MARKS SHANNON

Master of Science in Project Management - City of London College of Economics - 10 months - 100% online / self-paced IGI Global

Successfully navigate the changing face of the CIO role Strategic Information Technology offers CIOs a handbook for engaging with the senior management conversations surrounding strategy. The CIO role is currently undergoing a massive transition from technology-focused expert to a more strategic mindset, and this book provides proven methods for taking your seat at the table. Lessons from high-performing CIOs and a wealth of leading-edge insight provide invaluable guidance for positioning technology as a strategic driver across the business, while a focus on building the necessary connections—for example, an alliance between IT and HR—provide a multimodal approach to navigating the transition. The evolution of the CIO's role involves more than simply technical knowledge; the new CIO must be an influencer, an engager, and just as adept at the soft skills that become increasingly crucial as you climb the management ladder. It's about changing mindsets, translating hard skills into strategic advantages, and demonstrating IT's value to the strategic decision making process. This book provides best practices, illustrative examples, and up-to-date perspective for CIOs wanting to: Position IT as a critical driver of overall strategy Build on functional expertise with strategic insight Learn from the stories of successful tech-to-strategy transformations Engage C-Suite peers in shaping the strategic conversation Not long ago, the CIO occupied a unique place in the C-Suite. Executive by title, CIOs have nevertheless been seen as predominantly the "chief tech expert" with little input into strategy, as IT has historically been regarded as a tool rather than a source of competitive advantage. The truth is becoming increasingly apparent, with companies around the world turning to technology in order to gain a competitive edge, and CIOs are beginning to claim their place in strategy discussions. Strategic Information Technology offers much needed guidance for a successful transformation. [Techniques and Applications for Advanced Information Privacy and Security: Emerging Organizational, Ethical, and Human Issues](#) John Wiley & Sons "This book offers a critical review of current research in technology-supported education, focusing on the development and design of successful education programs, student success factors, and the creation and use of online courses"--Provided by publisher.

Graduate Programs in the Humanities, Arts & Social Sciences 2015 (Grad 2) Routledge Recent innovations and new technologies in education have altered the way teachers approach instruction and learning and can provide countless advantages. The pedagogical value of specific technology tools and the cumulative effects of technology exposure on student learning over time are two areas that need to be explored to better determine the improvements needed in the modern classroom. *Advanced Methodologies and Technologies in Modern Education Delivery* provides emerging research on educational models in the continually improving classroom. While highlighting the challenges facing modern in-service and pre-service teachers when educating students, readers will learn information on new methods in curriculum development, instructional design, and learning assessments to implement within their classrooms. This book is a vital resource for pre-service and in-service teachers, teacher education professionals, higher education administrative professionals, and researchers interested in new curriculum development.

Black American Military Leaders IGI Global

Be the most effective CIO you can be—by learning from the best in the business Today's Chief Information Officers must be an entirely new breed of technology leader. With ever-changing demands from the business, and in an increasingly technology-centric business environment, CIOs must find game-changing innovations and process improvements that make a real impact on the bottom line. Business executives need their CIOs to be real partners—speaking the language of the

business and donning their strategist caps—not just commodity managers. Those IT leaders who fail to break out of the order-taker, utility manager mold will, simply put, be looking for a new job. In *Confessions of a Successful CIO: How the Best CIOs Tackle Their Toughest Business Challenges*, current and future CIOs will gain invaluable perspectives from the stories of today's best IT leaders. These acclaimed leaders—each profiled in their own chapter—explain the toughest business decision they had to make, and how the outcome influenced and impacted their leadership style. These in-depth anecdotes take the reader inside some of the most challenging business climates imaginable and chronicle how these elite CIOs made the decisions that mattered. Read detailed case studies of how some of the best CIOs have handled their most challenging business problems Learn how the best CIOs anticipate changes to their business and respond—before the business comes knocking Explore how these top-flight CIOs make critical decisions around strategy and IT to not only benefit their companies, but in some cases, to save them from becoming obsolete. Analyze their perspectives on managing people, crises and balancing the risks and rewards of their "bet the farm" strategies *Confessions of a Successful CIO* is the new playbook for learning how to take risks, respond to crises, and create more value from IT. Each chapter presents a different challenge, giving present-day and future IT leaders the chance to examine, analyze and learn so that they can be just as successful as the CIOs they're reading about.

