that bring the distant past vividly to life" (Economist) in a way that makes "your hair stand on end" (Christian Science Monitor) and spanning nearly a thousand years of history, this "highly informative, highly readable" (Dallas Morning News) work examines not just how we think of ancient Rome but challenges the comfortable historical perspectives that have existed for centuries. With its nuanced attention to class, democratic struggles, and the lives of entire groups of people omitted from the historical narrative for centuries, SPQR will to shape our view of Roman history for decades to come.

Library of Congress Subject Headings (LCSH) are increasingly seen as 'the' English language controlled vocabulary, despite their lack of a theoretical foundation, and their evident US bias. In mapping exercises between national subject heading lists, and in exercises in digital resource organization and management, LCSH are often chosen because of the lack of any other widely accepted English language standard for subject cataloguing. It is therefore important that the basic nature of LCSH, their advantages, and their limitations, are well understood both by LIS practitioners and those in the wider information community. Information professionals who attended library school before 1995 - and many more recent library school graduates - are unlikely to have had a formal introduction to Library of Congress Subject Headings (LCSH).

Paraprofessionals who undertake cataloguing are similarly unlikely to have enjoyed an induction to the broad principles of LCSH. This is the first compact guide to LCSH written from a UK viewpoint. Key topics include: • background and history of LCSH • subject heading lists • structure and display in LCSH • form of entry • application of LCSH • document analysis • main headings • topical, geographical and free-floating subdivisions • building compound headings • name headings • headings for literature, art, music, history and law • LCSH in the online environment. Readership: There is a strong emphasis throughout on worked examples and practical exercises in the application of the scheme, and a full glossary of terms is supplied. No prior knowledge or experience of subject cataloguing is assumed. This is an indispensable guide to LCSH for practitioners and students alike.

The challenges of teaching history are acute where we consider the world history classroom. Generalized world history courses are a part of many, if not most, K-12 curricular frameworks in the United States. While United States history tends to dominate the scholarship and conversation, there are an equally wide number of middle-level and secondary students and teachers engaged in the study of world history in our public schools. And the challenges are real. In the first place, if we are to mark content coverage as a curricular obstacle in the history classroom, generally, then we must underscore that concern in the world history classroom and for obvious reasons. The curricular terrain to choose from is immense and forever expanding, dealing with the development of numerous civilizations over millennia and across a wide geographic expanse. In addition to curricular concerns, world historical topics are inherently farther away from most students' lives, not just temporally, but often geographically and culturally. Thus the rationale for the present text, *Hollywood or History? An Inquiry-Based Strategy for Using Film to Teach World History*. The reviews of the first volume *Hollywood or History? An Inquiry-Based Strategy for Using Film to Teach United States History* strategy have been overwhelmingly positive, especially as it pertains to the application of the strategy for practitioner. Classroom utility and teacher practice have remained our primary objectives in developing the *Hollywood or History?* strategy and we are encouraged by the possibilities of Volume II and the capacity of this most recent text to impact teaching and learning in world history. We believe that students' connection to film, along with teachers' ability to use film in an effective manner, will help alleviate some of the challenges of teaching world history. The book provides 30 secondary lesson plans (grades 6-12) that address nine eras in world history.
