The Revolution Was Televised Dark Horse Comics

NATIONAL BEST SELLER • The basis for the HBO documentary now streaming on HBO Max For five years, James and Deborah Fallows have travelled across America in a single-engine prop airplane. Visiting dozens of towns, the America they saw is acutely conscious of its problems—from economic dislocation to the opioid scourge—but it is also crafting solutions, with a practical-minded determination at dramatic odds with the bitter paralysis of national politics. At times of dysfunction on a national level, reform possibilities have often arisen from the local level. The Fallowses describe America in the middle of one of these creative waves. Their view

of the country is as complex and contradictory as America itself, but it also reflects the energy, the generosity and compassion, the dreams, and the determination of many who are in the midst of making things better. Our Towns is the story of their journey—and an account of a country busy remaking itself.

Seven stunning stories of speculative fiction by the author of *A Boy and His Dog*. In a post-apocalyptic world, four men and one woman are all that remain of the human race, brought to near extinction by an artificial intelligence. Programmed to wage war on behalf of its creators, the AI became self-aware and turned against humanity. The five survivors are prisoners, kept alive and subjected to brutal torture by the hateful and sadistic machine in an endless cycle of violence. This story and six more groundbreaking and inventive tales that probe the depths of mortal experience prove why Grand Master of Science Fiction Harlan Ellison has earned the many accolades to his credit and remains one of the most original voices in American literature. *I Have No Mouth and I Must Scream* also includes "Big Sam Was My Friend," "Eyes of Dust," "World of the Myth," "Lonelyache," Hugo Award finalist "Delusion for a Dragon Slayer," and Hugo and Nebula Award finalist "Pretty Maggie Moneyeyes."

This book demonstrates how pop culture examples can be used to demystify complex social theory. It provides tangible, metaphorical examples that shows how it is possible to "do philosophy" rather than subscribe to a theorist by showing that each theorist intersects and overlaps with others. The book is embedded in the literary theory that tapping into background knowledge is a key step in helping people engage with new and difficult texts. It also acknowledges the important role of popular culture in developing comprehension. Using a choose your own adventure structure, this book not only shows students of social theory how various theories can be applied but also reveals the multitude of possible pathways theory provides for comprehending society.

We are the first generation to live in a science fiction world. Media headlines declare this the age of automation. The TV talks about the coming revolution of the robot, tweets tell tales of jets that will ferry travelers to the edge of space, and social media reports that the first human to live for a thousand years has already been born. The science we do, the movies we watch, and the culture we consume is the stuff of fiction that became fact, the future imagined in our past—the future we now inhabit. *The Science of Science Fiction* is the story of how science fiction shaped our world. No longer a subculture, science fiction has moved into the mainstream with the advent of the information age it helped realize. Explore how science fiction has driven science, with topics that include: *Guardians of the Galaxy: Is Space Full of Extraterrestrials?* *Jacking In: Will the Future Be Like Ready Player One?* *Mad Max: Is Society Running down into Chaos?* *The Internet: Will Humans Tire of Mere Reality?* *Blade Runner 2049: When Will We Engineer Human Lookalikes?* And many more! This book will open your eyes to the way science fiction helped us dream of things to come, forced us to explore the nature and limits of our own reality, and aided us in building the future we now inhabit.

Shaman and Kushtaka, both struck terror in the hearts of the Tlingit and Haida, for both possessed frightening supernatural powers. Among the Natives of the Pacific Northwest Coast, the shaman was honored as a person who could heal the body and spirit as well as see into the future. In his struggles to protect his people, he fought the kushtaka an evil spirit being who was half human and half land hotter for the souls of dying persons. Theirs was a battle between the forces of good and evil, and today it remains a cornerstone in Tlingit and Haida mythology. Mary Giraudo Beck provides a powerful mix of history, legend, and adventure to dramatize the values and traditions of Tlingit and Haida societies. The heroic and wondrous incidents in these stories transcend time and culture and, as tales of myth and magic, provide compelling reading for young and old alike.

The massive, multilayered city of Neopolis, built shortly after World War II, was designed as a home for the expanding population of science-heroes, heroines and villains that had ballooned into existence in the previous decade. In 1985 the city accepted jurisdiction by a police force covering many alternate Earths, headquartered on the world known as Grand Central. Our own outpost of this network, Precinct Ten (known affectionately as Top 10), recruits its

members from Neopolis and its environs, working much like Earth's other police precincts, with one major exception: Like the citizens of the city, the officers of Top 10 have the abilities needed to deal with Neopolis's exotic denizens. Rookie cop Robyn Slinger, alter ego "Toybox," hits the streets for the first time along with a colorful crew of fellow officers, each having the required training to deal with science-villains and super-crimes, as well as the common misdemeanors of city life. You'll never look at powers, or police work, the same way again! From Alan Moore, the writer of WATCHMEN and V FOR VENDETTA, and artists Gene Ha (JUSTICE LEAGUE) and Zander Cannon (Transformers), the Eisner award-winning series TOP 10 is collected here in its entirety!
