comprehensive reference on clinical management of reproductive system cancers in women. Twenty nationally recognized leaders in the field of Gynecologic Oncology present cases--from diagnosis through medical/surgical treatment through QOL and long-term care--that reflect the clinical scenarios often found in a Gynecologic Oncology clinic, and

present the best current guidelines for treating these conditions. Special Editors' Comments provide expert analysis and counterpoint to the cases. **Character Education in Ohio** Springer Our public schools are in trouble. Not only have our teachers and students been overwhelmed by three decades of sweeping education reforms, but the long-standing relationship between the public and its

public schools is hanging by a thread. *Cleaning Up the Mess from Sacred Cows: A Strategy to Take Back Our Public Schools* exposes the root of the problem as misguided conventional wisdom which, until now, has been immune from criticism. In Ohio, a grassroots movement challenging this sacred-cow thinking is serving as an important source of learning for the rest of the country. The Parliamentary

Stories of Jewish Dayton
 John Wiley & Sons
 Since Antioch's reorganization in the early 1920s the event has been heralded as a wonder of academic innovation and generally credited to the work of one man, Arthur Morgan. This book examines the politics of educational innovation as

represented by that reorganization . Connected Thoughts draws on a large number of sources to redefine Antioch College's reorganization . In doing this the author links the event to the numerous institutions, organizations and individuals who helped define the event, showing that the reorganization was neither a remarkable educational innovation nor the work of

one man, but rather required the efforts of a number of individuals whose work was in many ways in harmony with both the traditions of the institution and the larger educational community. This is an illuminating study of institutional renewal and reorganization .

Taylor & Francis

"Life Is Bottled Sunshine" [Wynwood Reade, *Martyrdom of Man*, 1924]. This inspired phrase is a four-word summary of the significance of photosynthesis for life on earth. The study of photosynthesis has attracted the attention of a legion of biologists, biochemists, chemists and physicists for over 200 years. Discoveries in Photosynthesis presents a sweeping overview of

the history of photosynthesis investigations, and detailed accounts of research progress in all aspects of the most complex bioenergetic process in living organisms. Conceived of as a way of summarizing the history of research advances in photosynthesis as of millennium 2000, the book evolved into a majestic and encyclopedic saga involving all of the basic sciences. The book contains

111 papers, authored by 132 scientists from 19 countries. It includes overviews; timelines; tributes; minireviews on excitation energy transfer, reaction centers, oxygen evolution, light-harvesting and pigment-protein complexes, electron transport and ATP synthesis, techniques and applications, biogenesis and membrane architecture,

reductive and assimilatory processes, transport, regulation and adaptation, Genetics, and Evolution; laboratories and national perspectives; and retrospectives that end in a list of photosynthesis symposia, books and conferences. Informal and formal photographs of scientists make it a wonderful book to have. This book is meant not only for the researchers and graduate students, but

also for advanced undergraduates in Plant Biology, Microbiology, Cell Biology, Biochemistry, Biophysics and History of Science.

Why Public Schools?

Whose Public Schools?

Jones & Bartlett Learning
Community Educators: A Resource for Educating and Developing Our Youth asserts that the relationships between education, community, and

democracy are inseparable and illustrates that education is broader than just schooling. Harbour challenges current thinking about education and reveals how the public participates in the education and development of youth. This book is a call for action and responsibility-- both individual and collective--to transform education beyond simply reforming schools. The author's professional

educational experiences, combined with stories from the field by and about youth and community educators, exemplify the importance of citizen collaboration among the various sectors of the community, including youth, parents, schools, businesses, and neighborhood residents. The book includes a foreword by Kettering Foundation president David Mathews.