2012-2013 UNCG Graduate School Bulletin Peterson's

Peterson's Graduate Programs in Computer Science & Information Technology, Electrical & Computer Engineering, and Energy & Power Engineering contains a wealth of information on colleges and universities that offer graduate work these exciting fields. The profiled institutions include those in the United States, Canada and abroad that are accredited by U.S. accrediting bodies. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. Readers will find helpful links to in-depth descriptions that offer additional detailed information about a specific program or department, faculty members and their research, and much more. In addition, there are valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Graduate & Professional Programs: An Overview 2011 (Grad 1) IGI Global

This book provides a collection of critical pieces that support the idea that good teaching and learning of geography in fieldwork and using technology should consider the dimensions of curriculum design, instructional design and resource provision, as well as assessment for such learning activities. Further, it clearly describes the thinking, experiences and critical comments concerning two broad areas of learning outside the traditional classroom - in the field and with technology.

War and Peace and IT Springer

"I've had the pleasure of taking Dr. Hasib's class and learning about both Cybersecurity Management and Ethical Leadership. In an ever changing field, there are certain principles that we can apply consistently. Dr. Hasib covers these principles and does it in a way that easy to learn and understand. He has a great passion for his work and it shows in both his teaching styles and writing. I'd strongly suggest anyone within the Cybersecurity field to read his book. Whether you are a CEO or the technical support, this gives a thorough overview of an entire organization. If you are management, the ethical leadership portion helps build a strong community within an organization." - B. Avery Greene - Graduate student of cybersecurity at UMBC. ...".The dynamic of his classroom was so different than any class I've had. He is paving the way for future CEO's CISO's and entrepreneurs and is making a direct positive impact for cybersecurity students. Even though my

background is not very technical, I was able to fully comprehend and excel in his classroom. Great class, strongly recommend his teaching..." -Sarah Purdum - Graduate student of cybersecurity at UMBC. Managing cybersecurity requires a multi-disciplinary holistic business approach. Many of the current cybersecurity approaches in organizations and most books are based on an outdated 1991 model of cybersecurity - focused solely on technology solutions. This book provides the 2014 model and shows why leadership engagement of people within an organization is critical for success. Culture development through leadership is essential because culture governs behavior. Apply the time tested principles explained in this book for success in any organization. Today cybersecurity strategy is the same as information technology strategy. Cybersecurity drives the mission of the modern organization. Done right it can be a hallmark of distinction and a source of productivity and innovation in an organization. Failure to lead cybersecurity can easily lead to business failure. This book is an essential read for CIOs, CISOs, or any organizational business leader or student who wishes to understand how to build successful organizations. No prior background in cybersecurity or technology is required to understand this book. "...explains what an organization needs to know to implement cybersecurity governance." Council of Graduate Schools Testimony at the US Senate Appropriations Committee Meeting, April 29, 2014. "...this book will change both the way we think about leadership and the way we understand information technology. I recommend this book highly to everyone." - Eric Schwartz - Executive Director at Advena World LLC.

MBA Programs 2010 Springer Science & Business Media

Important insights into the true purpose of IT?from a CIO's perspective Focusing on the qualities required to transform an organization through the lens of the CIO, this book provides practical advice on how to address key issues, as well as create a context for the type of leadership qualities required to broaden the CIO's impact in every aspect of the corporation. Provides practical advice on key issues for leadership qualities Looks at the differences between leadership and management and the need for effectiveness in both disciplines Explores relationship management, communication skills, change management, developing human capital, sustainability, alignment, and qualities of great leaders A timely look at how the IT function can become totally aligned with the strategies and operational direction of the business enterprise, Lessons in IT Transformation reveals how CIOs can?and should?evolve from managers of utility services to business leaders who can drive revenue, value, and process redesign.

