BARTLETT JAYLA

The Three Strangers The Floating Press

In three previous books, through a selection of prose poems, the author shared bits and pieces of a life, one comprised of complete abandonment by a mother and the disconnected roles played by extended family members, a life that eventually led to being placed in foster care. Now, for the first time, with *In the Care of Strangers*, he tells the entire story of what such a life was actually like. In this five-part memoir, dependent on the seven deadly sins, the author tries to reconstruct a painful journey of coming of age under the literal care of strangers and the individuals that made up the foster homes and hospitals that would help to shape a young man's life, certainly a difficult life, riddled with abuse from the start (Malice) and ending with greed and envy in a fourth and final home. He finds and develops pride in himself while recuperating from a paralysis. How this young man attempts to survive the experiences of foster care while also having to contend with a disability, and still managing to try to simply achieve graduation from high school, with a goal

toward college, is a testament to a human spirit beyond measure. This riveting story, told through an innocent, almost childlike voice of a boy shocked into care, then as an older man who has come to terms with his situation (The Unclaimed), and finally through the poetry, should be taken as an inspiration for many.

The Municipal Government of the Ancient Borough of Lyme Regis Simon and Schuster Scholar and travel writer Lafcadio Hearn spent decades in Japan, eventually adopting it as his home country. Perhaps more than any other single writer, Hearn is responsible for documenting and interpreting Japan for Western audiences. In this engrossing volume, Hearn undertakes his most comprehensive comparative analysis of Japanese culture.

Sean O Riada (1931-1971) was a major factor in the rise of Irish traditional music in the second half of the twentieth century. He is one of Ireland's most fascinating and significant characters--composer, musician (jazz, classical, and traditional), director of music for the Abbey Theatre, raconteur, film-maker, and academic--and the man most influential in changing the direction, and popularity, of traditional music that set the stage for the success of bands like The Chieftains and

Planxty. In this wide-ranging account of his life and work a friend and colleague looks behind the mask O Riada held up to the world and reveals the complex personality of a unique individual, the first composer of modern Ireland.

At forty-three, Jay McGhee doesn't know how much longer he'll be able to withstand the physical rigors necessary for active duty in the Roseville, Indiana Fire Department, but that doesn't mean he's willing to be put out to pasture just yet. For most of his adult life, he's had to place his needs on the back burner, including the fact that he's a gay man in a small rural community. His career is not going to take the same route. When twenty-seven-year-old Frank Kaplan breezes into town, Jay ignores his immediate attraction to the younger man. After all, he's an old pro at pretending. The long-haired, tattooed drifter shouldn't even be his type, but the friendship they strike up satisfies a space in Jay's life he never realized was empty. Two men. Two lives in flux. No regrets. In *Strangers in Their Own Land*, the renowned sociologist Arlie Hochschild embarks on a thought-provoking journey from her liberal hometown of Berkeley, California, deep into Louisiana bayou

country—a stronghold of the conservative right. As she gets to know people who strongly oppose many of the ideas she famously champions, Hochschild nevertheless finds common ground and quickly warms to the people she meets—among them a Tea Party activist whose town has been swallowed by a sinkhole caused by a drilling accident—people whose concerns are actually ones that all Americans share: the desire for community, the embrace of family, and hopes for their children. *Strangers in Their Own Land* goes beyond the commonplace liberal idea that these are people who have been duped into voting against their own interests. Instead, Hochschild finds lives ripped apart by stagnant wages, a loss of home, an elusive American dream—and political choices and views that make sense in the context of their lives. Hochschild draws on her expert knowledge of the sociology of emotion to help us understand what it feels like to live in "red" America. Along the way she finds answers to one of the crucial questions of contemporary American politics: why do the people who would seem to benefit most from "liberal" government intervention abhor the very idea?

