### World History: The Basics

Princeton Review

Presents a history of the world from the ancient civilizations of the Middle and Far East to the modern world of the late twentieth century.

Includes maps and illustrations.

*History at the Limit of World-History* Columbia University Press

[This book] brings the history of the world to life. Coverage of the main themes and

developments of world history, a special emphasis on the experiences of ordinary people ... integrated coverage of women's history [and] non-Western world ... make this book ... interesting ... -Back cover.

The authors of this book believe the study of world history in a broad and comparative context is an exciting, important, and highly practical pursuit....

[The authors] study all geographical areas and the world's main civilizations, conscious of their separate identities and unique contributions. [They] also stress the links among civilizations,

for it is these links that have been transforming multicentered world history into the complex

interactive process of different continents, peoples, and cultures that we see today. -Pref.

### A Child's History of the World Routledge

Is the history of the modern world the history of Europe writ large? Or is it possible to situate the history of modernity as a world historical process apart from its origins in Western Europe? In this posthumous collection of essays, Marshall G. S.

Hodgson challenges adherents of both Eurocentrism and

multiculturalism to rethink the place of Europe in world history. He argues

that the line that connects Ancient Greeks to the Renaissance to modern

times is an optical illusion, and that a global and Asia-centred history can

better locate the European experience in the shared histories of

humanity. Hodgson then shifts the historical focus and in a parallel move

seeks to locate the history of Islamic civilisation in a world historical

framework. In so doing he concludes that there is but one history - global

history - and that all partial or privileged accounts must necessarily

be resituated in a world historical context. The book also includes an

introduction by the editor, Edmund Burke, contextualising Hodgson's work in world history and Islamic history.

*Science and Technology in World History* Houghton Mifflin

This volume presents the thinking and the activities of some of the most serious and successful practitioners of world history. The 15 contributors are experienced historians from ten countries dispersed across five continents. Their essays confirm the existence of an emerging worldwide discourse on the past of our planet, but they also reveal the distinctive conditions and local innovations of global historians in different parts of the world. They give particular attention to the emergence of formal institutions for study of world history. University departments, research institutions, international conferences, and the leaders of museums are now

demonstrably involved in full-scale study of the human past at a global level. Work in these institutions will surely reveal new patterns, dispel some old beliefs, provoke debates, and demonstrate the need for still more research. The book begins with the official report of the 2006 World History Research Agenda Symposium. This unusual conference, held in Boston, launched the formal discussion of priorities in world history research. In seven further chapters, the authors describe university-level study of the world at undergraduate and especially graduate levels, conveying some remarkable advances in conceptualization of the global past and explaining the curricula they have implemented for directing students in world historical research. The final four chapters turn to the other institutions that support the development of advanced studies in world history: journals, museums, and research institutes. Here the authors document the organizational innovations that have brought discussion of world history issues to wider audiences. This is the second volume in the series on research

in world history, produced by the World History Network, Inc. The previous volume, *World History: Global and Local Interactions* (Markus Wiener, 2005) displayed the accomplishments of Ph.D. students and graduates whose research focuses on topics in world history.

It's the revolutionary world history study guide just for middle school students from the brains behind Brain Quest. *Everything You Need to Ace World History . . .* kicks off with the Paleolithic Era and transports the reader to ancient civilizations—from Africa and beyond; the middle ages across the world; the Renaissance; the age of exploration and colonialism, revolutions, and the modern world and the wars and movements that shaped it. The BIG FAT NOTEBOOK™ series is built on a simple and irresistible conceit—borrowing the notes from the smartest kid in class. There are five books in all, and each is the only one book you need for each main subject taught in middle school: Math, Science, American History, English, and World History. Inside

the reader will find every subject's key concepts, easily digested and summarized: Critical ideas highlighted in marker colors. Definitions explained. Doodles that illuminate tricky concepts. Mnemonics for a memorable shortcut. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and state history standards, and are vetted by National and State Teacher of the Year Award-winning teachers. They make learning fun, and are the perfect next step for every kid who grew up on Brain Quest. **AP® World History Crash Course Book + Online** Research & Education Assoc. This book represents the proceedings of an international conference convened by the Department of Humanities at Qatar University, Doha, in March 2012. Its theme was "Interdisciplinarity in History: An Old Method in New World Context." Twelve out of the fifty papers presented at the conference have been thoroughly reviewed and revised and compiled in this volume. The contributions here show that interdisciplinary in