Graduate Programs in Business, Education, Information Studies, Law & Social Work 2015 (Grad 6) Peterson's

This 16th International Conference on Information Technology - New Generations (ITNG), continues an annual event focusing on state of the art technologies pertaining to digital information and communications. The applications of advanced information technology to such domains as astronomy, biology, education, geosciences, security and health care are among topics of relevance to ITNG. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help the information readily flow to the user are of special interest. Machine Learning, Robotics, High Performance Computing, and Innovative Methods of Computing are examples of related topics. The conference features keynote speakers, the best student award, poster award, service award, a technical open panel, and workshops/exhibits from industry, government and academia.

Voices of Innovation IT Revolution

The Business-IT Wall Must Come Down With A Seat at the Table, thought leader Mark Schwartz pulled out a chair for CIOs at the C-suite table. Now Mark brings his unique perspective and experience to business leaders looking to lead their company into the digital age by harnessing the expertise and innovation that is already under their roof: IT. In the war for business supremacy, Schwartz shows we must throw out the old management models and stereotypes that pit suits against nerds. Instead, business leaders of today can foster a space of collaboration and shared mission, a space that puts technologists and business people on the same team. For business leaders looking to unlock their enterprise's digital transformation, War and Peace and IT provides clear context and strategies. Schwartz demystifies the role IT plays in the modern enterprise, allowing business leaders to create new strategies for the new digital battleground. It is time to change not only the enterprise's relationship with technology, but its relationship with technologists. To accelerate, enterprises must bring technology to the heart of their work, for just as technology is causing this disruption, it is technology that provides the solution. Unlike Napoleon, it is time for business leaders to come down from the hill atop the Battle of Borodino and enter the fray with the technologists, for that is where the war will be won or lost.

Online Courses and ICT in Education: Emerging Practices and Applications Xlbris Corporation

"This book presents international authors, who are teacher educators, and their best practices in their environments, discussing topics such as the online learning environment, multimedia learning tools, inter-institutional collaboration, assessment and accreditation, and the effective use of Web 2.0 in classrooms"--Provided by publisher.

Cases on Building Quality Distance Delivery Programs: Strategies and Experiences

Peterson's

Information technology (IT) has transformed human resource management across our society, and its influence on higher education has been profound. Technology Everywhere addresses the dual role played by colleges and universities that must recruit, hire, and train knowledge worker professionals and educate IT learners to manage the ever-increasing flow of information both on campus and off. Each chapter in this much-needed volume addresses a critical phase of IT human resource management, identifies key issues, and offers practical advice based on actual experiences that can help colleges and universities develop a plan of action to respond effectively to the IT workforce challenge.

Advanced Methodologies and Technologies in Modern Education Delivery Peterson's
Peterson's Graduate Programs in Business, Education, Information Studies, Law & Social Work 2014 contains comprehensive profiles of more than 11,000 graduate programs in disciplines such as, accounting & finance, business administration & management, education, human resources, international business, law, library & information studies, marketing, social work, transportation management, and more. Up-to-date info, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable data on degree offerings, professional accreditation, jointly offered degrees, part-time & evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. Also find valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Peterson's Graduate Programs in Engineering & Applied Sciences 2012 John Wiley & Sons
Graduate Programs in the Physical Sciences, Mathematics, Agricultural Sciences, the Environment &

Natural Resources 2015 contains more than 3,000 graduate programs in the relevant disciplines-including agriculture and food sciences, astronomy and astrophysics, chemistry, physics, mathematics, environmental sciences and management, natural resources, marine sciences, and more. Informative data profiles for more than 3,000 graduate programs at nearly 600 institutions are included, complete with facts and figures on accreditation, degree requirements, application deadlines and contact information, financial support, faculty, and student body profiles. Two-page in-depth descriptions, written by featured institutions, offer complete details on specific graduate programs, schools, or departments as well as information on faculty research. Comprehensive directories list programs in this volume, as well as others in the graduate series.

