FINLEY DEANNA

Sharing Jesus Without Freaking Out Taylor & Francis

The future of humanity is urban, and the nature of urban space enables, and necessitates, sharing -- of resources, goods and services, experiences. Yet traditional forms of sharing have been undermined in modern cities by social fragmentation and commercialization of the public realm. In *Sharing Cities*, Duncan McLaren and Julian Agyeman argue that the intersection of cities' highly networked physical space with new digital technologies and new mediated forms of sharing offers cities the opportunity to connect smart technology to justice, solidarity, and sustainability. McLaren and Agyeman explore the opportunities and risks for sustainability, solidarity, and justice in the changing nature of sharing. McLaren and Agyeman propose a new "sharing paradigm," which goes beyond the faddish "sharing economy" -- seen in such ventures as Uber and TaskRabbit -- to envision models of sharing that are not always commercial but also communal, encouraging trust

and collaboration. Detailed case studies of San Francisco, Seoul, Copenhagen, Medellin, Amsterdam, and Bengaluru (formerly Bangalore) contextualize the authors' discussions of collaborative consumption and production; the shared public realm, both physical and virtual; the design of sharing to enhance equity and justice; and the prospects for scaling up the sharing paradigm through city governance. They show how sharing could shift values and norms, enable civic engagement and political activism, and rebuild a shared urban commons. Their case for sharing and solidarity offers a powerful alternative for urban futures to conventional "race-to-the-bottom" narratives of competition, enclosure, and division.

The 2010 Nagoya Protocol on Access and Benefit-sharing in Perspective John Wiley & Sons

This book represents the major accomplishments of social scientists who have pioneered in data sharing, highlighting the advantages for social science. It includes an examination of the reasons for data sharing, the specific sharing practices in various disciplines, the factors affecting the usefulness of shared data and individual and institutional concerns about data sharing. It will be useful to academics across the social sciences.

General Revenue Sharing Edward Elgar Publishing

This book examines the economy of sharing in a variety of social and political contexts around the world, with consideration given to the role of sharing in relation to social order and social change, political power, group formation, individual networks and concepts of personhood. Widlok advocates a refreshingly broad comparative approach to our understanding of sharing, with a rich range of material from hunter-gatherer ethnography alongside debates and empirical illustrations from globalized society, helping students to avoid Western economic bias in their thinking. *Anthropology and the Economy of Sharing* also demonstrates that sharing is distinct from gift-giving, exchange and reciprocity, which have become dominant themes in economic anthropology, and suggests that a new focus on sharing will have significant repercussions for anthropological theory. Breaking new ground in this key topic, this volume provides students with a coherent and accessible overview of the economy of sharing from an anthropological perspective.

The New Statesman SAGE Publications

What if talking about your faith felt as natural as discussing your family, your work, or your hobbies? Evangelism doesn't have to be uncomfortable. You're under no pressure to prove anything. It really just amounts to having a conversation, and almost any context provides the

opportunity for evangelism. You can spot these opportunities when you listen, because people talk about what's important to them. So think of evangelism as building a relationship with someone and intentionally planning to share Jesus as a part of everyday living. *Sharing Jesus without Freaking Out*, Second Edition is not a comprehensive theology of evangelism or the methods by which that theological message is communicated. The goal of the book is simply to show what evangelism looks like when it's part of ordinary, everyday conversations. Sharing Jesus with others isn't a mystery, and it can be as natural as working a job, practicing a favorite hobby, or engaging in any other kind of daily activity. The authors show how anyone can make sharing the gospel a commonplace part of their lifestyle. Without all the freaking out part.

OECD Publishing

This is the account of two men who believe that we are created for deep, meaningful, and emotionally intimate relationships. The authors have found these relationships with their wives, and they are models for their children. They experience this kind of relationship with each other. They share how vital these relationships are through their non-profit: Someone To Tell It To. They create safe environments for people to share the stories of their lives openly and unashamedly. They encourage others to find safe people in their lives to foster relationships that provide true support, unconditional love, and grace. This book shares the authors' stories and the stories of others who are seeking meaning and purpose in their lives, especially when faced with challenges and questions. Someone To Tell It To may remind us that we are not alone in our fears, or in our feelings of inadequacy and uncertainty. Readers may be motivated to create more vital connections in their lives, connections that can be life-giving and soul-enriching, that can bring peace in the dark seasons of our lives. "Having someone to tell it to," as author Miles Franklin writes, is "one of the fundamental needs of human beings."

