DR SEBI DIET FOR BRAIN STEM DEATHDr. Sebi was a Honduran man with a very humble beginning and was known and addressed as an herbalist, pathologist or a naturalist in different regions of the world; he left the biosphere in 2016. Indeed, it is true that he is no longer in our midst today, but his self-invented and established effective traditional therapy for diabetes, hypertension and organ cleansing is still helping millions of people with these conditions around the world. Dr. Sebi said that there were six fundamental food groups: live, raw, dead, hybrid, genetically modified, and drugs, but his diet basically cut out all the food groups except live and raw food, thereby encouraging dieters to eat as closely to a raw vegan diet as possible. These foods include foods like naturally grown fruits and vegetables, along with whole grains. He has the believed that raw and live foods were "electric," which fought the acidic food waste in the body. So, with his approach to eating, Dr. Sebi established a list of foods that he deliberated to be the best for his diet. Sticking to Dr Sebi's Diet and Food List to cure these diseases can be challenging if you eat out a lot. Consequently, you need to get used to making lots of meals at home. A vegan diet is now considered the fastest growing lifestyle change in the United States. There are now estimated to be approximately 1.6 million currently who call themselves vegan in America, up 600%. I would like to start off stating it is my belief that, the body given the opportunity, can heal from anything. This said, each person's situation is unique and may require more or less of an effort on their part. I see some wonderful healing occur but it is up to the individual to be a significant part of the process. One of the most, if not the most, important change that I would do is the change to a vegan diet during the healing process, especially one with little processed foods, thereby utilizing significantly raw fruits and vegetables and sprouted nuts and grains. This allows the body to heal without having to deal with the energy of digesting heavily processed foods and thereby directing the body's resources to healing the matters at hand. It also floods the body with a vast amount of micro-nutrients, thereby giving the system what it needs to rebuild. The first step to any healing is Cleanse and Nourish. Raw food enthusiasts claim that a raw diet increases energy levels, facilitates weight loss and improves overall health. Benefits: People who adhere to a raw food diet claim that it boosts their energy levels, improves immune functioning, helps them lose weight and cleanses their bodies. According to RawFoodLife.com, a raw diet increases the body's pH levels, making it more alkaline and increasing its energy. Raw diet proponents also claim that cooking destroys a food's natural enzymes -- components important for nutrition. A diet high in fruits and vegetables does contain many important vitamins and minerals lacking in a number of processed foods. I have since then stayed on the raw, vegan diet and my health has yet to plateau. Each day I feel more energy and endurance than I can remember ever experiencing before. I have found I need to eat only one meal a day with a few raw snacks in the evening. I rarely get hungry and I have plenty of energy before I ever have my main meal of the day. I now tell my patients about this diet routine and some of them are trying to switch, especially my cancer patients. As they progress in the program utilizing more and more of a raw, vegan diet we have found that their healing

process is greatly accelerated and the medications we have them on are more effective. We are also teaching classes on nutrition with an emphasis on a raw, vegan diet. The successes we have seen with our patients who switch to a raw vegan diet has been seen in such issues as cancer, Lyme, Multiple Sclerosis, Lupus, Candida overgrowth, heavy metal toxicity, and so many more. I know, after 20+ years of medical practice that to treat a patient and not encourage them to change their diet is not giving them the tools they need to heal. With this diet, I have seen them not only heal from incredibly devastating disorders but also noted the condition did not return when they maintained a healthy diet. Within the pages of this book you learn the science of nutrition behind live food along with hundreds of wonderful, tried and true recipes for everything from snacks, entrees, desserts, salads and so much more.

DR SEBI Diet For Blood Poisoning Dr. Sebi was a Honduran man with a very humble beginning and was known and addressed as an herbalist, pathologist or a naturalist in different regions of the world; he left the biosphere in 2016. Indeed, it is true that he is no longer in our midst today, but his self-invented and established effective traditional therapy for diabetes, hypertension and organ cleansing is still helping millions of people with these conditions around the world. Dr. Sebi said that there were six fundamental food groups: live, raw, dead, hybrid, genetically modified, and drugs, but his diet basically cut out all the food groups except live and raw food, thereby encouraging dieters to eat as closely to a raw vegan diet as possible. These foods include foods like naturally grown fruits and vegetables, along with whole grains. He has the believed that raw and live foods were "electric," which fought the acidic food waste in the body. So, with his approach to eating, Dr. Sebi established a list of foods that he deliberated to be the best for his diet. Sticking to Dr Sebi's Diet and Food List to cure these diseases can be challenging if you eat out a lot. Consequently, you need to get used to making lots of meals at home. His book offers information on why it is important to eat a raw and alkaline diet for optimum health. The Importance Of Eating Raw Eating raw will deliver many of the same benefits as going alkaline, such as a higher energy level and improved health conditions. Eating raw also delivers another jolt of life force to your food. The dominant thought behind raw foods is that they are living foods, as opposed to dead foods, which have had the nutrition cooked

out of them. Cooked foods can lose up to 85% of the nutrients you otherwise would have received. The Importance Of Eating Alkaline-Based Foods According to the Science of Dr. Robert Young author of "The pH Miracle", the pH level of the body must be higher alkaline to ensure optimal health. Studies show that an alkaline body can help to prevent serious health problems, such as: Obesity, Diabetes, Asthma, High-Blood Pressure, Arthritis, Heart Disease and more. Chef Sal shares his philosophy of staying energized and keeping young through a lifestyle of healthy living through exercise, diet and a positive outlook.
