WINNER • A dramatic expansion of a groundbreaking work of

journalism, *The 1619 Project: A New Origin Story* offers a

profoundly revealing vision of the American past and present.

FINALIST FOR THE KIRKUS PRIZE • ONE OF THE BEST BOOKS OF

THE YEAR: *The Washington Post*, *NPR*, *Esquire*, *Marie Claire*,

Electric Lit, *Ms. magazine*, *Kirkus Reviews*, *Booklist* In late August

1619, a ship arrived in the British colony of Virginia bearing a

cargo of twenty to thirty enslaved people from Africa. Their arrival

led to the barbaric and unprecedented system of American

chattel slavery that would last for the next 250 years. This is

sometimes referred to as the country's original sin, but it is more

than that: It is the source of so much that still defines the United

States. *The New York Times Magazine's* award-winning 1619

Project issue reframed our understanding of American history by

placing slavery and its continuing legacy at the center of our

national narrative. This book substantially expands on that work,

weaving together eighteen essays that explore the legacy of

slavery in present-day America with thirty-six poems and works of

fiction that illuminate key moments of oppression, struggle, and

resistance. The essays show how the inheritance of 1619 reaches

into every part of contemporary American society, from politics,

music, diet, traffic, and citizenship to capitalism, religion, and our

democracy itself. This book that speaks directly to our current

moment, contextualizing the systems of race and caste within

which we operate today. It reveals long-glossed-over truths

around our nation's founding and construction—and the way that

the legacy of slavery did not end with emancipation, but

continues to shape contemporary American life. Augie's Quest Legare Street Press

What happens to "orphan" diseases that aren't big enough profit centers for the pharmaceutical industry or get caught in the web of government funding and academic research? Augie Nieto found out in the spring of 2005: At forty-seven years old he was diagnosed with ALS. Devastated, Augie struggled with depression and attempted suicide. When he awoke from a coma, with friends and family surrounding him, his sense of faith and mission were renewed. Fast-forward one year: Augie and his wife, Lynne, were profiled as "Real Heroes" on the Today show. Their determination to beat the disease had already led to major overhauls in the way ALS research was conducted. In partnership with the Muscular Dystrophy Association, Augie had set up a foundation and lab to coordinate and oversee ALS research and testing across the globe. By centralizing operations and championing an entrepreneurial approach to medical research, Augie and his team accomplished remarkable results in less than two years. Part inspiration, part business innovation, *Augie's Quest* illustrates how one person can make a meaningful difference. Praise for Augie Nieto: George H. W. Bush, former U.S. president: "Your contributions to the fitness industry are well known, and your dedication an inspiration." Lance Armstrong, seven-time "Le Tour

de France" champion: "I think it says a lot about Augie, the fact that everybody came together regardless of whether or not it's for competing gyms or competing companies that make equipment. They all say, this is one of our own; this is a guy who's committed his life to our industry and has been dealt a serious blow. We're going to be there for him, we're going to say, we're here for you and we're part of the Quest." Arnold Schwarzenegger, governor of California: "Your success has been incredible. But you are so much more than just a successful businessman. You are the greatest husband, a great father, and a terrific friend. #1 NEW YORK TIMES BESTSELLER • Experience the book that started the Quiet Movement and revolutionized how the world sees introverts—and how introverts see themselves—by offering validation, inclusion, and inspiration “Superbly researched, deeply insightful, and a fascinating read, *Quiet* is an indispensable resource for anyone who wants to understand the gifts of the introverted half of the population.”—Gretchen Rubin, author of *The Happiness Project* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY People • O: The Oprah Magazine • Christian Science Monitor • Inc. • Library Journal • Kirkus Reviews At least one-third of the people we know are introverts. They are the ones who prefer listening to speaking; who innovate and create but dislike self-promotion; who favor working on their own over working in teams. It is to introverts—Rosa Parks, Chopin, Dr. Seuss, Steve Wozniak—that we owe many of the great contributions to society. In *Quiet*, Susan Cain argues that we dramatically undervalue introverts and shows how much we lose in doing so. She charts

the rise of the Extrovert Ideal throughout the twentieth century and explores how deeply it has come to permeate our culture. She also introduces us to successful introverts—from a witty, high-octane public speaker who recharges in solitude after his talks, to a record-breaking salesman who quietly taps into the power of questions. Passionately argued, impeccably researched, and filled with indelible stories of real people, *Quiet* has the power to permanently change how we see introverts and, equally important, how they see themselves. The Rise and Fall of COMSAT Random House Books for Young Readers

A verbal articulation of the authors' visionary theory of how the human body, architecture, and creativity define and sustain one another This revolutionary work by artist-architects Arakawa and Madeline Gins demonstrates the inter-connectedness of innovative architectural design, the poetic process, and philosophical inquiry. Together, they have created an experimental and widely admired body of work--museum installations, landscape and park commissions, home and office

designs, avant-garde films, poetry collections--that challenges traditional notions about the built environment. This book promotes a deliberate use of architecture and design in dealing with the blight of the human condition; it recommends that people seek architectural and aesthetic solutions to the dilemma of mortality. In 1997 the Guggenheim Museum presented an Arakawa/Gins retrospective and published a comprehensive volume of their work titled *Reversible Destiny: We Have Decided Not to Die*. *Architectural Body* continues the philosophical definition of that project and demands a fundamental rethinking of the terms “human” and “being.” When organisms assume full responsibility for inventing themselves, where they live and how they live will merge. The artists believe that a thorough re-visioning of architecture will redefine life and its limitations and render death passe. The authors explain that “Another way to read reversible destiny . . . Is as an open challenge to our species to reinvent itself and to desist from foreclosing on any possibility.” Audacious and liberating, this volume will be of interest to students and scholars of 20th-century poetry, postmodern critical theory, conceptual art and architecture, contemporary avant-garde poetics, and to serious readers interested in architecture's influence on imaginative expression.

London's Urban Landscape is the first major study of a global city to adopt a materialist perspective and stress the significance of place and the built environment to the urban landscape. Edited by Christopher Tilley, the volume is inspired by phenomenological thinking and presents fine-grained ethnographies of the practices of everyday life in London. In doing so, it charts a unique perspective on the city that integrates ethnographies of daily life with an analysis of material culture. The first part of the volume considers the residential sphere of urban life, discussing in detailed case studies ordinary residential streets, housing estates, suburbia and London's mobile 'linear village' of houseboats. The second part analyses the public sphere, including ethnographies of markets, a park, the social rhythms of a taxi rank, and graffiti and street art. London's Urban Landscape returns us to the

everyday lives of people and the manner in which they understand their lives. The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places, and the paths of movement between them. What stories do door bells and house facades tell us about contemporary life in a Victorian terrace? How do antiques acquire value and significance in a market? How does living in a concrete megastructure relate to the lives of the people who dwell there? These and a host of other questions are addressed in this fascinating book that will appeal widely to all readers interested in London or contemporary urban life.
