know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at

all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a

straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work

experience.” — Library Journal (starred review) “I am a huge fan of Alison Green’s Ask a Manager column. This book is even better.  This book examines phenomena from Finnish and Finnish-Swedish literature written in the years between the 1980s and

the first decade of the new millennium. Its objective is to study this interesting era of literary history in Finland and to sketch some possible directions for future development by identifying literary turning points which have already occurred. The nine articles found in the anthology are written by some of the most prominent literary scholars in Finland. These distinguished

authors examine such varied topics as postmodern allegories, feminism, historiography, autobiographic writing, modern subjects in postmodern conditions, metalyrical poetry, realistic involvement in the novel, successful children's literature, and the intertextuality of Sofi Oksanen's famous novel *Purge*.

being included as both agents and beneficiaries of development, these Goals will never be achieved. Yet, persons with disabilities are still invisible and often left behind. This United Nations flagship report is the first publication to address, at the global level, the nexus between disability and the Sustainable Development Goals. It is also the first global analysis based on an unprecedented

d amount of data, legislation and policies from over 100 countries to understand the socio-economic circumstances of persons with disabilities and the challenges and barriers they face in their daily lives. This report examines new areas, like the role of access to energy to enable persons with disabilities to use assistive technology, for which no global research was

previously available. And explores the linkages between the Sustainable Development Goals and the Convention on the Rights of Persons with Disabilities as well as other international relevant norms and standards relating to disability. Against the backdrop of all the available evidence, the report identifies good practices and recommends urgent actions to be taken for the achievement of the

Sustainable Development Goals by, for and with persons with disabilities. The e-book for this publication has been converted into an accessible format for the visually impaired and people with print reading disabilities. It is fully compatible with leading screen-reader technologies such as JAWS and NVDA. Couples Therapy, Multiple Perspectives Routledge Presents a revision of the

late Columbia University art historian's lectures given at Indiana University in 1961. **Nodes of Contemporary Finnish Literature** University of Chicago Press Originally released in 1998, Documenting the Documentary responded to a scholarly landscape in which documentary film was largely understudied and undervalued aesthetically, and analyzed instead

through issues of ethics, politics, and film technology. Editors Barry Keith Grant and Jeannette Sloniowski addressed this gap by presenting a useful survey of the artistic and persuasive aspects of documentary film from a range of critical viewpoints. This new edition of Documenting the Documentary adds five new essays on more recent films in addition to the

text of the first edition. Thirty-one film and media scholars, many of them among the most important voices in the area of documentary film, cover the significant developments in the history of documentary filmmaking from *Nanook of the North* (1922), the first commercially released documentary feature, to contemporary independent film and video productions like Werner

Herzog's *Grizzly Man* (2005) and the controversial *Borat* (2006). The works discussed also include representative examples of many important national and stylistic movements and various production contexts, from mainstream to avant-garde. In all, this volume offers a series of rich and revealing analyses of those "regimes of truth" that still fascinate filmgoers as much today as

they did at the very beginnings of film history. As documentary film and visual media become increasingly important ways for audiences to process news and information, Documenting the Documentary continues to be a vital resource to understanding the genre. Students and teachers of film studies and fans of documentary film will appreciate this expanded classic

volume.

For much of his thirties, Jesse Bering thought he was probably going to kill himself. He was a successful psychologist and writer, with books to his name and bylines in major magazines. But none of that mattered. The impulse to take his own life remained. At times it felt all but inescapable. Bering survived. And

in addition to relief, the fading of his suicidal thoughts brought curiosity. Where had they come from? Would they return? Is the suicidal impulse found in other animals? Or is our vulnerability to suicide a uniquely human evolutionary development? In *Suicidal*, Bering answers all these questions and more, taking us through the science and psychology of suicide,

revealing its cognitive secrets and the subtle tricks our minds play on us when we're easy emotional prey. Scientific studies, personal stories, and remarkable cross-species comparisons come together to help readers critically analyze their own doomsday thoughts while gaining broad insight into a problem that, tragically, will most likely touch all of us at some point