State and Local Fiscal Assistance Act (General Revenue Sharing) B&H Publishing Group

This inspirational tool encourages and enables Christians to share their faith with confidence and God-given assurance.

Revenue Sharing and Its Alternatives, what Future for Fiscal Federalism? Springer

Sharing is central to how we live today: it is what we do online; it is a model of economic behaviour; and it is also a type of therapeutic talk. Sharing embodies positive values such as empathy, communication, fairness, openness and equality. The Age of Sharing shows how and when sharing became caring, and explains how its meanings have changed in the digital age. But the word sharing also camouflages commercial or even exploitative relations. Websites say they share data with advertisers, although in reality they sell it, while parts of the sharing economy look a great deal like rental services. Ultimately, it is argued, practices described as sharing and critiques of those practices have common roots. Consequently, the metaphor of sharing now constructs significant swathes of our social practices and provides the grounds for critiquing them; it is a mode of participation in the capitalist order as well as a way of resisting it. Drawing on nineteenth-century literature, Alcoholics Anonymous, the American counterculture, reality TV, hackers, Airbnb, Facebook and more, The Age of Sharing offers a rich account of a complex contemporary keyword. It will appeal to students and scholars of the internet, digital culture and linguistics.

Sharing Social Science Data Martinus Nijhoff Publishers

"In the past fifteen years, file sharing of digital cultural works between individuals has been at the center of a number of debates on the future of culture itself. To some, sharing constitutes piracy, to be fought against and eradicated. Others see it as unavoidable, and table proposals to compensate for its harmful effects. Meanwhile, little progress has been made towards addressing the real challenges facing culture in a digital world. Sharing starts from a radically different viewpoint, namely that the non-market sharing of digital works is both legitimate and useful. It supports this premise with empirical research, demonstrating that non-market sharing leads to more diversity in the attention given to various works. Taking stock of what we have learned about the cultural economy in recent years, Sharing sets out the conditions necessary for valuable cultural functions to remain sustainable in this context."--[P] 4 of cover.

Share Jesus Without Fear IAP

This book aims to incorporate an emerging successful business model, i.e., sharing economy, into energy markets, thus digging out the potential merits and applications in multi-energy sectors.

With the core idea "access over ownership", sharing economy enables the collaborative consumption of idle resources through advanced information and communications technology. One critical challenge is to identify different market participants' occupation while accordingly designing pricing mechanisms. This book begins with an overview about the recent development of sharing economy in energy fields, and summarizes two energy market-related issues that sharing economy can hopefully address. One is how to quantify a marginal generator's contribution and thereby elicit truthful bidding under information asymmetry condition. The other is how to distinguish renewable and distributed energy resources' contribution and thus incentivize efficient aggregation considering increasing scale and uncertainty. Then sharing economy mechanisms are proposed and designed from a game theory perspective. On this basis, the following chapters thoroughly investigate the specific problems in spot markets, multi-area markets, renewable energy aggregation and energy systems integration. Additionally, the benefits brought by sharing economy are evaluated in terms of regional market bidding and transmission expansion deferral. Finally, the information and communications technologies related to sharing economy are modeled and analyzed. Hopefully, this book can greatly benefit the readers who are interested in energy economics and engineering.

