ANGELINA CHARLES

LIFE Braugher Books, LLC

In over 1700 color photos and 145 patent drawings, along with an informative text, this book introduces readers to a wide range of mechanical pencils. Included among them are well known examples created by what the author defines as the big four of American pencil manufacturers--Autopoint, Eagle Pencil Company, Eversharp (Wahl Eversharp), and Sheaffer--as well as rarely seen models and unusual variations. Explore mechanical pencil history from 1851 to the late 1970s and the various mechanisms made to move and lock lead in place. Also included

is a startling chapter on trick pencils. These compact wonders, first documented in a mid-nineteenth century patent, provide a wide range of extra features with clever attachments, including magnets, lighters, penknives, rubber stamps, and sheets of writing paper hidden in the shaft. Also included are suggested values for many of the mechanical pencils displayed and discussed. For anyone with a passion for American ingenuity and technological innovation on the small scale, this book is for you.

LIFE

The Leadhead's Pencil Blog began in 2011 as an online update service for the author's first book, *The Catalogue of American Mechanical Pencils*. It is now a standalone resource for vintage and antique mechanical pencils, currently featuring 1,200 articles. This Volume picks up where Volume I left off and includes original research, extensive images and patent drawings for the second full year of the blog, covering "The Big Four" of pencils - Wahl Eversharp, Eagle, Autopoint and Sheaffer - as well as other highly collectible brands, such as Tri-Pen's Triad, W.S. Wicks, Parker and Conklin. Also included are many obscure and forgotten brands that have not been written about in the decades since they first appeared on the market. Part encyclopedia and part travelogue, *The Leadhead's Pencil Blog* brings together the pencils, the history behind them, and a wonderful community of enthusiasts whose shared information has helped build this indispensable reference.

American Mechanical Pencils

Change the way you look at office supplies forever with this wonderfully enlightening and quirky exploration of the fascinating backstories of everyday objects, such as the humble and perfectly designed paper clip and the utilitarian, irreplaceable pencil. How many of humanity's brightest ideas started out on a scrap of paper or in the margins of a notebook? In a delightfully witty and fresh voice, James Ward—cofounder of the Boring Conference and collector of the arcane—explores the secret histories of deskbound supplies, from pencils to fluorescent ink,

and the gleaming reams of white paper we all take for granted, encouraging a deeper appreciation and fascination for the things that surround us each day. In the spirit of *The Evolution of Useful Things* and *A History of the World in 100 Objects*, Ward transforms the mundane into remarkable stories of invention, discovery, and even awe. *The Perfection of the Paper Clip* is “a hugely entertaining experience for the reader...this engaging book is an absolute must” (Booklist).
