This surprising study draws together the disparate fields of postcolonial theory and book history in a challenging and illuminating way. Robert Fraser proposes that we now look beyond the traditional methods of the Anglo-European bibliographic paradigm, and learn to appreciate instead the diversity of shapes that verbal expression has assumed across different societies. This change of attitude will encourage students and researchers to question developmentally conceived models of communication, and move instead to a re-formulation of just what is meant by a book, an author, a text. Fraser illustrates his combined approach with comparative case studies of print, script and speech cultures in South Asia and Africa, before panning out to examine conflicts and paradoxes arising in parallel contexts. The re-orientation of approach and the freshness of view offered by this volume will foster understanding and creative collaboration between scholars of different outlooks, while offering a radical critique to those identified in its concluding section as purveyors of global literary power.

Many people, whether educators or not, will agree that an education that does not inspire wonder is barren. Wonder is commonly perceived as akin to curiosity, as stimulating inquiry, and as something that enhances pleasure in learning, but there are many experiences of wonder that do not have an obvious place in education. In *Wonder and Education*, Anders Schinkel theorises a kind of wonder with less obvious yet

fundamental educational importance which he calls 'contemplative wonder'. Contemplative wonder disrupts frameworks of understanding that are taken for granted and perceived as natural and draws our attention to the world behind our constructions, sparking our interest in the world as something worth attending to for its own sake rather than for our purposes. It opens up space for the consideration of (radical) alternatives wherever it occurs, and in many cases is linked with deep experiences of value; therefore, it is not just important for education in general, but also, more specifically, for moral and political education.

First published in 1995. When did psychology become a distinct discipline? What links the continental and analytic traditions in philosophy? Answers to both questions are found in this extraordinary account of the debate surrounding psychologism in Germany at the turn of the century. The trajectory of twentieth century philosophy has been largely determined by this anti-naturalist view which holds that empirical research is in principle different from philosophical inquiry, and can never make significant contributions to the latter's central issues. Martin Kusch explores the origins of psychologism through the work of two major figures in the history of twentieth century philosophy, Gottlob Frege and Edmund Husserl. His sociological and historical reconstruction shows how the power struggle between the experimental psychologists and pure philosophers influenced the thought of these two philosophers, shaping their agendas and determining the success of their arguments for a sharp separation of logic from psychology. A move that was crucial in the creation of the distinct

discipline of psychology and was responsible for the anti-naturalism found in both the analytic and the phenomenological traditions in philosophy. Students and lecturers in philosophy, psychology, linguistics, cognitive science and history will find this study invaluable for understanding a key moment in the intellectual history of the twentieth century.

Clark Atlanta University Whitney M. Young Jr. School of Social Work was founded in 1920 in Atlanta, Georgia, as the Atlanta School of Social Work to prepare social workers for practice in underserved black neighborhoods. Spearheaded by black scholars and progressive whites during an era of racial segregation, 2020 marks its centennial as the first accredited social work program at a historically black college and university. In this book, social work professor Alma J. Carten describes the School's transitions from its beginnings amid the pervasive racism sanctioned by Supreme Court rulings in the Dred Scott and Plessy v. Ferguson cases, through the decades of 20th century progressive civil rights reforms, and into the new conservatism of the 21st century. Referencing archival documents, Carten illustrates the School's commitment to the democratic principles of the profession despite the blatant racism of the segregated South and the less visible structural inequalities following desegregation from which mainstream social work education was not immune. The book describes the influence of iconic thought leaders on the School's culture and academic programs, beginning with Jesse O. Thomas's speech on the need for a black school of social work, given from the segregated section of the 1920

National Conference on Social Work; and including W.E.B. DuBois' Atlanta University Studies that pioneered the model of social progress powered by science; E. Franklin Frazier and Forrester B. Washington, who championed "black social work" and the integration of race critical content in the curriculum of all schools; and Whitney M. Young, Jr., who chastised social workers for their waning interest in advocacy for marginalized populations and encouraged them to become politically active. Carten examines the evolution of the School within the context of changes in US social welfare policy, CSWE accrediting standards, and NASW Code of Ethics. Highly readable, the book brings to light the under-reported contributions of HBCU social work programs to social work education, and it thoughtfully engages with the School's efforts to legitimize the Afrocentric perspective and the humanistic values embraced by HBCU social work programs.

