Ellie Martin fiercely resists her new dog's charms It isn't Ellie's fault, really. She's always wanted a puppy, and now that she's almost nine, finally old enough to get one, Preston is foisted on her. What's more, her parents say that this fully grown mutt that Great-aunt Margaret can no longer keep will have to do. They can't very well have a dog and a puppy. Although heartbroken and resentful, Ellie does see Preston's virtues. Still, she refuses to accept him as her dog. Then Ellie's resistance almost costs her Preston, and at last she embraces him. Colby Rodowsky's story about a child's change of heart has just enough tenderness -- and just enough bite -- to satisfy young dog lovers. Captivating

drawings by Thomas F. Yezerski highlight the experience.

A young bilingual immigrant meanders through her city park, translating for her beloved dog, in a heartwarming picture book debut. When Aurora came to the United States, she learned to speak English. But her spaniel, Nena, did not. Sweet Nena loves to give besos, and she knows only Spanish. She doesn't know SIT, but she does know SIÉNTATE. She doesn't know WAIT, but she does know ESPERA. And while TREAT doesn't mean anything to Nena, she can certainly sniff out a POSTRE! At the park, Nena may not know what the other dog owners are saying, but she and Aurora will always understand each other just fine. Borrowing from her lived experience, Venezuelan-American author-illustrator Andrea Cáceres offers a gentle, charmingly illustrated ode to love that extends a hand—or a paw—to readers who may feel displaced or are learning a new language themselves.

"Based on the latest findings in the field of canine cognition and behavior, this book is an invaluable resource." —Hal Herzog, author of *Some We Love, Some We Hate, Some We Eat: Why It's So Hard To Think Straight About Animals* Every dog owner knows that along with the joy can come the stress and frustration of behavioral problems, which are expensive to diagnose and treat. Enter Kim Brophey, award-winning canine behavior consultant. Using cutting-edge research, Brophey has developed a groundbreaking system that allows owners to identify what their dog is struggling with, why, and how they can fix it. Brophey's approach is unlike anything that has been published before and will give dog owners a new understanding of what motivates and affects their dog's behavior. This innovative technique rethinks the way we categorize dogs, and distills information from over twenty scientific disciplines into four comprehensive elements: learning, environment, genetics, and self. With revolutionary tips for specific dog breeds, this book will change dog owners' lives—and lead to happier human-canine relationships. "It's refreshing to finally find a book that takes into consideration the many predispositions to behavior problems in dogs . . . teaches us to really see the dog in its entirety." —Alexandre Rossi, author of

In this wonderfully inventive book, Bella is taking her dog for a stroll across the page but halfway across, he disappears! Unable to quite believe what's just happened Bella watches, transfixed, with changing emotions of surprise, indignation, moments of renewed hope (as the authorities arrive to take control) followed by shock (as they too succumb to the book's inexplicable behaviour) and finally action when Bella marches toward the dangerous middle of the book . . . only to disappear herself! At this point, the book has consumed its characters and it's down to the reader to step in to help. A note from Bella appears directly appealing for assistance and, with a rigorous shake, the characters reappear. Normality is restored and Bella is finally able to take her dog for an uninterrupted walk . . . or is she?!

"When you start training your dog (or dating a man), it is a good idea to have three bottom-line rules that you enforce no matter what . . ." DOGS No sleeping on the bed. No jumping up on people. No eating people's food. MEN Be consistent. Have a sense of humor. Be financially self-sufficient. Hilarious, insightful, witty, and wise, Clare Staples is saying what most women have been thinking. And in *Everything I Know About Men I Learned From My Dog*, the former model and party girl turned relationship expert proves that what works for the four-legged companion in a woman's life can work equally well for the two-legged variety. Divided into immediately evident categories, such as "Selecting a Breed" and "How to Stay the Boss," and packed with good-humored observations and practical advice, *Everything I Know About Men I Learned From My Dog* is the perfect field guide to any girl's two most complicated companions -- her dog and her man. From choosing the right personality to figuring out your companion's quirks and idiosyncrasies, dog ownership and human relationships can be complex affairs. What do you do when he bares his teeth or is a little clingy? How do you reward him when he is good and scold him when he is naughty? With Clare Staples's simple, clever tips, your relationships with both species will be happier and more successful. DON'T GO FOR LOOKS MAN: Handsome men are never a great bet. Often they have learned to rely on their looks and have not had to develop a personality or sense of humor -- far more important qualities. DOG: Don't

choose a dog for looks alone. Looks are only skin-deep -- loyalty, devotion, and eagerness to please and unconditional love are the most wonderful things. DON'T CHANGE YOUR LIFESTYLE MAN: When you first meet your man, don't change anything for him. Don't give up your friends or hobbies. Never cancel anything to be with him. DOG: When you first get a dog, chances are he will whine when you leave him alone, but he'll get used to it and appreciate you more when you spend quality time with him. GIVE POSITIVE REWARDS MAN: When your man does something that you like -- such as brings you a present -- reward him. Give him a treat, spoil him. DOG: All dogs love praise. Train a dog with positive rewards for positive behavior.

Highlighting the dangers of modern pet food--how it is unbalanced, creates addiction, and often contains ingredients that can literally poison your pet, this book destroys the myths propounded by pet food companies that human food is bad for pets, and that natural food diets are unsafe. Three veterinarians share their expertise and scientific evidence, providing an in-depth appraisal of the pet food industry and what people are feeding to their cats and dogs. This revolutionary book teaches how to read pet food labels and what ingredients to avoid, how to save on pet bills by preventing diet-related disease in pets, why veterinarians are often ignorant of the health effects of manufactured pet food, how a change in diet can cure many diet-related illnesses, and why organic farming practices and suppliers can be the best choice for pets. Armed with this information, people will be able to provide a better and healthier life for their animals.