Information Technology Applications for Crisis Response and Management IGI Global
Peterson's Graduate Programs in Engineering & Applied Sciences contains a wealth of information on colleges and universities that offer graduate degrees in the fields of Aerospace/Aeronautical Engineering; Agricultural Engineering & Bioengineering; Architectural Engineering, Biomedical Engineering & Biotechnology; Chemical Engineering; Civil & Environmental Engineering; Computer Science & Information Technology; Electrical & Computer Engineering; Energy & Power engineering; Engineering Design; Engineering Physics; Geological, Mineral/Mining, and Petroleum Engineering; Industrial Engineering; Management of Engineering & Technology; Materials Sciences & Engineering; Mechanical Engineering & Mechanics; Ocean Engineering; Paper & Textile Engineering; and Telecommunications. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. As an added bonus, readers will find a helpful "See Close-Up" link to in-depth program descriptions written by some of these institutions. These Close-Ups offer detailed information about the specific program or department, faculty members and their research, and links to the program Web site. In addition, there are valuable articles on financial assistance and support at the graduate level and the graduate admissions process, with special advice for international and minority students. Another article discusses important facts about accreditation and provides a current list of accrediting agencies.

New Directions for Special Collections Springer

Peterson's Graduate Programs in the Humanities, Arts & Social Sciences 2015 contains details on more than 11,000 graduate programs of study across all relevant disciplines-including the arts and architecture, communications and media, psychology and counseling, political science and international affairs, economics, and sociology, anthropology, archaeology, and more. Informative data profiles include facts and figures on accreditation, degree requirements, application deadlines and contact information, financial support, faculty, and student body profiles. Two-page in-depth descriptions, written by featured institutions, offer complete details on specific graduate programs, schools, or departments as well as information on faculty research. Comprehensive directories list programs in this volume, as well as others in the graduate series.

Project Portfolio Management Strategies for Effective Organizational Operations IGI Global
Continuous improvements in project portfolio management have allowed for optimized strategic planning and business process improvement. This not only leads to more streamlined processes, methods, and technologies, but it increases the overall productivity of companies. Project Portfolio Management Strategies for Effective Organizational Operations is a key resource on the latest advances and research regarding strategic initiatives for portfolio and program management. Highlighting multidisciplinary studies on value creation, portfolio governance and communication, and integrated circular models, this publication is an ideal reference source for professionals, researchers, business managers, consultants, and university students in economics, management, and engineering.

Utilizing Technology, Knowledge, and Smart Systems in Educational Administration and Leadership Peterson's

We can all point to random examples of innovation inside of healthcare information technology, but few repeatable processes exist that make innovation more routine than happenstance. How do you create and sustain a culture of innovation? What are the best practices you can refine and embed as part of your organization's DNA? What are the potential outcomes for robust healthcare transformation when we get this innovation mystery solved? Loaded with numerous case studies and stories of successful innovation projects, this book helps the reader understand how to leverage innovation to help fulfill the promise of healthcare information technology in enabling superior business and clinical outcomes.

16th International Conference on Information Technology-New Generations (ITNG 2019) City of London College of Economics

Properly addressing a crisis requires more than just guesswork and a reaction; it requires a properly structured approach supported by good information. With the rapid evolution of information systems and information technology, including hardware, software, the internet, and communications capabilities, there are abundant opportunities to apply these technology capabilities and resources to support and improve responses to and management of crisis situations. Approaches to crisis response and management include the design, development, implementation, and application of systematic methodologies on how to respond, as well as how to apply information systems to enhance and extend responses to crises. Information Technology Applications for Crisis Response and Management provides a multi-disciplinary perspective on current and cutting-edge research exploring and extending our understanding of the use of information systems and information technology to support responses to crises of all kinds—accidental, intentional, and acts of nature. The chapters in this book focus on the design, development, implementation, use, and evaluation of information system technologies and methodologies to support crisis response and management, as well as technology management-related issues for crisis response and management. While highlighting technical, cognitive, organizational, and human-focused issues within the field, this book is ideal for policymakers, IT specialists, government officials, crisis response teams, managers, practitioners, researchers, academicians, and students interested in the use of information technology and information systems to support diverse types of crises.

John Wiley & Sons

Peterson's Graduate Programs in Engineering & Applied Sciences 2015 contains comprehensive profiles of more than 3,850 graduate programs in all relevant disciplines-including aerospace/aeronautical engineering, agricultural engineering & bioengineering, chemical engineering, civil and environmental engineering, computer science and information technology, electrical and computer engineering, industrial engineering, telecommunications, and more. Two-page in-depth descriptions, written by featured institutions, offer complete details on a specific graduate program, school, or department as well as information on faculty research. Comprehensive directories list programs in this volume, as well as others in the Peterson's graduate series.
