Management and Program Weaknesses at the National Aeronautics and Space Administration and the National Science Foundation Springer Science & Business Media

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

United States Geological Survey Yearbook Stripe Press

This book gathers selected papers presented at the Inventive Communication and Computational Technologies Conference (ICICCT 2022), held on May 12-13, 2022, at Gnanamani College of Technology, Tamil Nadu, India. The book covers the topics such as Internet of Things, social networks, mobile communications, big data analytics, bio-inspired computing, and cloud computing. The book is exclusively intended for academics and practitioners working to resolve practical issues in this area.

An Elegant Puzzle Springer Nature

Higher education spaces are undergoing radical transformations in an attempt to respond to the needs of 21st-century learners and a renewed interest in collaboration that spans beyond the walls of departments, colleges, and libraries. *Cases on Higher Education Spaces: Innovation, Collaboration, and Technology* highlights key innovations and collaborative ventures in space design from across campuses and institutions. Including writing and communication centers, studios, libraries, digital media labs, learning commons, and academic learning spaces, this collection is ideally suited for university and professional administrators.

Hearings, Reports and Prints of the Senate Committee on Agriculture, Nutrition, and Forestry Springer Nature

The purpose of this workshop was to provide a general forum for distributed systems researchers. Special emphasis was placed on research activities in distributed operating systems and management of distributed systems. This volume includes a selection of the papers presented at the workshop. They focus on the illustration of existing concepts and solutions in distributed systems research and development, exemplified by case study analyses of various projects. The annex contains the position papers prepared for the panel discussions at the workshop.

Inventive Communication and Computational Technologies Database Systems For Advanced Applications '91 - Proceedings Of The 2nd International Symposium On Database Systems For Advanced Applications

This book comprises select proceedings of the 5th International Conference on Optical and Wireless Technologies (OWT 2021). The contents of this book focus on research carried out in optical communication, optoelectronics, optics, wireless communication, wireless networks, sensors, mobile communications, and antenna and wave propagation. The book also explores the combined use of

various optical and wireless technologies in next-generation applications and their latest developments in the applications such as photonics, high-speed communication systems and networks, visible light communication, nanophotonics, and wireless and MIMO systems. This book serves as a reference to scientists, academicians, engineers, and policy-makers interested in the field of optical and wireless technologies.

Data for Science and Technology Elsevier

This book presents case studies to analyse the relationship between sustainability – environmental, social, institutional and economic – and digital innovation. The respective contributions offer a contextualisation of the main present and future trends concerning these two elements, and present analyses from economic, technical, managerial, and social perspectives alike. The individual sections of the book focus on interactions between sustainability and digital innovation in existing organisations and highlight the new opportunities, challenges and threats that may emerge as a result. The contributions are mainly based on case studies and research conducted in Europe and Africa, with a few focusing on Southeast Asia and Central America, and were prepared by experts in the fields of Information Systems, Computer Science, Social Development, and Economics.

Data for Science and Technology covers the proceedings of the Seventh International CODATA Conference. This text is comprised of 133 chapters with a total of 180 papers from 400 hundred authors, which cover CODATA concerned with environmental and energy questions along with problems of data banking and telecommunications network operations. This book provides valuable assessment of data and points out alternatives, trends, and requirements for the future, such as production and use of data in pure applied sciences; data for the development of human settlements in a dynamic world; informatical analysis of scientific research activities; and data on our evolutionary heritage. Researchers from all scientific fields will find this book a great source reference material, since it presents research from various disciplines.

RDF Database Systems Springer Science & Business Media

RDF Database Systems is a cutting-edge guide that distills everything you need to know to effectively use or design an RDF database. This book starts with the basics of linked open data and covers the most recent research, practice, and technologies to help you leverage semantic technology. With an approach that combines technical detail with theoretical background, this book shows how to design and develop semantic web applications, data models, indexing and query processing solutions. Understand the Semantic Web, RDF, RDFS, SPARQL, and OWL within the context of relational database management and NoSQL systems Learn about the prevailing RDF triples solutions for both relational and non-relational databases, including column family, document, graph, and NoSQL Implement systems using RDF data with helpful guidelines and various storage

solutions for RDF Process SPARQL queries with detailed explanations of query optimization, query plans, caching, and more Evaluate which approaches and systems to use when developing Semantic Web applications with a helpful description of commercial and open-source systems

This book examines for the first time, the ways that in-memory computing is changing the way businesses are run. The authors describe techniques that allow analytical and transactional processing at the speed of thought and enable new ways of doing business.