in our lives. But while the subject is certainly a heavy one, Bering's touch is light. Having been through this himself, he knows that sometimes the most effective response to our darkest moments is a gentle humor, one that, while not denying the seriousness of suffering, at the same time acknowledges our complicated, flawed, and yet precious existence. Authoritative, accessible,

personal, profound—the re's never been a book on suicide like this. It will help you understand yourself and your loved ones, and it will change the way you think about this most vexing of human problems. **A Practical Approach to Trauma** Routledge Based on Foucault's 1978 and 1979 lectures on rationalities of government, this work examines the art or activity

of government and the different ways in which it has been made thinkable and practicable. There are also contributions of other scholars exploring modern manifestations of government. The Distance Cure FSG Originals Since its original publication in 1996, this volume has been a helpful guide to therapists in the practice of emotionally focused therapy. This second edition

addresses the many changes in the field of couples therapy, including updated research results linked to clinical intervention and new information on using EFT to address depression and PTSD. A new section covers the growth of couples therapy as a field and its overall relevance to the mental health field, accompanied by coverage of how recent research into the nature of

marital distress is consonant with EFT. Other new features are a section on EFT and feminism, as well as a section on cultural competence for the EFT therapist. Written by a leading authority on emotionally focused couples and marital therapy, this second edition is an up-to-date reference on all aspects of EFT and its uses for mental health professionals. The Heart of Couple

Therapy World Bank Publications How do couples get beyond the reactivity and blaming that destroy self-esteem and good will? How can couples sort out the multiple layers and complexities in their relationships? Is it possible to move from impasse to dialogue? Here, in one brief volume, are the answers to these questions and many others. Doing Couple Therapy will

be a lifesaver for family therapy students and beginning therapists. In a straightforward manner, the authors sift through years of family therapy theory to draw out for readers a treasury of ways to sort out the many factors, past and present, that crowd couples' relationships. These include family-of-origin issues, previous relationships, secrets, children, in-laws,

unresolves lodes, job demands, financial worries—to name just a few. The authors' framework, built from the major influential theories of family and marital therapy, will enable therapists to work effectively and briefly, though not superficially, with couples. The book not only presents theory but also links theory with practice. An extraordinary contribution is

the presentation of a typical case from beginning to end, through tender moments, rough spots, family-of-origin work, revelation of deeply held secrets, alcohol abuse, ultimatums, and finally, renewal of commitment to the relationship. This practical, real-life guide to couple therapy will give both students and seasoned therapists a new take on the demanding

work of couple therapy.

Psychotherapy across distance and time, from Freud's treatments by mail to crisis hotlines, radio call-ins, chatbots, and Zoom sessions.

Therapy has long understood itself as taking place in a room, with two (or more) people engaged in person-to-person conversation.

And yet, starting with Freud's treatments by mail, psychotherapy has operated through

multiple communication technologies and media.

These have included advice columns, radio broadcasts, crisis hotlines, video, personal computers, and mobile phones; the therapists (broadly defined) can be

professional or untrained, strangers or chatbots. In *The Distance Cure*, Hannah Zeavin proposes a reconfiguration of the traditional therapeutic dyad of

therapist and patient as a triad: therapist, patient, and communication technology. Zeavin tracks the history of teletherapy (understood as a therapeutic interaction over distance) and its metamorphosis from a model of cure to one of contingent help. She describes its initial use in ongoing care, its role in crisis intervention and symptom management, and our pandemic-

mandated reliance on regular Zoom sessions. Her account of the “distanced intimacy” of the therapeutic relationship offers a powerful rejoinder to the notion that contact across distance (or screens) is always less useful, or useless, to the person seeking therapeutic treatment or connection. At the same time, these modes of care can quickly become a backdoor for

surveillance and disrupt ethical standards important to the therapeutic relationship. The history of the conventional therapeutic scenario cannot be told in isolation from its shadow form, teletherapy. Therapy, Zeavin tells us, was never just a “talking cure”; it has always been a communication cure. Voice and Agency Createspace Independent Publishing Platform