Marcel Proust offered the twentieth century a new psychology of memory and seeing. His novel *In Search of Lost Time* was written in the modern age of photography and art history. In *Looking Back One Learns to See: Marcel Proust and Photography* is an intellectual adventure that brings to light Proust's visual imagination, his visual metaphors, and his photographic resources and imaginings. The book features over 90 illustrations. Mary Bergstein highlights various kinds of photography: daguerreotypes, stereoscopic cards, cartes-de-visite, postcards, book illustrations, and other photographic mediums. Portraiture, medical photography, spirit photography, architectural photography, Orientalism,

ethnographic photography, and fin-de-siècle studies of Botticelli, Leonardo, and Vermeer, are considered in terms of Proust's life and work. The net is cast wide, and each image under discussion has been researched with subtle attention to art, literature, and cultural history. This scholarly study in literature and visual culture will be a delight, too, for general readers who love photography or Proust. Mary Bergstein is professor of History of Art and Visual Culture at the Rhode Island School of Design. She won the 2012 "Courage to Dream" book prize from the American Psychoanalytic Association for, *Mirrors of Memory: Freud, Photography, and the History of Art* (Cornell 2010). She has published numerous books and articles on art and visual culture from Italian Renaissance sculpture to contemporary photography.

Society, Representations and Textuality:

The Critical Interface brings together papers from various critical perspectives of Humanities and Social Sciences. The work (a) takes stock of the recent developments in critical theory and cultural studies; (b) studies the impact of these developments on the understanding of social reality and the human predicament in India; and (c) brings together scholars from North East India who are engaged in the project of understanding society and communities in their chosen intellectual practice. The book is the first-ever attempt to establish a dialogic encounter between critical practices in Humanities and Social sciences, hitherto considered to be autonomous in their own disciplinary boundaries. Further, the volume addresses issues of identity and autonomy of a multicultural India, particularly with reference to the interface between hegemonic cultures and politically and culturally persistent smaller communities. A significant feature of this book is its attempt to theorize and describe the myriad manifestations of the critical interface between society and literary or cultural productions.

This innovative volume focuses on tourism through the twin lenses of cultural theory and cultural geography.

Presenting a set of innovative case studies on tourist places around the world, the contributors explore the paradoxes of the tourist experience and the implications of these paradoxes for our broader understanding of modern identity as simultaneously grounded and mobile. The book examines how tourism reveals the paradoxical ways that places are both mobile and rooted, real and fake, inhabited by those who are simultaneously insiders and outsiders, and both subjectively experienced and objectively viewed. This rich blend of empirical and theoretical analysis will be invaluable for cultural geographers, anthropologists, and sociologists of tourism.

In this eclectic anthology, more than 20 scientists, nature writers, poets, and Zen practitioners, attest to how paying attention to nature can be a healing antidote to the hectic and harrying pace of our lives. Throughout this provocative and uplifting book, writers describe their various experiences in nature and portray how careful, and mindful, attention to the larger world around us brings rewarding and surprising discoveries. They give us the literary, personal, and spiritual stories that point a way toward calm and quiet for which

many people today hunger. Contributors to *The Way of Natural History* highlight their individual ways of paying attention to nature and discuss how their experiences have enlivened and enhanced their worlds. The anthology is a rich array of writings that provide models for interacting with the natural world, and together, create a call for the importance of natural history as a discipline.

In an age where art history's questions are now expected to receive answers, Richard Schiff presents a challenging alternative. In this essential new addition to James Elkins's series *Theories of Modernism and Postmodernism in the Visual Arts*, Richard Schiff embraces doubt as a critical tool and asks how particular histories of art have come to be. Schiff's turn to doubt is not a retreat to relativism, but rather an insistence on clear thinking about art. In particular, Schiff takes issue with the style of self-referential art writing seemingly 'licensed' by Roland Barthes. With an introduction by Rosie Bennett, *Doubt* is a study of the tension between practicing art and practicing criticism.

