Taylor Branch's groundbreaking book about the modern presidency, *The Clinton Tapes*, invites readers into private dialogue with a gifted, tormented, resilient president. Here is what President Clinton thought and felt but could not say in public. This book rests upon a secret project, initiated by Clinton, to preserve for future historians an unfiltered record of

presidential experience. During his eight years in office, between 1993 and 2001, Clinton answered questions and told stories in the White House, usually late at night. His friend Pulitzer Prize-winning author Taylor Branch recorded seventy-nine of these dialogues to compile a trove of raw information about a presidency as it happened. Clinton drew upon the diary transcripts for his memoir in 2004. Branch recorded his own detailed recollections immediately after each session, covering not only the subjects discussed but also the look and feel of each evening with the president. The text engages Clinton from

many angles. Readers hear candid stories, feel buffeting pressures, and weigh vivid descriptions of the White House settings. Branch's firsthand narrative is confessional, unsparing, and personal. The author admits straying at times from his primary role -- to collect raw material for future historians -- because his discussions with Clinton were unpredictable and intense. What should an objective prompter say when the President of the United States seeks advice, argues facts, or lodges complaints against the press? The dynamic relationship that emerges from these interviews is both affectionate

and charged, with flashes of anger and humor. President Clinton drives the history, but this story is also about friends. The Clinton Tapes highlights major events of Clinton's two terms, including wars in Bosnia and Kosovo, the failure of health care reform, peace initiatives on three continents, the anti-deficit crusade, and titanic political struggles from Whitewater to American history's second presidential impeachment trial. Along the way, Clinton delivers colorful portraits of countless political figures and world leaders from Nelson Mandela to Pope John Paul II. These unprecedented White House dialogues will become a staple of presidential scholarship. Branch's masterly account opens a new window on a controversial era and Bill Clinton's eventual place among our chief executives.

Winner, 2008 Richard E. Neustadt Award,

Presidency Research Group organized section of the American Political Science Association Political scientists are rarely able to study presidents from inside the White House while presidents are governing, campaigning, and delivering thousands of speeches. It's even rarer to find one who manages to get officials such as political adviser Karl Rove or presidential counselor Dan Bartlett to discuss their strategies while those strategies are under construction. But that is exactly what Martha Joynt Kumar pulls off in her fascinating new book, which draws on her first-hand reporting, interviewing, and original scholarship to produce analyses of the media and communications operations of the past four administrations, including chapters on George W. Bush and Bill Clinton. Kumar describes how today's White House communications and media operations can be at once in flux and remarkably stable over time. She describes how the presidential Press Office that was once manned by a single presidential advisor evolved into a multilayered communications machine that employs hundreds of people, what modern

presidents seek to accomplish through their operations, and how presidents measure what they get for their considerable efforts. Laced throughout with in-depth statistics, historical insights, and you-are-there interviews with key White House staffers and journalists, this indispensable and comprehensive dissection of presidential communications operations will be key reading for scholars of the White House researching the presidency, political communications, journalism, and any other discipline where how and when one speaks is at least as important as what one says.

When Life Strikes the President Vault Inc. Few would argue that presidential policies

and performance would have been the same whether John F. Kennedy or Richard Nixon became president in 1960, or if Jimmy Carter instead of Ronald Reagan had won the White House in 1980. Indeed, in recent elections, the character, prior policy experience, or personalities of candidates have played an increasing role in our assessments of their "fit" for the Oval Office. Further, these same characteristics are often used to explain an administration's success or failure in policy making. Obviously, who the president is—and what he is like—matters. This book, a new approach to the study of the personal presidency, links the characteristics of six modern American presidents—their personalities and their prior policy-making experience—to their leadership styles, advisory arrangements, and decision making in the White House. Thomas Preston uses M. G. Hermann's Personality Assessment-at-a-Distance (PAD) profiling technique, as well as exhaustive archival research and interviews with former advisors, to develop a leadership style typology. He then compares his model's expectations against the actual policy record of six past

presidents, using foreign policy episodes: Korea (1950) for Truman, Dien Bien Phu (1954) for Eisenhower, Cuba (1962) for Kennedy, Vietnam (1967-68) for Johnson, the Gulf War (1990-91) for Bush, and North Korea/Haiti/Bosnia (1994-95) for Clinton.

Women are gaining ground as presidents of Latin America. Women leaders in presidential systems (particularly women directly elected by the public) were generally limited to daughters and wives of male executives or opposition leaders. With the election of Michelle Bachelet in Chile, these traditional patterns appeared to be shifting. This book asks: what conditions allowed for a broadening of routes, beyond family ties, for women in Latin America? Do women presidents of Latin America use their powers to enhance women's representation? While providing valuable insight into the big picture of women in presidential politics throughout Latin America over the last several decades, this book more closely analyzes

four women presidents gaining office since 2006: Michelle Bachelet (Chile) Cristina Fernández (Argentina) Laura Chinchilla (Costa Rica) and Dilma Rousseff (Brazil). It assesses the paths and impacts of Latin American women presidents and scrutinizes the ways gender shapes both aspects. No other scholar has offered such an in-depth analysis of the paths and actions of women presidents of Latin America. As such, this book offers important contributions to the gender in politics literature. Its multi-methodological approach consisting of original data collection from field work and in person interviews of political elites and experts combined with an analysis of a host of secondary sources including media articles and public opinion data makes this work exceptionally comprehensive. Its findings are applicable to those studying women, gender, and politics as well as comparative politics, Latin American politics, and leadership studies.

"Authenticity," the dominant cultural value of the baby boom generation, became central to presidential campaigns in the late 20th century. Beginning in 1976, Americans elected six presidents whose campaigns represented evolving standards of authenticity. Interacting with the media and their publics, these successful presidential candidates structured their campaigns around projecting "authentic" images and connecting with voters as "one of us." In the process, they rewrote the political playbook, redefined "presidentiality," and changed the terms of the national political discourse. This book is predicated on the assumption that it is worth knowing why.

Notable Speeches in Contemporary Presidential Campaigns Springer Nature
Each year thousands of students apply for competitive national and international scholarships such as the Rhodes, Marshall, Gates Cambridge, and Fulbright. The competition for these awards is intense,

and students look to scholarship advisors for support. Many universities have created an office or designated part of an office to assist these students, which has provided greater access for students who may not have applied previously or successfully. It has also increased the competition. The twelve essays in this collection from the 2003 National Association of Fellowships Advisors Conference held at the University of Denver. Essays by the heads of the Rhodes, Marshall, Gates, and Truman Scholarship foundations provide a sense of the philosophy and direction of their programs. The essays provide information on new initiatives, insights into the history and significance of the programs, and insider tips for application and interview preparation. Other essays focus on the advising and application process from successful advisors at various universities, how the U.K. higher educational system differs from that in the United States, and the key issue of ethics in the application process. All the essays demonstrate that

the scholarship application experience itself is a valuable one that is more about learning and service than it is about winning.

Yet the work of the nation and the pressures of the job do not cease simply because a president suffers, though their reaction, suffering, and perseverance often alters the course of American history.