Government Procurement and Contracting World Scientific

"A range of investigative, problem-solving articles pertaining to current developments in educational systems, this collection draws from faculty experiences gained while implementing and utilizing a combination of telecommunications and web-enabled technologies. Addressing trends and issues, and exploring the opportunities and problems confronting colleges and universities related to this relatively new practice, the articles present numerous academic perspectives and provide concepts for effectively utilizing and managing web-based education in a teaching environment. Proving recognizable competition to traditional university education, many public and private colleges and universities are facing the challenges and opportunities offered by this new technology-based concept. Discussing the successes and failures of the early adopters and including issues relating to peer-to-peer networks, e-course management, and MIS needs, this book attempts to move from questions concerning ""what"" to issues relating to ""how.""

The Facility Management Handbook Springer Nature

Advancements in technology are impacting many businesses and institutions, including libraries. As such, it is increasingly imperative to research purchasing methods to boost cost-effectiveness and efficiency. Library Technology Funding, Planning, and Deployment is an authoritative reference source for the latest research on the best methods of the purchase and implementation of various technology systems by libraries. Featuring extensive coverage across a range of relevant perspectives and topics, such as library systems management, Open Source software, and budget constraints, this book is ideally designed for academicians, researchers, practitioners and librarians seeking current research on library purchase and utilization of technology.

Hearings Before and Special Reports Made by Committee on Armed Services of the House of Representatives on Subjects Affecting the Naval and Military Establishments IGI Global

A human-centric guide to solving complex problems in engineering management, from sizing teams to handling technical debt. There's a saying that people don't leave companies, they leave managers. Management is a key part of any organization, yet the discipline is often self-taught and

unstructured. Getting to the good solutions for complex management challenges can make the difference between fulfillment and frustration for teams--and, ultimately, between the success and failure of companies. Will Larson's An Elegant Puzzle focuses on the particular challenges of engineering management--from sizing teams to handling technical debt to performing succession planning--and provides a path to the good solutions. Drawing from his experience at Digg, Uber, and Stripe, Larson has developed a thoughtful approach to engineering management for leaders of all levels at companies of all sizes. An Elegant Puzzle balances structured principles and human-centric thinking to help any leader create more effective and rewarding organizations for engineers to thrive in.

Web-Based Education Morgan Kaufmann

This book provides an authoritative overview of the global development of surgical paediatrics. Biographical accounts of key people who developed this relatively new specialty, many of whom are now household names, are presented. The compendium also acknowledges the enormous contribution of imaging (ultrasound/MRI and PET scans), minimal invasive surgery, and fetal surgery, as well as the role of related journals and associations, in the progress of surgical paediatrics. Many of the contributors have been instrumental to the development of surgical paediatrics in their respective countries, and have considerable worldwide influence on the management of children requiring surgical care. Through their valuable insight and first-hand experience, this book not only shines a light on the past achievements of previous generations of paediatric surgeons, but also serves as a model to encourage future generations to do likewise.

Based on best practices and proven research, The Facility Management Handbook has long been the go-to resource for professionals in the field. Extensively updated for the realities of today's workplace, the third edition provides readers with the tools and guidance they need to wipe out inefficiency and create a productive facility that integrates people, place, and process. Covering a broad range of topics from space planning and maintenance to benchmarking and outsourcing, readers will gain practical insight into how they can:

- design, construct and maintain facilities using sustainable practices
- provide a safe, attractive work environment that supports productivity
- ensure that facility plans match organizational needs
- plan and control capital expenditures
- address critical security and emergency preparedness issues

Complete with case studies and indispensable information on sustainability and post-9/11 security concerns, this is still the ultimate resource for facility managers.
