Managing solid waste is one of the major challenges in urbanization. A survey conducted in all 58 municipalities of Nepal

in 2012 found that the average municipal solid waste generation was 317 grams per capita per day. This translates into 1,435 tons per day or 524,000 tons per year of municipal solid waste generation in Nepal. Many of these technically and financially constrained

municipalities are still practicing roadside waste pickup from open piles and open dumping, creating major health risks. *UNSCRIPTED* Currency Do you worry that your business will collapse without your constant presence? Are you sacrificing your family, friendships, and freedom to keep your business alive? What if instead your business could run itself, freeing you to do what you love when you want, while it continues to grow and turn a profit? It's possible. And it's easier than you think. If you're like most entrepreneurs, you started your business so you could be your own boss, make the money you deserve, and live life on your own terms. In reality, you're bogged down in

the daily grind, constantly putting out fires, answering an endless stream of questions, and continually hunting for cash. Now, Mike Michalowicz, the author of *Profit First* and other small-business bestsellers, offers a straightforward step-by-step path out of this dilemma. In *Clockwork*, he draws on more than six years of research and real life examples to explain his simple approach to making your business ultra-efficient. Among other powerful strategies, you will discover how to: Make your employees act like owners: Free yourself from micromanaging by using a simple technique to empower your people to make smart decisions without you. Pinpoint

your business's most important function: Unleash incredible efficiency by identifying and focusing everyone on the one function that is most crucial to your business. Know what to fix next: Most entrepreneurs try to fix every inefficiency at once and end up fixing nothing. Use the "weakest link in the chain" method to find the one fix that will add the most value now. Whether you have a staff of one, one hundred, or somewhere in between, whether you're a new entrepreneur or have been overworked and overstressed for years, Clockwork is your path to finally making your business work for you.

Nick Friedman and Omar Soliman started the multimillion-dollar franchise College Hunks Hauling Junk when they were just twenty two, and they've been having the time of their lives ever since. What's their secret? That's just it--there isn't one. There's no fancy software or complicated business schemes. No outside investors or quirky market niche. They just followed 10 common-sense commandments to building a straightforward, fun, and successful business that does a simple job well. Anyone can understand it, and anyone can do it. Effortless Entrepreneur Success DNA The second edition of a bestselling textbook, Using R for

Introductory Statistics guides students through the basics of R, helping them overcome the sometimes steep learning curve. The author does this by breaking the material down into small, task-oriented steps. The second edition maintains the features that made the first edition so popular, while updating data, examples, and changes to R in line with the current version. See What's New in the Second Edition: Increased emphasis on more idiomatic R provides a grounding in the functionality of base R. Discussions of the use of RStudio helps new R users avoid as many pitfalls as possible. Use of knitr package makes code easier to read

and therefore easier to reason about. Additional information on computer-intensive approaches motivates the traditional approach. Updated examples and data make the information current and topical. The book has an accompanying package, UsingR, available from CRAN, R's repository of user-contributed packages. The package contains the data sets mentioned in the text (`data(package="UsingR")`), answers to selected problems (`answers()`), a few demonstrations (`demo()`), the errata (`errata()`), and sample code from the text. The topics of this text line up closely with traditional teaching progression; however, the book also

highlights computer-intensive approaches to motivate the more traditional approach. The authors emphasize realistic data and examples and rely on visualization techniques to gather insight. They introduce statistics and R seamlessly, giving students the tools they need to use R and the information they need to navigate the sometimes complex world of statistical computing. Simon and Schuster Tech For Good reveals how Fourth Industrial Revolution technologies will help solve the world's greatest challenges like climate change, biodiversity loss, inequality, and poverty. Tech For Good presents a unique perspective on how

business can successfully apply advanced technologies in a purpose-driven manner while unlocking new markets and seizing business opportunities. Packed with 75 real-life business cases of companies from all over the world, this inspiring book unfolds a compelling narrative about how businesses commercially synergize technology and sustainability. The purpose of this book is to imagine the unprecedented possibilities advanced technologies offer business to drive sustainable growth. Tech for Good will be vital for realizing our Global Goals. *Start Your Own Cleaning Service* Createspace Independent Publishing

 Problem: Most Americans don't realize the potential gold mine in blue-collar business. By "blue-collar business" I mean a business providing a specialized service requiring a trained employee and manual labor. In my case it is chimney sweeping, but it can range from construction to gardening to plumbing and junk removal. There are literally thousands and thousands of opportunities, but many people don't consider blue-collar work as an option and

are missing out as a result... Over 3 million blue-collar and skilled labor jobs went unfilled in America last year! The service industry is wide open in America and this book will open your eyes to a growing opportunity that you probably never thought about. By reading this book you will learn how to: Think bigger - Don't be scared of starting or growing your existing business. Make a decision and then make the decision right. Be a leader - You have to learn to be a leader if you want to have a great business. Leadership is a learned skill and this book can help get you started. Start with a plan and an exit strategy so you can live the life you want without being stuck in your business. So come on America,

let's get to work doing the "dirty" jobs and make a whole lot of money while you're at it

The Power of Broke Entrepreneur Press More than half-a-million business leaders have discovered the power of the StoryBrand Framework, created by New York Times best-selling author and marketing expert Donald Miller. And they are making millions. If you use the wrong words to talk about your product, nobody will buy it. Marketers and business owners struggle to effectively connect with their customers, costing them and their companies millions in lost revenue. In a world filled with constant, on-demand distractions, it

has become near-impossible for business owners to effectively cut through the noise to reach their customers, something Donald Miller knows first-hand. In this book, he shares the proven system he has created to help you engage and truly influence customers. The StoryBrand process is a proven solution to the struggle business leaders face when talking about their companies. Without a clear, distinct message, customers will not understand what you can do for them and are unwilling to engage, causing you to lose potential sales, opportunities for customer engagement, and much more. In *Building a StoryBrand*, Donald Miller teaches marketers and

business owners to use the seven universal elements of powerful stories to dramatically improve how they connect with customers and grow their businesses. His proven process has helped thousands of companies engage with their existing customers, giving them the ultimate competitive advantage. Building a StoryBrand does this by teaching you: The seven universal story points all humans respond to; The real reason customers make purchases; How to simplify a brand message so people understand it; and How to create the most effective messaging for websites, brochures, and social media. Whether you are the marketing director of a

multibillion-dollar company, the owner of a small business, a politician running for office, or the lead singer of a rock band, Building a StoryBrand will forever transform the way you talk about who you are, what you do, and the unique value you bring to your customers.

What the world can learn from Israel's meteoric economic success. Start-Up Nation addresses the trillion dollar question: How is it that Israel -- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK?

With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are

entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight directors, who authored the book. The book provides insight

into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed.

The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.