Projects of Political and Economic Reform Cambridge University Press

This book explores all aspects of the sharing economy, pursuing a multidisciplinary approach encompassing Service Design, Spatial Design, Sociology, Economics, Law, and Transport and Operations Research. The book develops a unified vision of sharing services, and pinpoints the most important new challenges. The first, more theoretical part covers general topics from the perspectives of experts in the respective disciplines. Among the subjects addressed are the role of the user in co-design and co-production; impacts of sharing services on cities, communities, and private spaces; individual rewarding and social outcomes; regulatory issues; and the scope for improving the efficiency of design, management, and analysis of sharing services. In turn, the second part of the book presents a selection of case studies of specific sharing services, in which many of the concepts described in the first part are put into practice. Readers will gain a deeper understanding of the dynamics of sharing services and of the hidden problems that may arise. Key factors responsible for the success (or failure) of sharing services are identified by analyzing some of the best (and worst) practices. Given its breadth of coverage, the book offers a valuable guide for researchers and for all stakeholders in the sharing economy, including startup founders and local administrators.

National Conference on War Economy Amsterdam University Press

Does power sharing bring peace? Policymakers around the world seem to think so. Yet, while there are many successful examples of power sharing in multi-ethnic states, such as Switzerland, South Africa and Indonesia, other instances show that such arrangements offer no guarantee against violent conflict, including Rwanda, Yugoslavia, Zimbabwe and South Sudan. Given this mixed record, it is not surprising that scholars disagree as to whether power sharing actually reduces conflict. Based on systematic data and innovative methods, this book comes to a mostly positive conclusion by focusing on practices rather than merely formal institutions, studying power sharing's preventive effect, analyzing how power sharing is invoked in anticipation of conflict, and by showing that territorial power sharing can be effective if combined with inclusion at the center. The authors' findings demonstrate that power sharing is usually the best option to reduce and prevent civil conflict in divided states.

Revenue Sharing MIT Press

The 2010 Nagoya Protocol on Access and Benefit-sharing in Perspective analyses the implications of this innovative environmental treaty for different areas of international law, and its implementation challenges in various regions and from the perspectives of various stakeholders.

Sharing Cities B&H Publishing Group

In this book, we elaborate on the dynamic process of leadership sharing in creative project networks by pointing out that the boundaries and relationships of the networks change over time. As the project requirements evolve, new leaders emerge, make their contribution, and move into support positions. This leadership sharing dynamic is a necessary condition for mature LMX and member-member exchange (MMX). This insight about the sharing of leadership within networks directs us to the process of microbehavior being transformed to meso-options and being converted to macrostrategies. This sequence of micro to macro directs us to a marriage of the formal with the informal organization. At this stage we are post Simon, March, and Weick. This book is about putting authentic people back into the social creations we call productive organizations—warts and

all. The design of these organizations is as old as human civilization. It helped construct ancient Greece, Egypt, and China. It was improved in the West by the Romans and in the East by the Chinese. During more recent times it was improved by the British Empire whose command and control models gradually gave way to the knowledge models of today. This book is about how we can discover the alternative processes by which fallible humans use sense making to continuously improve organizations at the macrostrategy level.

Information Diffusion Management and Knowledge Sharing: Breakthroughs in Research and Practice IGI Global

This volume takes advantage of this opportunity by presenting a collection of empirical and conceptual work that explores the variety and the trajectories of new forms of organizing in the sharing economy, and in doing so builds on, rejuvenates, and refines existing organization theories.

Sharing Power, Securing Peace? Sharing Jesus without Freaking Out

There are a number of points throughout the trade mark system where multiple undertakings share the same name, either unwillingly, or by consent. In this timely book, expert contributors address this controversial issue and identify the various points at which names are shared. This unique book uses both historical and interdisciplinary perspectives, as well as more traditional legal methodology, to examine the practical and theoretical implications of such name sharing for the parties involved. It analyses what can be learned from the sharing process about the nature of the trade mark system and the interests which it protects. General themes relating to the nature and purpose of trade mark law are also discussed. The contributors focus on UK and European law and their detailed treatment of specific trade mark topics will prove invaluable to postgraduate law students and academics specialising in intellectual property. Legal practitioners will appreciate the up-to-date consideration of concepts important in both contentious and non-contentious trade mark practice and in-house counsel for brand owners will benefit from the expert guidance offered on issues relevant to protecting their trade marks.

