A Wall Street Journal Bestseller Are You a Driver, an Explorer, a Crusader, or a Captain? Many factors shape the success or failure of a new business, whether it's a stand-alone startup or a venture inside a larger corporation. But the most important and least understood of these factors is the personality of the entrepreneur—the particular combination of beliefs and preferences that drives his or her motivation, decision making, and leadership style. And your builder personality is the one resource you can directly control in

growing a business that wins. Simply put, who you are shapes how you build for growth. Built for Growth decodes the interplay between builder personality and new business success. Using a patented analytic methodology, authors Chris Kuenne and John Danner discovered four distinct types of highly successful entrepreneurial personalities—the Driver, the Explorer, the Crusader, and the Captain. Each is motivated, makes decisions, manages, and leads their businesses differently. Kuenne and Danner blend pioneering research and exclusive personal interviews to illustrate how each type handles the five dynamic challenges in building a business of lasting value: converting ideas into products, galvanizing individual talent for

collaborative impact, transforming buyers into partners, aligning financial and other supporters, and scaling the business. With assessments and tools, including a brief Builder Personality quiz and in-depth profiles of each builder type, Built for Growth is the ultimate guide for how to play to your strengths, complement and compensate for your gaps, and build a successful business—from startup to scale-up. A guide to the early decisions that can make or break startup ventures Often downplayed in the excitement of starting up a new business venture is one of the most important decisions entrepreneurs will face: should they go it alone, or bring in cofounders, hires, and investors to help build the business? More than just financial rewards are at stake. Friendships and relationships can suffer. Bad decisions at the inception of a promising venture lay the foundations for its eventual ruin. The Founder's Dilemmas is the first book to examine the early decisions by entrepreneurs that can make or break a startup and its team. Drawing on a decade of research, Noam Wasserman reveals the common pitfalls founders face and how to avoid

them. He looks at whether it is a good idea to cofound with friends or relatives, how and when to split the equity within the founding team, and how to recognize when a successful founder-CEO should exit or be fired. Wasserman explains how to anticipate, avoid, or recover from disastrous mistakes that can splinter a founding team, strip founders of control, and leave founders without a financial payoff for their hard work and innovative ideas. He highlights the need at each step to strike a careful balance between controlling the startup and attracting the best resources to grow it, and demonstrates why the easy short-term choice is often the most perilous in the long term. *The Founder's Dilemmas* draws on the inside stories of founders like Evan Williams of Twitter and Tim

Westergren of Pandora, while mining quantitative data on almost ten thousand founders. People problems are the leading cause of failure in startups. This book offers solutions.

Financial literacy and wisdom are far more important than how much money you make. People chase money. But once you secure the money, how do you spend it? Most people spend 1st then attempt to save what's left. Until bills or unexpected expenses show up to deplete their savings. Money is a tool, it should always be working for you. Wealth is amassed when your money works more for you then you do for it. Money sitting in a bank or under a mattress is just money waiting to be spent. Even when it comes to the most

disciplined individuals. Those of us who understand money call that dead money. Money is currency therefore it should always be moving. When you put it in the bank it's working, just not for you. The bank is using your money to make plenty of money and giving you pennies. And you have been brainwashed into thinking this is ok because they tell you it's the safest place to put your money. But your money shouldn't be kept in banks. It should be kept in investments and passed through banks in transactions using funds and accounts that protect your money from unnecessary taxes and penalties. This understanding is the difference between those who get rich and those who build generational wealth. Be smart with your money and pace yourself. In this

financial read you will learn about entrepreneurship. Our check list will see if you are ready. If you're aspiring to be ahead of the entrepreneurship boom in the mist of the world being on hold due to a health crisis, then this book is for you.
