An album-by-album celebration of the life and music of Mac Miller through oral histories, intimate reflections, and critical examinations of his enduring work. "One of my most vivid memories of him is the way he would look at you while he was playing you a song. He tried to look you right in the eyes to see how you were feeling about it." —Will Kalson, friend and first manager Following Mac Miller's tragic passing in 2018, Donna-Claire Chesman dedicated a year to chronicling his work through the unique lens of her relationship to the music and Mac's singular relationship to his fans. Like many who'd been following him since he'd started releasing mixtapes at eighteen years old, she felt as if she'd come of age alongside the rapidly evolving artist, with his music being crucial to her personal development. "I want people to remember his humanity as they're listening to the music, to realize how much bravery and courage it takes to be that honest, be that self-aware, and be that real about things going on internally. He let us witness that entire journey. He never hid that." —Kehlani, friend and musician. The project evolved to include intimate interviews with many of Mac's closest friends and collaborators, from his Most Dope Family in Pittsburgh to the producers and musicians who assisted him in making his everlasting music, including Big Jerm, Rex Arrow, Wiz Khalifa, Benjy Grinberg, Just Blaze, Josh Berg, Syd, Thundercat, and more. These voices, along with the author's commentary, provide a vivid and poignant portrait of this astonishing artist—one who had just released a series of increasingly complex albums, demonstrating what a musical force he was and how heartbreaking it was to lose him. "As I'm reading the lyrics, it's crazy. It's him telling us that he hopes we can always respect him. I feel like this is a message from him, spiritually. A lot of the time, his music was like little letters and messages to his friends, family, and people he loved, to remind them of who he really was." —Quentin Cuff, best friend and tour manager

The number of eating disorders patients presenting with symptoms of self-harm is growing quickly, and yet there is surprisingly little known about this unique population. *Self-Harm Behavior and Eating Disorders* explores the prevalent but largely uncharted relationship between self-injury behaviors and eating disorders symptoms. In the first major book to focus on this area, a renowned group of international scholars and practitioners addresses the subject from a variety of theoretical and practical perspectives. The book is categorized into sections covering epidemiology, psychodynamics, assessment, and a final section covering potential treatment options, including dialectical behavioral therapy, cognitive therapy, interventions strategies, group therapy, and

pharmacological approaches. This unrivaled collection of case studies, theoretical exploration, and practical application forms a benchmark for the field, and offers a stepping-stone for new research and innovative treatment strategies. In an area with little available information, previously spread out among diffuse sources, this volume represents the state-of-the-field resource for anyone working with complex eating disorders patients.

The first biography of rapper Mac Miller, the Pittsburgh cult favorite-turned-rap superstar who touched the lives of millions before tragically passing away at the age of 26—now in paperback Malcolm James McCormick was born on January 19, 1992. He began making music at a young age and by 15 was already releasing mixtapes. One of the first true viral superstars, his early records earned him a rabid legion of die-hard fans—as well as a few noteworthy detractors. But despite his undeniable success, Miller was plagued by struggles with substance abuse and depression, both of which fueled his raw and genre-defying music, yet ultimately led to his demise. Through detailed reporting and interviews with dozens of Miller's confidants, Paul Cantor brings you to leafy Pittsburgh, seductive Los Angeles, and frenzied New York, where you will meet Miller's collaborators, producers, business partners, best friends, and even his roommates. Traveling deep into Miller's inner circle, behind the curtain, the velvet ropes, and studio doors, *Most Dope* tells the story of a passionate, gifted young man who achieved his life's ambition, only to be undone by his personal demons. *Most Dope* is part love letter, part cautionary tale, never shying away from the raw, visceral way Mac Miller lived his life. Praise for *Most Dope* "A tender, studious remembrance." —The New York Times Book Review "An insightful exploration of his life . . . painstakingly reported by Cantor, who interviewed more than 100 people during a three-year process." —USA Today "An inside look at Miller's life through the eyes of his friends and industry peers, tracking the musician's life journey as he quickly ascended the ranks." —Daily Beast

Most Americans were shocked when Anita Hill charged U.S. Supreme Court nominee Clarence Thomas with sexual harassment. Not surprisingly, the nation was divided on the Senate hearings on the matter—some believed Hill, others, Thomas. Perhaps the most important result of the hearings was to open the eyes of a majority of the public to the issue of sexual harassment and to begin a dialog on the issue. This work first defines sexual harassment, including operational, sociological and legal definitions, and then provides a history of the issue in the United States and a theoretical framework of why harassment occurs. This is followed by a look at the legal dimension of the problem, with a discussion of pertinent federal and state laws and Equal Employment Opportunity Commission (EEOC) decisions. The incidence and settings (e.g., workplace, housing, religious institutions) are next examined, followed by chapters on sexual harassment in the government, the military, and in education. The book concludes with discussions of strategies for the victims and for employers.
