Jill Winger, creator of the award-winning blog *The Prairie Homestead*, introduces her debut *The Prairie Homestead Cookbook*, including 100+ delicious, wholesome recipes made with fresh ingredients to bring the flavors and spirit of homestead cooking to any kitchen table. With a foreword by bestselling author Joel Salatin *The Pioneer Woman Cooks* meets *100 Days of Real Food*, on the Wyoming prairie. While Jill produces much of her own food on her Wyoming ranch, you don't have to grow all—or even any—of your own food to cook and eat like a homesteader. Jill teaches people how to make delicious traditional American comfort food recipes with whole ingredients and shows that you don't have to use obscure items to enjoy this lifestyle. And as a busy mother of three, Jill knows how to make recipes

easy and delicious for all ages. "Jill takes you on an insightful and delicious journey of becoming a homesteader. This book is packed with so much easy to follow, practical, hands-on information about steps you can take towards integrating homesteading into your life. It is packed full of exciting and mouth-watering recipes and heartwarming stories of her unique adventure into homesteading. These recipes are ones I know I will be using regularly in my kitchen." - Eve Kilcher These 109 recipes include her family's favorites, with maple-glazed pork chops, butternut Alfredo pasta, and browned butter skillet corn. Jill also shares 17 bonus recipes for homemade sauces, salt rubs, sour cream, and the like—staples that many people are surprised to learn you can make yourself. Beyond these recipes, *The Prairie Homestead Cookbook* shares the tools and tips Jill has learned from life on the homestead, like how to churn your own butter, feed a family on a budget, and experience all the fulfilling satisfaction of a DIY lifestyle.

Household water treatment (HWT) is increasingly being promoted as a rapidly implementable and cost-effective interim approach to improve water quality. It is a key preventive component of the WHO/UNICEF comprehensive strategy on diarrhoea control. This book, for the first time, sets forth global criteria that enables users to evaluate whether an HWT option reduces waterborne pathogens sufficiently to protect health. Through use of a risk-based framework and by emphasizing the philosophy of incremental improvement, it is intended to provide implementers and policy-makers with an evidence-based and pragmatic approach to select options suited to local conditions. This book provides a range of technical recommendations, including: \* A step-by-step overview of how to evaluate HWT microbiological performance \* Elaboration of health-based water quality targets ranging from interim to highly protective, including establishment of default targets for use in data-scarce settings \* Description of technology-specific laboratory testing protocols and guiding principles \* Considerations relating to developing national technology evaluation programs. This book is especially intended for resource-scarce settings where water quality laboratories may have limited capacity and incremental improvements of HWT performance could have a substantial, positive impact on public health.

Situates the linkage between race and the death penalty in the history of the U.S. Since 1976, over forty percent of prisoners executed in American jails have been African American or Hispanic. This trend shows little evidence of diminishing, and follows a larger pattern of the violent criminalization of African American populations that has marked the country's history of punishment. In a bold attempt to tackle the looming question of how and why the connection between race and the death penalty has been so strong throughout American history, Ogletree and

Sarat headline an interdisciplinary cast of experts in reflecting on this disturbing issue. Insightful original essays approach the topic from legal, historical, cultural, and social science perspectives to show the ways that the death penalty is racialized, the places in the death penalty process where race makes a difference, and the ways that meanings of race in the United States are constructed in and through our practices of capital punishment. From *Lynch Mobs to the Killing State* not only uncovers the ways that race influences capital punishment, but also attempts to situate the linkage between race and the death penalty in the history of this country, in particular the history of lynching. In its probing examination of how and why the connection between race and the death penalty has been so strong throughout American history, this book forces us to consider how the death penalty gives meaning to race as well as why the racialization of the death penalty is uniquely American.

"The report, 'Make It Safe: Canada's Obligation to End the First Nations Water Crisis,' documents the impacts of serious and prolonged drinking water and sanitation problems for thousands of indigenous people--known as "First Nations"--living on reserves. It assesses why there are problems with safe water and sanitation on reserves, including a lack of binding water quality regulations, erratic and insufficient funding, faulty or sub-standard infrastructure, and degraded source waters. The federal government's own audits over two decades show a pattern of overpromising and underperforming on water and sanitation for reserves"--Publisher's description.