Many stories of Jewish Dayton's past have faded over time. Others, painful to recall, may have been intentionally buried. All are

sure to surprise new generations. The Jews of Dayton drank wine during Prohibition, debated Zionism, fought the Klan and joined the battle for civil rights in the trenches. Balancing tradition and modernity across eras, they navigated the American dream and faced challenges often strikingly similar to those we face today. Marshall Weiss--

founding editor and publisher of the Dayton Jewish Observer and project director of Miami Valley Jewish Genealogy & History-- reaches back nearly two centuries to unearth forgotten episodes of Jewish life in Ohio's Miami Valley. PreTest is the closest you can get to seeing the USMLE Step 1 without actually taking it! 500 clinical-vignette style questions and answers! "I liked this book. I feel that I would have benefited from using it during my own Step 1 study time." -- Russel Kahmke, Third Year Medical Student, SUNY Upstate Medical University "I found the questions included in this book to extremely well written. They

covered the high yield material of each subject, and will help students better prepare for the Step 1 exam." -- Jodie Bachman, Third Year Medical Student, UMDNJ School of Osteopathic Medicine "...this review brings with it much experience in preparing medical students for board examinations. Over the last 35 years, it has been a popular study aid and will likely continue to assist the

next generation of physicians as they navigate through board examinations. 3 Stars."-- Doody's Review Service Great for course review and the USMLE Step 1, PreTest asks the right questions so you'll know the right answers. You'll find 500 clinical-vignette style questions and answers along with complete explanations of correct and incorrect answers. The content has been reviewed

by students who recently passed their exams, so you know you are studying the most relevant and up-to-date material possible. No other study guide targets what you really need to know in order to pass like PreTest! Content that covers all the must-know topics: High Yield Facts, Physiology and Molecular Microbiology, Virology, Bacteriology, Rickettsiae, Chlamydiae, Mycoplasmas, Mycology, Parasitology,

Colleges in the Midwest
 Examines Office of Education administration of grant programs, particularly those in support of supplementary education centers and services authorized by Elementary and Secondary Education Act of 1965. Focuses on series of conferences cosponsored in Hawaii by the Kettering Foundation and the Office of Education, and

Westinghouse Learning Corp.'s planned construction of a computerized classroom for a Menominee Indian community in Shawano, Wis.
A Study of Innovation and Change in Education: the Regional University-schools Research and Development Program
 Leading for Learning
 Written by acclaimed school reform advocate Phillip C. Schlechty,
 Leading for

Learning offers educators the framework, tools, and processes they need to transform their schools from bureaucracies into dynamic learning organizations. Schlechty explains how to move beyond some of the deeply ingrained and negative conceptions of schooling that guide so much of their practice. He shows educators how they can take advantage of new learning technologies

by increasing their organization's capacity to support continuous innovation. "Clearly not for the fainthearted, Schlechty's engrossing appraisal of American education calls for a bold, truly fundamental transformation of how we run our public schools. Some books are thought-provoking; this one is action-provoking."
—W. JAMES POPHAM, professor emeritus,

UCLA "Dr. Schlechty has once again written an insightful book that educational leaders can use as a road map in transforming our schools into learning organizations designed to serve twenty-first century students."
—DR. RANDY BRIDGES, superintendent, Alamance-Burlington School System, NC
"Because education is ultimately a community responsibility, Schlechty's proposal to

shift school systems from bureaucracies to learning organizations can open doors to citizens who are frustrated by the bureaucracy in their efforts to reclaim their role in education. This book is as much for them as it is for professional educators."
—DAVID MATHEWS, president, Kettering Foundation
"Anyone in a school leadership position—from the board room to the classroom—sh

ould read this engaging and thought-provoking book. It's a must-read for all immersed in or contemplating the transformation of public education."

—CLAUDIA MANSFIELD SUTTON, chief communications and marketing officer, American Association of School Administrators

 Gunther, McGowan and Donegan draw on their own experiences and those of others in the

field, to explain the importance of communication in school leadership. In focusing on the communication process—why it's critical for schools, and how it can be executed well—they make the case that communication must be a primary emphasis for leaders, not an afterthought. In *Strategic Communications for School Leaders*, the authors provide the insights and

skills necessary for understanding the role of communication in educational leadership. They also lay the foundation for helping leaders-and those that aspire to be-create and execute communication plans that help to win the trust of an increasingly skeptical public and provide a means to advocate for	schools' appropriate share of scarce resources. Topics addressed in the book include the following: understanding the audiences and their information channels; aligning the school leaders' messages with their educational goals and values; telling stories and using illustrative	examples; delivering honest and credible messages (including admitting mistakes); using technology intelligently and appropriately; and creating and adhering to a communications plan. <u>Strategic Communications for School Leaders</u> <u>Leading for Learning</u> <u>Community Educators</u>
