Since its independence in the nineteenth century, the South American state of Colombia has been shaped by decades of bloody political violence. In *The Para-State*, Aldo Civico draws on interviews with paramilitary death squads and drug lords to provide a cultural interpretation of the country's history of violence and state control. Between 2003 and 2008, Civico gained unprecedented access to some of Colombia's most

notorious leaders of the death squads. He also conducted interviews with the victims of paramilitary, with drug kingpins, and with vocal public supporters of the paramilitary groups. Drawing on the work of Deleuze and Guattari, this riveting work demonstrates how the paramilitaries have in essence become a war machine deployed by the Colombian state to control and maintain its territory and political legitimacy.

The “language-communication-society” triangle defies traditional scientific approaches. Rather, it is a phenomenon that calls for an integration of complex, transdisciplinary perspectives, if we are to make any progress in understanding how it works. The highly diverse agents in play are not merely cognitive and/or cultural, but also emotional and behavioural in their specificity. Indeed, the effort may require building a theoretical and methodological body of knowledge that can effectively convey the characteristic properties of phenomena in human terms. New complexity approaches allow us to rethink our limited and mechanistic images of human societies and create more appropriate emotion-cognitive dynamic and holistic models. We have to enter into dialogue with the complexity views coming out of other more ‘material’ sciences, but we also need to take steps in the linguistic and psycho-sociological fields towards creating perspectives and concepts better fitted to human characteristics. Our understanding of complexity is different – but not opposed – to the one that is more commonly found in texts written by people working in physics or computer science, for example. The goal of this book is to extend the knowledge of these other more ‘human’ or socially oriented perspectives on complexity, taking account of the language and communication singularities of human agents in society. This book explores how using small groups in second language classrooms supports language learning. Chappell's experience as a language teacher equips him to present a clear, evidence-based argument for the powerful influence group work has upon the opportunities for learning, and how it should therefore be an integral part of language lessons.

Critical Multicultural Social Work is the first book to explore multicultural practice from a critical perspective. The authors provide tools and techniques that enable readers to recognize their own perspectives and find meaning and importance in what they learn. The text examines oppression and diversity across multiple dimensions, including race and ethnicity, gender, sex and sexual orientation, and ability/disability. In addition to presenting the history of diversity as well as a basic framework for evaluating the issue, the authors guide practitioners through enlightened self-reflection to encourage awareness and sensitivity as they work with clients.

What can human bones tell us of a person's life, or even death? How can information from bones solve mysteries both modern and ancient? And what makes the study of skeletonised human remains so imperative in southern Africa? The answers to these and other questions are contained in *Missing & Murdered*, which lays bare the fascinating world of forensic anthropology. As the popularity of TV programmes such as the CSI trilogy and *Silent Witness* attests, people are fascinated by forensic science as a means of solving crimes, and in this book Alan G. Morris follows the pathway into forensics via the fields of anthropology and anatomy. He makes the practice of forensic anthropology, the skills base of skeletal biology and the study of archaeological skeletons hugely accessible to the layperson in a series of fascinating cases, from muti murders and political killings to the work of the Missing Persons Task Team. An informative, original and engrossing read from one intriguing chapter to the next.

What marks, principles, and values from our study of Jesus can guide our reflections about the church and its witness in a world of economic injustice? What kinds of principles ought to be part of an ecclesiology in a world where family violence is epidemic? So asks author James Poling in his exploration of the role of faith and religious practice as a resource for those who are economically vulnerable to domestic violence. In this groundbreaking work, Poling focuses his research on women and children in working-class and poor communities of three cultures, analyzing the forces that define and sustain economic vulnerability and detailing how such vulnerability affects the daily lives of people within these communities. He looks at how the

church can function as a source of healing and empowerment for persons who are trapped by domestic violence and economic vulnerability and develops models for prevention of violence and of practical ministry for pastoral care of the victims and perpetrators.

An intergenerational story of family ties, cultural pride, and spelling bee victory following a young boy who bonds with his beloved abuela over a love of Spanish. As a boy prepares for his school's Spanish spelling bee, he asks his grandmother for help with some of the words he doesn't know how to spell yet. When she studies with him, she tells him how different things were back when she was a girl, when she was only allowed to speak English in school. This only inspires him to study even harder and make his family proud. Based on stories author Michael Genhart heard from his mother as a child, Spanish is the Language of My Family is about the joy of sharing cultural heritage with our families, inspired by the generations of Latino people were punished for speaking Spanish and the many ways new generations are rejuvenating the language.. Michael Genhart's text is as touching as it is poignant, and it's paired with the striking artwork of multiple Pura Belpre Award-Winning Illustrator John Parra. This illustrated book shows how "thinking" systems offer new ways of seeing people which can help us see and do things differently. The authors describe how a theory of living human systems was developed and even recently revised. This major revision led to a theory of the person-as-a-system and its role-systems map that helps us see which system in us and in others is running the show. The authors illustrate how life force energy fuels the hierarchy of living human systems and how theory and practice with role-systems can be useful in everyday life. They begin with describing how they have used the new illustrations as a map to locate the contexts of our roles. Using this map has also enabled the authors to identify the role-systems and explore the territory of ourselves and our groups in new ways that deepened our understanding of roles and role locks. This book illustrates systems-centered therapy and training (SCT) theory by offering a practical theory to guide group psychotherapists, leaders and consultants in working with group dynamics.
