This code is founded upon certain basic principles of environmental sanitation and safety through properly designed, acceptably installed, and adequately maintained plumbing systems. Some of the details of plumbing construction may vary, but the basic sanitary and safety principles desirable and necessary to protect the health of the people are the same everywhere. As interpretations may be required, and as unforeseen situations arise that are not specifically covered in this code, the 23 principles in items A to W shall be used to define the intent.

Why do girls love pink
toys, and boys love blue
ones? The fine arts
photographer Jeongmee
Yoon (*1969, Seoul) poses
this question in her work,
The Pink and Blue Project,
for which she began
photographing Korean
and American girls and
boys in their rooms in
2005. The gender-specific
color schemes quickly
established themselves as
an overarching
phenomenon,
independent of cultural or
ethnic background. Yoon's
impressive portraits, for
which she spent hours
carefully arranging pink or
blue objects, question
these color codes and the
consumer habits of both
parents and children.

They reveal the connections linking gender identity and social norms, consumer culture, and media. She continued this project by visiting the children years later and capturing how their favorite colors had changed. Jeongmee Yoon was awarded the ILWOO Foundation Prize for her project.

Impact and Explosion: Structural Analysis and Design presents a comprehensive study of the structural dynamics of impact and explosion by providing a survey of types of aircraft, missiles, bombs, and detonators. Impact dynamics, including empirical models developed for different materials, water surfaces, and soil/rock mediums, is discussed. Other topics include load time history; explosion dynamics related to material damage capabilities; dynamic finite elements with provisions for impact and explosions; a discussion of solution procedures, acceleration, and convergence criteria; methods for designing structures resistant to impact and explosions;

and how damage results due to impact or explosions. Case histories, comparative studies, numerous examples, appendices, and extensive references reinforce information presented in this important book for engineers and researchers working in government and private industry laboratories concerned with blast or impact loading effects on structures. Small firms that deal with impact loading (e.g., automobile collisions) will also find this book valuable.

The HIV/AIDS epidemic has the potential to impede and even reverse development if not addressed early enough. Poverty and income inequality have been shown to facilitate the diffusion of HIV epidemics. While abject poverty in the Middle East and North Africa region remains low, a significant proportion of the population (23.2%) live under \$2 per day and are extremely vulnerable in their ability to cope with shocks. In order to preserve the benefits of national and regional development investments put in place by governments, and donor agencies, greater investments to improve

HIV/AIDS advocacy, information and prevention strategies are needed now to maintain the current low prevalence levels. This title outlines the role of the Bank in confronting the HIV/AIDS epidemic in the region based on a review of needs and gaps at the regional and country level.

The United States Budget in Brief

An estimated 50,000 screenplays are registered with the Writers Guild America every year. When someone goes to the trouble and expense of protecting their work with WGA registration, that's an indication of serious intent; these folks want to see their script produced. If you're one of those screenwriters or filmmakers with the dream of seeing your story produced and projected on movie screens around the world, you know that having a great script isn't really enough. You may even have trouble getting anyone in "the industry" to simply read and consider your screenplay for production. That's the norm in today's movie-making pipeline: it's essentially a closed shop unless you have

successful (profitable to financiers) films in your credit history. The only way around this Catch-22 is to produce your own film from material you truly believe in. But the stumbling block faced by everyone with a great script in their hands is that it takes money to independently produce a film of any quality...lots of money. FINDING THAT MONEY SO YOU CAN MAKE YOUR FILM IS WHAT THIS BOOK IS ALL ABOUT. Raising the money you need to make your movie is no longer the impossible task it once was. You only need to find those individuals with money they're willing to risk, and then convince them that your film has a reasonable chance of returning their investment plus some net profit attached. Does that sound impossible? Well, it's not. Mark Stouffer has raised millions of dollars from private individuals for his movies, and he's done it repeatedly. Now, for the first time, he shows you exactly how you can raise

the money you need to make your films. All you have to do is pay attention and carefully follow the 7 Steps to Raising Money for Your Movie in this book. Nobody said that making a movie or raising the money to finance your filmmaking venture was easy. But it can be done...and you can do it exactly the way the author has done it. More than once, Stouffer started from absolute Ground Zero with nothing more than a telephone and blank paper on his desk. He's gone from "idea" to . . . to script . . . to business plan . . . to pitch . . . to production financing . . . to final cut . . . to distribution deal . . . to the red carpet. Asking others for money so that you can make your movie may sound like an impossible challenge. But if you use the tactics, strategies, and principles in this book, you will be an undeniable force. You will raise the money you need, and you will make your movie!