A “meticulously researched and buoyantly written” (Esquire) look at what happens when we talk to strangers, and why it affects everything from our own health and well-being to the rise and fall of nations in the tradition of Susan Cain’s *Quiet* and Yuval Noah Harari’s *Sapiens* “This lively, searching work makes the case that welcoming ‘others’ isn’t just the bedrock of civilization, it’s the surest path to the best of what life has to offer.”—Ayad Akhtar, Pulitzer Prize-winning author of *Homeland Elegies* In our cities, we stand in silence at the pharmacy and in check-out lines at the grocery store, distracted by our phones, barely acknowledging one another, even as rates of loneliness skyrocket. Online, we retreat into ideological silos reinforced by algorithms designed to serve us only familiar ideas and like-minded users. In our politics, we are increasingly consumed by a fear of people we’ve never met. But what if strangers—so often blamed for our most pressing political, social, and personal problems—are actually the solution? In *The Power of Strangers*, Joe Keohane sets out on a journey to discover what happens when we bridge the distance between us and people we don’t know. He learns that while we’re wired to sometimes fear, distrust, and even hate strangers, people and societies that have learned to connect with strangers benefit immensely. Digging into a growing body of cutting-edge research on the surprising social and psychological benefits that come from talking to strangers, Keohane finds that even passing interactions can enhance empathy, happiness, and cognitive development, ease loneliness and isolation, and root us in the world, deepening our sense of belonging. And all the while, Keohane gathers practical tips from experts on how to talk to strangers, and tries them out himself in the wild, to awkward, entertaining, and frequently poignant effect. Warm, witty, erudite, and profound, equal parts sweeping history and self-help journey, this deeply researched book will inspire readers to see everything—from major geopolitical shifts to trips to the corner store—in an entirely new light, showing them that talking to strangers isn’t just a way to live; it’s a way to survive.

Malcolm Gladwell, host of the podcast *Revisionist History* and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn’t true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don’t know. And because we don’t know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

Using popular literature as a window on Italian society and its values, Lynn Gunzberg explores the representation of Jews in novels and poetry written by non-Jews from the beginning of the Risorgimento in the early 1800s to the enactment of the Fascist racial laws in 1938. She shows how the literature of that period contradicts the popular belief that anti-Semitism simply did not exist in Italy until late in the Fascist period.

Interfaith marriage is a visible and often controversial part of American life—and one with a significant history. This is the first historical study of religious diversity in the home. Anne Rose draws a vivid picture of interfaith marriages over the century before World War I, their problems and their social consequences. She shows how mixed-faith families became agents of change in a culture moving toward pluralism. Following them over several generations, Rose tracks the experiences of twenty-six interfaith families who recorded their thoughts and feelings in letters, journals, and memoirs. She examines the decisions husbands and wives made about religious commitment, their relationships with the extended families on both sides, and their convictions. These couples—who came from strong Protestant, Catholic, and Jewish backgrounds—did not turn away from religion but made personalized adjustments in religious observance. Increasingly, the author notes, women took charge of religion in the home. Rose’s family-centered look at private religious decisions and practice gives new insight on American society in a period when it was becoming more open, more diverse, and less community-bound.

Exploring power and participation in a connected world. Social media are all around us. For many, they are the first things to look at upon waking and the last thing to do before sleeping. Integrated seamlessly into our private and public lives, they entertain, inform, connect (and sometimes disconnect) us. They’re more than just social though. In addition to our experiences as everyday users, understanding social media also means asking questions about our society, our culture and our economy. What we find is dense connections between platform infrastructures and our experience of the social, shaped by power, shifting patterns of participation, and a widening ideology of connection. This book introduces and examines the full scope of social media. From the social to the technological, from the everyday to platform industries, from the personal to the political. It brings together the key concepts, theories and research necessary for making sense of the meanings and consequences of social media, both hopefully and critically. Dr Zoetanya Sujon is a Senior Lecturer and Programme Director for Communications and Media at London College of Communication, University of the Arts London.

The Man and Humaneness

Varieties of Secularism is an ethnographically rich, theoretically well-informed, and intellectually coherent volume which builds off the work of Talal Asad, Charles Taylor, and others who have engaged the issue of secularism(s) and in socio-political life. The volume seeks to examine theories of secularism/secularity and examine concrete ethnographic cases in order to further the theoretical discussion. Whereas Taylor’s magisterial work draws up the conditions and problems of a belief in God in Western modernity, it leaves unexplored the challenges posed by the spiritual in modernity outside of the North Atlantic rim. This anthology seeks to begin that task. It does so by suggesting that the kind of secularity described by Taylor is only one amongst others. By attending to the shifting relationship between proper religion and ‘bad faiths’; between politically valorised and embarrassing spiritual phenomena; between the new visibilities and silences of magic, ancestors, and religion in democratic politics, this book seeks to outline the particular formations of secularism that have become possible in Asia from China to Indonesia and from Bahrain to Timor-Leste. This book will appeal to students and scholars of Asian religion, politics and anthropology.
