Acute & Chronic Wounds BoD – Books on Demand
This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.
Strengthening Forensic Science in the United States National Academies Press
At the last Annual Representative Meeting of the British Medical Association a motion was passed that `certain additional cannabinoids should be legalized for wider medicinal use." This report supports this landmark statement by reviewing the scientific evidence for the therapeutic use of cannabinoids and sets the agenda for change. It will be welcomed by those who believe that cannabinoids can be used in medical treatment. The report discusses in a clear and readable form the use and adverse effects of the drug for nausea, multiple sclerosis, pain, epilepsy, glaucoma, and asthma.
THE FOOD OF GODS World Bank Publications
• Explores the properties and healing uses of 40 important crystals and stones, including quartz, Herkimer diamond, amethyst, and citrine--the coyote stone • Explains how to spiritually prepare to work with crystals and how to purify and care for them, including how to establish right relationship with a crystal • Details safe and effective healing techniques, including how to make crystal essences, how to program a crystal, and how to purify the energy centers or perform a healing treatment with clear quartz crystal Crystals and stones come from Mother Earth, and indigenous medicine people have been using them to help and to heal for millennia. Their techniques, although simple, have proven effective through the innumerable healers who have handed down these teachings across the generations. With the permission of his elders and teachers, Luke Blue Eagle shares the therapeutic and spiritual use of crystals as taught in the traditions of First Nations tribes. He offers guidance and teachings designed to spiritually and energetically prepare you for crystal healing work, detailing the connections between the five elements and crystals as well as the energetic properties of different colors as they manifest in stones. He explains how to purify, care for, and protect your crystals, including how to establish right relationship with a crystal and perform a consecration ceremony for a new gemstone. The author explores the properties and healing uses of 38 important crystals and stones, including Herkimer diamond, amethyst, and citrine--the coyote stone. He provides safe and effective healing techniques that include how to make crystal essences, how to program a crystal, and how to purify the energy centers or perform a healing treatment with clear quartz crystal. Presenting an authentic guide to First Nations wisdom for working with the teachers of the mineral kingdom, Blue Eagle shows that, by forming respectful relationships with crystals and stones, we can not only amplify healing energies and intentions but also bring ourselves back into harmony with Mother Earth.
Clinical Methods John Wiley & Sons
This book sheds light on recent advances in sustainable construction and building materials with special emphasis on the characterization of natural and composite hydraulic mortars, advanced concrete technology, green building materials, and application of nanotechnology to the improvement of the design of building materials. The book covers in detail the characterization of

natural hydraulic lime mortars, a decade of research on self-healing concrete, biocomposite cement binding process and performance, development of sustainable building materials from agro-industrial wastes, applications of sugarcane biomass ash for developing sustainable construction materials, oil-contaminated sand: sources, properties, remediation, and engineering applications, oil shale ash addition effect in concrete to freezing/thawing, connection node design and performance optimization of girders, functionally graded concrete structures, cumulative tensile damage and consolidation effects on fracture properties of sandstone, key performance criteria influencing the selection of construction methods used for the fabrication of building components in the Middle East, fly ash as a resource material for the construction industry, degradation monitoring systems for a building information modeling maintenance approach, durability of composite-modified asphalt mixtures based on inherent and improved performance, and bitumen and its modifiers.
Pediatric Airway Surgery North Atlantic Books
From Best-Selling Author Donna Norton! Drawing on her expertise in using children's literature to foster literacy in today's classrooms, Donna Norton has crafted a contemporary, application-rich textbook that will prepare future teachers to "put reading first" and provide high-quality, research-based instruction in reading and the language arts. "Book Earns High Praise From Reviewers" "A great number of activities listed at the end of each chapter provide students with many opportunities to discuss the chapter content, apply to field work, and reflect." - Shelley Hong Xu, CSU Long Beach "Chapter 3, Assessment. This chapter is so current, it is scary! This chapter helps to give a clear, but realistic picture of the types of assessments our students will be faced with in the public schools." - Carol L. Butterfield, Ph.D., Central WA University This publication marks a major advance over existing reading methods texts. It broadens the context of literacy with meticulously chosen examples of children's literature, real (and very detailed) lesson plans, classroom tested instructional units, and vividly illustrated examples. Read All About It feature demonstrates that reading is a current and dynamic field of study. Lesson Plans are clear, concise examples of how a master teacher systematically creates a lesson plan based on specific books. Differentiating Instruction provides relevant, practical material on: ELL; Struggling Readers and Writers; and Gifted and Accelerated Readers and Writers.
The Healing Power of Faith Springer
The Food of Gods is Jasmuheen's 18th book on metaphysical matters and her third book in the Divine Nutrition series. It is not necessary to have read the previous books on this subject which cover her personal journey and the solution for world health and world hunger issues as "The Foods of Gods" takes the pranic nourishment discussion to another level and offers simple yet powerful tools to satiate all of our hungers. Jasmuheen writes: The most important difference with our focus with Divine Nutrition is that It has the ability to feed us on all levels and that we can still benefit from increasing Its flow through our bio-system even if we continue to choose to enjoy eating. Allowing this Divinely Nutritional stream to be increased in our system means that we can be fed emotionally, mentally and spiritually and as such the techniques and guidelines shared in this book, will benefit us all by freeing us from our current personal and global emotional, mental and spiritual states of anorexia.
Transforming E-Business Practices and Applications: Emerging Technologies and Concepts University of Adelaide Press
Chinese Shamanic Tiger Qigong is a uniquely classical practice designed to bolster our health, activate our inner life power, and deepen our spiritual connection to universal energy. This book illustrates the philosophy and cultivating method of the Tiger Qigong form and unlocks the mysterious internal alchemy principle of LaoHu (Shamanic Tiger) Gong. By delving further into Xiang (Daoist symbolism) of Tiger, practitioners will receive greater benefits from studying this book and their own Tiger Qigong practice. Master Wu also shares how each movement in the Tiger Qigong practice relates to the eight extraordinary meridians, twelve organ meridians and twenty four JieQi

(seasons). This knowledge will help seasoned practitioners experience new dimensions of their cultivation and sharpen their healing tools.

