Assessing Aggression Thresholds in Dogs Dogwise Publishing
 "Since pets communicate nonverbally, this book will help you recognize if your pet is suffering from [fear, anxiety, and stress]. By knowing your dog's body language, vocalizations, and changes in normal habits, you can make an accurate

diagnosis and take action to prevent triggers or treat the fallout if they do happen"-- Amazon.com.

 Treating

separation anxiety in dogs is not quick or easy—but it can be done. The successful ingredients are cooperation, commitment and time on the part of the dog trainer and the owners. In this important new book, author Malena DeMartini-Price shares her 5 Phase Treatment Protocol and related strategies to help dogs overcome the fear of being left alone and addresses the trauma it can

inflict on both the dog and their owners. Trainer handouts, detailed step-by-step training tips and a sample initial interview questionnaire are included.

Learn about:

- The critical role that “suspending absences” plays in the early part of the treatment plan and how owners and trainers can make this more manageable.
- How dog trainers can make the treatment of

separation anxiety in dogs a specialized business.

- The role that management techniques and medications can play to help support the recommended behavior modification strategies.
- How technology, including remote feeding devices and web cams, can be used to monitor a dog’s progress in overcoming his fear of being left alone.

Learn how to harness the power of worthwhile reinforcement to build safe, friendly behaviors in aggressive dogs. The positive training based, Constructional Aggression Treatment (CAT), as described in [Turning Fierce Dogs Friendly](#), has proven successful for many pet owners and trainers around the world. As a functional approach to changing aggressive behavior, it

offers a humane alternative to desensitization, counter conditioning, and distraction procedures. CAT typically produces long-lasting results in far less time than any positive treatment available, without the undesirable side-effects that are common with punishment procedures. The ultimate outcome is a once-aggressive dog that is now friendly. Inside [Turning Fierce Dogs](#)

[Beware Of The Dog](#) Dogwise Publishing. Fearful or reactive dogs are defined as dogs who have a greater than usual reaction to stimuli. Their behavior is often labeled as aggressive (even when they are not) and may include lunging,

barking, growling, and pulling on the leash--often toward the "SCARY" object. In Focus Not Fear you'll get a glimpse into the real lives of reactive dogs that Ali has worked with in her classes--their growth, successes, and failures. It serves as a guide both for trainers who wish to run classes for their clients with reactive dogs and for owners of reactive dogs who must formulate a training plan

of their own. Bet you never thought of doing this! Placing the dog in the family car at a distance from other "cars with dogs" to train. Controlling a wide range of variables including distance from others, movement, and weather. Using "running away" as a reward for tolerating scary stimuli. Working with one dog at a time--and using that dog's presence to desensitize dogs in the

class. BONUS! Glossary of Terms and Concepts that will help you understand and apply the information in this book as well as other books on canine behavior and training. What dog trainers are saying about Ali Brown's Focus Not Fear! Ali Brown, solidly in the camp of positive trainers, presents a comprehensive description of her experiences with her canine clients and their humans

during an ongoing reactive dog class. This detailed narration, which covers a six-month period, offers useful and interesting observations and information for anyone interested in learning more about reactive dogs and how to work with them. Pat Miller author Power of Positive Dog Training and Positive Perspectives, Training Ed., Whole Dog Journal Focus Not Fear delivers a

detailed and thought provoking look at the journey of a group of students in a reactive dog class ... This book provides not only great tips and structure for trainers interested in creating their own reactive dog class but also good solid advice for owners of reactive dogs. And it makes me jealous that I don't live on a farm! Leslie McDevitt, Author of Control Unleashed: Creating a Focused and

Confident Dog Author Ali Brown teaches all levels of family dog training and has been running ongoing reactive classes since 2002. Her previous book and DVD, Scaredy Dog! Understanding and Rehabilitating Your Reactive Dog, have become standard references for fearful and reactive dog trainers and owners everywhere. Ali has a M. Ed. with a specialty in behavioral

science and is a Certified Pet Dog Trainer. She also competes in Rally-O and Agility. Ali lives with her husband and two dogs on a farm-turned training school "Great Companions" in central Pennsylvania. Note: CD-ROM/DVD and other supplementary materials are not included.