history has become a key term for professional historians who reject the professional identity of history based on its claimed autonomy and the distinctiveness of its research methods, and argue that this claim has seriously narrowed the intellectual horizons of the discipline in terms of both teaching and research. The chapters also stress that historical research should not be confined to political events as it was by ancient historians, but, rather, be open to other complex issues which require thorough investigation and collaboration between history and other disciplines. In this sense, interdisciplinarity in history is a process of answering questions, solving problems, or examining topics that are too broad or multifaceted to be tackled adequately by history as a discipline on its own. Therefore, history "should not be regarded as a stationary subject," as Robinson wrote, but as a discipline that would transcend the limitations formerly imposed upon the study of the past, and integrate with other social science disciplines to widen its methodological scope and investigate many issues

that had previously ignored or marginalized. Course of Study: World History Center for the Study of Synchronoptical World History

*The Historians' History of the World* New Leaf Publishing Group

The first comprehensive overview of the innovative new discipline of global history Until very recently, historians have looked at the past with the tools of the nineteenth century. But globalization has fundamentally altered our ways of knowing, and it is no longer possible to study nations in isolation or to understand world history as emanating from the West. This book reveals why the discipline of global history has emerged as the most dynamic and innovative field in history—one that takes the connectedness of the world as its point of departure, and that poses a fundamental challenge to the premises and methods of history as we know it. *What Is Global History?* provides a comprehensive overview of this exciting new approach to history. The book addresses some of the biggest questions the discipline will face in the twenty-first century: How does global history differ from other interpretations of world history? How do we write a global history

that is not Eurocentric yet does not fall into the trap of creating new centrism? How can historians compare different societies and establish compatibility across space? What are the politics of global history? This in-depth and accessible book also explores the limits of the new paradigm and even its dangers, the question of whom global history should be written for, and much more. Written by a leading expert in the field, *What Is Global History?* shows how, by understanding the world's past as an integrated whole, historians can remap the terrain of their discipline for our globalized present.

Authored by six USG faculty members with advance degrees in History, this textbook offers up-to-date original scholarship. It covers such cultures, states, and societies as Ancient Mesopotamia, Ancient Israel, Dynastic Egypt, India's Classical Age, the Dynasties of China, Archaic Greece, the Roman Empire, Islam, Medieval Africa, the Americas, and the Khanates of Central Asia. It includes 350 high-

quality images and maps, chronologies, and learning questions to help guide student learning. Its digital nature allows students to follow links to applicable sources and videos, expanding their educational experience beyond the textbook. It provides a new and free alternative to traditional textbooks, making World History an invaluable resource in our modern age of technology and advancement.

*A Course of Study in World History for Correspondence* Oxford University Press, USA  
 This innovative textbook demystifies the subject of world history through a diverse range of case studies. Each chapter looks at an event, person, or place commonly included in comprehensive textbooks, from prehistory to the present and from across the globe - from the Kennewick Man to gladiators and modern-day soccer and globalization - and digs deeper, examining why historians disagree on the subject and why their debates remain relevant today. By taking the approach of 'unwrapping the textbook,' David Eaton reveals how historians think, making it

clear that the past is not nearly as tidy as most textbooks suggest.

Provocative questions like whether ancient Greece was shaped by contact with Egypt provide an entry point into how history professors may sharply disagree on even basic narratives, and how historical interpretations can be influenced by contemporary concerns.

By illuminating these historiographical debates, and linking them to key skills required by historians, *World History through Case Studies* shows how the study of history is relevant to a new generation of students and teachers. *Glencoe World History, Modern Times, Spanish Reading Essentials and Study Guide, Workbook* Bloomsbury Publishing

World history has expanded dramatically in recent years, primarily as a teaching field, and increasingly as a research field. Growing numbers of teachers and Ph.Ds in history are required to teach the subject. They must be current on topics from human evolution to industrial development in Song-dynasty China to today's disease patterns - and then link these disparate topics into a coherent course.

Numerous textbooks in print and in preparation summarize the field of

world history at an introductory level. But good teaching also requires advanced training for teachers, and access to a stream of new research from scholars trained as world historians. In this book, Patrick Manning provides the first comprehensive overview of the academic field of world history. He reviews patterns of research and debate, and proposes guidelines for study by teachers and by researchers in world history.
