Tired, stressed, and in need of more help from your partner? Imagine running your household (and life!) in a new way... It started with the Sh*t I Do List. Tired of being the “shefault” parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is Fair Play: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of

life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, Fair Play helps you prioritize what's important to your family and who should take the lead on every chore, from laundry to homework to dinner. “Winning” this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in. This book presents a comprehensive approach to treating dysphagia that has been successfully applied in actual rehabilitation settings. Its

main purposes are firstly to equip readers with a strong conceptual understanding of swallowing evaluation and treatment, secondly to provide guidance on the procedure of practical comprehensive dysphagia rehabilitation in real-world settings, and thirdly to update readers on the latest diagnostic and treatment technologies. To do so, it employs the concept of swallowing rehabilitation pioneered at Fujita Health University Rehabilitation. The book is divided into 4 major sections, the first of which introduces readers to the general aspects and the principle of deglutition. In turn, Part II offers clinical approaches to both non-instrumental and instrumental evaluation of swallowing. Part III addresses treatment options in swallowing rehabilitation, especially exercises based on motor learning. Lastly, Part IV highlights three clinical cases demonstrating clinical approaches in dysphagic patients. Readers will find this text useful both as an initial guide and a reference work for assisting clinicians, allowing them to further expand swallowing assessment and treatment, and

facilitating the
development of

swallowing rehabilitation
in real-world settings in

education and
rehabilitation.
