Mark Dodd arrived in Broome in 1978 as a 20-year-old looking for adventure, after working his way across northern Australia. There he fell in with the crew of the fabled DMcD, one of the last of the old wooden pearling luggers that still worked the Kimberley coast diving for pearl shell. He came aboard as a deckhand before graduating to become one of the pearl shell divers. He dived for four seasons, living a life on the luggers and in the pubs and exotic alleys of Broome that would have been recognisable to pearl divers for 100 years before, but has now sadly disappeared forever. His book is both an adventure and a wonderfully nostalgic account of an industry and a way of life that has gone forever.

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.