Discover the mysterious, controversial, and sometimes downright eerie history of flights that didn't end as planned. The history of aviation is full of accounts of history's most spectacular flights. But what about the ones from which someone failed to return? - A celebrated millionaire--who also happened to be the world's foremost aviator--lifted off in a small plane one clear morning in 2007 and disappeared. - The glamorous son of a beloved fallen president took off on a

hazy summer night in 1999 and plunged himself and two others into the Atlantic Ocean. - A US Navy blimp landed one Sunday morning in 1942 in the middle of a city street in California with no one aboard. Some of these "non-returns" occurred because of errors in judgment; others were intentional, and some resulted from causes still unknown. Get the full, meticulous account of the fascinating people involved in these flights, the mistakes they made, and the ways in which their "flight of no return" affected the world. Pilot and aviation writer Steven A. Ruffin covers the entire 230-year span of manned flight in all types of aircraft through war and peace. Balloons, blimps, biplanes, jets, and spaceships have all suffered mishaps over the years. Don't miss the mystery, adventure, intrigue, and a sprinkling of the supernatural and extraterrestrial in *Flights of No Return*.

This book spotlights the unique contribution of the *Journal for Specialists in Group Work* to the social justice literature, and of group work to a social justice agenda. Although the term social justice may be relatively new in the counseling and psychology literature, the underlying values - attention to inequities, advocacy, and empowerment strategies for members of marginalized and oppressed populations - are not new in group work. Group leaders have been attending to these concerns all along, and group work itself is an ideal venue for the realization of social justice concerns. However, until now there has been a limited amount of scholarship on group work with a stated focus on social justice. This groundbreaking book emphasizes action through a practical approach, featuring research and case

studies of social justice group work in community and school settings. Chapters highlight how group workers infuse social justice consciousness into their work, address social justice issues, and implement social justice practice. Authors review the history, practice, and future opportunities for social justice advocacy within group modalities. They also address guidelines for the training and supervision of practitioners engaging in social justice group work. This book was published as a special issue of the *Journal for Specialists in Group Work*.

"How do we know what happened in the past? We cannot go back, and no amount of historical data can enable us to understand with absolute certainty what life was like then. It is easy to demolish the very idea of historical knowing, but it is impossible to demolish the importance of historical knowing. In an age of cable television pundits and anonymous bloggers dueling over history, the value of owning history increases at the same time as our confidence in history as a way of knowing crumbles. Historical knowledge thus presents a paradox - the more it is required, the less reliable it has become. To reconcile this paradox - that history is impossible but necessary - Peter Charles Hoffer proposes a practical, workable philosophy of history for our times, one that is robust and realistic, and that

speaks to anyone who reads, writes and teaches history. The philosophy of history that Hoffer supports in *The Historians' Paradox* is driven by a continual and careful search for the authentic, but without confining the real to a finite or closed set of facts. Hoffer urges us to think and live with a keen awareness that history is everywhere, to accept the impossibility of measuring its reliability, but to never approach it unquestioningly. Covering a sweeping range of philosophies (from ancient history to game theory), methodological approaches to writing history, and the advantages and disadvantages of different strategies of argument, Hoffer constructs a philosophy of history that is reasonable, free of fallacy, and supported by appropriate evidence that is itself tenable. *The Historians' Paradox* brings together accounts of actual historical events, anecdotes about historians, insights from philosophers of history, and the personal experience of a long time scholar and teacher. Throughout, Hoffer liberally spices the mixture with humor to create a philosophy of history for our times."-- publisher.

Named one of New York Times Top-20 Cookbooks of 2006. Have you ever wanted to host a full evening of Indian food, culture, and music? How about preparing a traditional Balinese banquet? Or take a trip to Cairo and enjoy an Egyptian feast? The *Ethnomusicologists' Cookbook* takes you around the world on a culinary journey that is also a cultural and social odyssey. Many cookbooks offer a snapshot of individual recipes from different parts of the world, but do nothing to tell the

reader how different foods are presented together, or how to relate these foods to other cultural practices. For years, ethnomusicologists have visited the four corners of the earth to collect the music and culture of native peoples, from Africa to the Azores, from Zanzibar to New Zealand. Along the way, they've observed how music is an integral part of social interaction, particularly when it's time for a lavish banquet or celebration. Foodways and cultural expression are not separate; this book emphasizes this connection through offering over thirty-five complete meals, from appetizers to entrees to side dishes to desserts and drinks. A list of recommended CDs fills out the culinary experience, along with hints on how to present each dish and to organize the overall meal. The *Ethnomusicologists' Cookbook* combines scholarship with a unique and fun approach to the study of the world's foods, musics, and cultures. More than just a cookbook, it is an excellent companion for anyone embarking on a cultural-culinary journey. *International Cooperation for World Economic Development* Lulu.com Every town has a history-you know, the stuff they teach you in school and brag about on those fancy, roadside historical markers.