Anthropology and the Economy of Sharing Springer Nature

You were born for this. God hardwired you—yes, you—for this. I'm talking about sharing Jesus with others. What if I told you evangelism is less about delivering a polished presentation and more about having a real conversation? What if I told you that God has created you to bring glory to himself by sharing Jesus with others, and that you don't need years of training to obey what he already made you to do? God created you for his glory to advance his gospel with the gifts, talents, and opportunities he gave you. You live at this time in history for a purpose bigger than yourself. In these pages you will read how to connect the gospel story with your story, and how to talk about that story in normal conversations with people you know. No gimmicks. Nothing clever. No need to freak out. Just you, Jesus, and others—in conversations that matter.

Survey of Experiences in Profit Sharing and Possibilities of Incentive Taxation WestBow Press

This report examines the opportunities of enhancing access to and sharing of data (EASD) in the context of the growing importance of artificial intelligence and the Internet of Things. It discusses how EASD can maximise the social and economic value of data re-use and how the related risks and challenges can be addressed. It highlights the trade-offs, complementarities and possible unintended consequences of policy action - and inaction. It also provides examples of EASD approaches and policy initiatives in OECD countries and partner economies.

The Square Deal Emerald Group Publishing

Architect and deliver packaged Force.com applications that cater to enterprise business needs About This Book Explore the lightning framework, advanced application life cycle processes, and testing Use the Force.com platform to build truly integrated, scalable, and robustly engineered applications focused on enterprise-level customer demands Using the Lightning technology to deliver modern and responsive user experiences targeting multiple devices through Lightning Experience and Salesforce1 Mobile. Step-by-step, work on examples to get you building your own ready-to-install packaged application Who This Book Is For This book is for advanced Force.com developers and architects who need to understand the Salesforce platform from the perspective of enterprise-level requirements. A prior understanding of Apex and Visualforce is a must. Those familiar with other enterprise software ecosystems will also find this book ideal as they adopt Force.com. What You Will Learn Package, install, test, and upgrade an application Define architecture-aligning data storage and functional requirements Develop Apex code that is easy to navigate, self-documenting, testable, robust, and organic Leverage your application's clientagnostic Service layer backbone to support numerous platform areas Get the most from

hosting your application within the Lightning Experience and Salesforce1 Mobile clients Apply querying, indexing, and asynchronous best practices Leverage mocking and dependency injection in your Apex tests Explore tips for developing advanced applications In Detail Companies of all sizes have seen the need for Force.com's architectural strategy focused on enabling their business objectives. Successful enterprise applications require planning, commitment, and investment in the best tools, processes, and features available. This book will teach you how to architect and support enduring applications for enterprise clients with Salesforce by exploring how to identify architecture needs and design solutions based on industry standard patterns. There are several ways to build solutions on Force.com, and this book will guide you through a logical path and show you the steps and considerations required to build packaged solutions from start to finish. It covers

all aspects, from engineering to getting your application into the hands of your customers, and ensuring that they get the best value possible from your Force.com application. You will get acquainted with extending tools such as Lightning App Builder, Process Builder, and Flow with your own application logic. In addition to building your own application API, you will learn the techniques required to leverage the latest Lightning technologies on desktop and mobile platforms. Style and approach The book takes a straightforward approach, taking apart the Force.com architecture for you to gain a deep understanding of how you can implement the Salesforce platform based on enterprise-level requirements.

[Sharing Network Leadership](#) Packt Publishing Ltd

Within the past 10 years, tremendous innovations have been brought forth in information diffusion

and management. Such technologies as social media have transformed the way that information is disseminated and used, making it critical to understand its distribution through these mediums. With the consistent creation and wide availability of information, it has become imperative to remain updated on the latest trends and applications in this field. Information Diffusion Management and Knowledge Sharing: Breakthroughs in Research and Practice examines the trends, models, challenges, issues, and strategies of information diffusion and management from a global context. Highlighting a range of topics such as influence maximization, information spread control, and social influence, this publication is an ideal reference source for managers, librarians, information systems specialists, professionals, researchers, and administrators seeking current research on the theories and applications of global information management.
