“The Creature from Reelfoot Lake: The Mermaid Who Loved Women” is a horror novel that is reminiscent of the classic cinemas of the 1950s such as “Creature from the Black Lagoon” and “The Blob.” But with one major difference: The Reelfoot creature is half-human, a merman who has been on an obsessive search for his birth mother that has lasted more than 200 years. At the heart of the story are three former college roommates—two male, one female—who all have childhood and relationship issues that dominate their lives. The roommates—and their issues—converge at Reelfoot Lake, Tennessee, where the creature is inflicting a reign of terror that makes it difficult for the ex-roommates to locate a treasure that has been buried since the New Madrid earthquake of 1811. The protagonist is female, and the plot is complicated by the fact that she is being stalked by the third roommate, her ex-husband, at the same time that she is stalked by the creature. It is a sophisticated, multi-layered psychological thriller in which all the main characters are forced to deal with their individual issues. The creature cannot speak, but he has a distinctive voice that will touch the hearts of readers as he searches for the meaning of his tormented life.

My Life as a Night Elf Priest BradyGames
This is the Final Report of Canada's Truth and Reconciliation Commission and its six-year investigation of the residential school system for Aboriginal youth and the legacy of these schools. This report, the summary volume, includes the history of residential schools, the legacy of that school system, and the full text of the Commission's 94 recommendations for action to address that legacy. This report lays bare a part of Canada's history that until recently was little-known to most non-Aboriginal Canadians. The Commission discusses the logic of the colonization of Canada's territories, and why and how policy and practice developed to end the existence of distinct societies of Aboriginal peoples. Using brief excerpts from the powerful testimony heard from Survivors, this report documents the residential school system which forced children into institutions where they were forbidden to speak their language, required to discard their clothing in favour of institutional wear, given inadequate food, housed in inferior and fire-prone buildings, required to work when they should have been studying, and subjected to emotional, psychological and often physical abuse. In this setting, cruel punishments were all too common, as was sexual abuse. More than 30,000 Survivors have been compensated financially by the Government of Canada for their experiences in residential schools, but the legacy of this experience is ongoing today. This report explains the links to high rates of Aboriginal children being taken from their families, abuse of drugs and alcohol, and high rates of suicide.

The report documents the drastic decline in the presence of Aboriginal languages, even as Survivors and others work to maintain their distinctive cultures, traditions, and governance. The report offers 94 calls to action on the part of governments, churches, public institutions and non-Aboriginal Canadians as a path to meaningful reconciliation of Canada today with Aboriginal citizens. Even though the historical experience of residential schools constituted an act of cultural genocide by Canadian government authorities, the United Nation's declaration of the rights of aboriginal peoples and the specific recommendations of the Commission offer a path to move from apology for these events to true reconciliation that can be embraced by all Canadians.

During the 1906 San Francisco

earthquake, the Point Reyes Peninsula, forty miles farther north along the San Andreas Fault, shook loose from its temporary moorings to the California coastline and lurched to the northwest by some twenty feet. The powerful quake that terrorized the city also tore through the land and jarred the rural inhabitants of Point Reyes. It was another abrupt step in the peninsula's slow creep from southern to northern California, yielding a piece of land quite divergent from the California mainland to which it is now affixed. Although pressure along the San Andreas Fault continued to build for the remainder of the century, there were no other geologic events of a magnitude that could so drastically alter the land's surface. By contrast, human events since 1906 have significantly altered the peninsula's landscape. In the century following the earthquake, economic, cultural, and political forces gradually reshaped Point Reyes. Possibly the biggest tremor took place in 1962, when Congress created, and President John F. Kennedy signed into law, the Point Reyes National Seashore. At that juncture, the political geography of the land, as a new unit of the National Park Service (NPS), was about to change dramatically. This volume, *Managing a Land in Motion: An Administrative History of Point Reyes National Seashore*, traces, explains, and analyzes the ideas and events that produced the national seashore and transpired in the forty years that followed.