How Tobacco Smoke Causes Disease McGraw Hill Professional

Used as a reference by students of acupuncture, *Healing with Whole Foods* is an invaluable guide to the theory and practice of Chinese medicine. With facts about green foods such as spirulina and blue-green algae and information about the "regeneration diets" used by cancer patients and arthritics, it is also an accessible primer on nutrition—and a inspiring cookbook with more than 300 mostly vegetarian, nutrient-packed recipes. The information on Chinese medicine is useful for helping to diagnose health imbalances, especially nascent illnesses. It's smartly paired with the whole-foods program: because the Chinese have attributed various health-balancing properties to foods, you can tailor your diet to help alleviate symptoms of illness. For example, Chinese medicine dictates that someone with low energy and a pale complexion (a yin deficiency) would benefit from avoiding bitter foods and increasing "sweet" foods such as soy, black sesame seeds, parsnips, rice, and oats. (Note that the Chinese definition of sweet foods is much different from the American one!) Pitchford says in his dedication that he hopes the reader finds "healing, awareness, and peace" by following his program. The diet is certainly ascetic by American standards (no alcohol, caffeine, white flour, fried foods, or sugar, and a minimum of eggs and dairy) but the reasons he gives for avoiding these "negative energy" foods are compelling. From the adrenal damage imparted by coffee to the immune dysfunction brought on by excess refined sugar, Pitchford spurs you to rethink every dietary choice and its ultimate influence on your health. Without being alarmist, he offers dietary tips for protecting yourself against the dangers of modern life, including neutralizing damage from water fluoridation. There's further reading on food combining, female health, heart disease, pregnancy, fasting, and weight loss. Overall, this is a wonderful book for anyone who's serious about strengthening his or her body from the inside out.

The Science and art of surgery v.2 Harvard University Press

As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

Electronic Services: Concepts, Methodologies, Tools and Applications Springer Science & Business Media

Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. The *Health Effects of Cannabis and Cannabinoids* provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agenda—outlining gaps in current knowledge and opportunities for providing additional insight into these issues—that summarizes and prioritizes pressing research needs.

Building and Theming Drupal Collection Electronic Services: Concepts, Methodologies, Tools and Applications

This book provides detailed insight into the difficult problem of pediatric airway management. Each chapter focuses on a particular condition in a very practical manner, describing diagnostic procedures and precisely explaining surgical options with the help of high-quality illustrations. Both established treatment modalities and new management concepts are considered in depth, and controversies relating to the most difficult airway reconstructions are discussed. To help the reader, boxes are included to summarize procedures and to list tips, tricks, and traps relevant to daily practice. The contributors to the book have all been directly involved in the management of children with airway disorders and write on the basis of their vast experience. Otolaryngologists, pediatric

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Data-intensive Text Processing with MapReduce Simon and Schuster

A guide to the techniques and analysis of clinical data. Each of the seventeen sections begins with a drawing and biographical sketch of a seminal contributor to the discipline. After an introduction and historical survey of clinical methods, the next fifteen sections are organized by body system. Each contains clinical data items from the history, physical examination, and laboratory investigations that are generally included in a comprehensive patient evaluation. Service-Oriented Computing - ICSOC 2006 IGI Global

With the increasing reliance on digital means to transact goods that are retail and communication based, e-services continue to develop as key applications for business, finance, industry and innovation. Electronic Services: Concepts, Methodologies, Tools and Applications is an all-inclusive research collection covering the latest studies on the consumption, delivery and availability of e-services. This multi-volume book contains over 100 articles, making it an essential reference for the evolving e-services discipline.

Crossing the Quality Chasm Univ of California Press

Kleinman, a psychiatrist, trained in anthropology, reports on his studies of health care in Taiwan. He describes his observations of clinical interviews between various medical practitioner, folk-healers, temple medicine men, and Chinese-style and Western-style physicians and their patients. He stress the importance of adopting the proper cultural perspective, making ones interpretations within that framework.

Therapeutic Uses of Cannabis Allyn & Bacon

New updated edition first published with Cambridge University Press. This new edition includes 29 chapters on topics as diverse as pathophysiology of atherosclerosis, vascular haemodynamics, haemostasis, thrombophilia and post-amputation pain syndromes.

The Big Book of Conflict Resolution Games: Quick, Effective Activities to Improve Communication, Trust and Collaboration HarperCollins UK

I love the idea of a Smart Internet that lets users improve many parts of their lives, pulling together data and services from around the internet. This won't happen with large unwieldy programming requirements. . . it will happen because we're moving towards integrated, simple tasks that users can do on an every day basis. With services available on the cloud, with analytics available, with data that has meaning to the user and not just to some protocol parser - with all of these, users at all levels will be able to do a better job. The users may be small and large enterprises, local governments, individuals, etc. All of this means that as the world is becoming more intelligent, instrumented and more interconnected, we'll be headed towards smarter health care, smarter cities, and smarter lives. " — Gennaro A. Cuomo, IBM Software Group Vice President and IBM Fellow, WebSphere Chief Technology Officer Congratulations to the team on the publication of this first volume of the IBM CAS Research book series! This is a signi?cant milestone for IBM CAS Research. This series not only captures the innovations resulting from the collaboration across IBM technical leaders, IBM CAS faculty members, as well as our network of distinguished academic partners, it also lays the foundation for ongoing commercialization of future research initiatives.
