They want to shut you up. But don't let this be the End of Discussion. In this fresh and provocative new book, Mary Katharine Ham and Guy Benson, dynamic Fox News and Townhall Media duo, expose how the Left exploits fake outrage to silence their political opponents—in public, on social media, at work, and even in their own homes. You've felt it and "End of Discussion" can help you fight it. The political correctness born on college campuses has mutated into a new hypersensitivity. It's weaponized in Washington, D.C. by a network of well-trained operatives, media, and politicians, and proliferated throughout the country. The new Puritans of the Left are quick to ban comedians and commencement speakers alike for the sin of disagreeing with them. They demand "safe spaces" while making dissent increasingly dangerous for Americans. Ham and Benson demonstrate just how dangerous the outrage industry—a coalition of mostly liberal blowhards and busybodies—is to America. The media frenzy they create is designed to disqualify opposing viewpoints on everything from health care to education by labeling them racist, sexist, and evil. They punish speech that makes them uncomfortable, demanding boycotts, censures, and people's jobs. They seek to win political and cultural debates by preventing them from happening. And if you think this behavior is relegated to political fights or politicians, think again. The same activists are ready to foment outrage over your association with the "wrong" fried chicken joints, Internet browsers, breast cancer charities, pasta, children's toys, Halloween costumes, TV shows, schools, and even comedians' jokes. With Ham and Benson's help, readers can cut through the noise and find their voices again, fighting back against the rampant self-censorship and hair-trigger apologies that always make things worse, not better. With fresh reporting and insightful, occasionally tongue-in-cheek analysis, End of Discussion is a timely handbook for anyone who wants to make sure debate doesn't meet an ugly death.

According to the media, Donald Trump could never become president. Now many are on a mission to prove he shouldn't be president. The Trump administration and the press are at war—and as in any war, the first casualty has been truth. Bestselling author Howard Kurtz, host of Fox News's Media Buzz and former Washington Post columnist, offers a stunning exposé of how supposedly objective journalists, alarmed by Trump's success, have moved into the opposing camp. Kurtz's

exclusive, in-depth, behind-the-scenes interviews with reporters, anchors, and insiders within the Trump White House reveal the unprecedented hostility between the media and the president they cover. In *Media Madness*, you'll learn: Why White House strategist Steve Bannon told Trump he is in danger of being impeached How the love-hate relationship between the president and Morning Joe hosts—Joe Scarborough and Mika Brzezinski—turned entirely to hate How Kellyanne Conway felt betrayed by journalists who befriended her—and how she fought back How elite, mainstream news reporters—named and quoted—openly express their blatant contempt for Trump How Bannon tried to block short-lived Communications Director Anthony Scaramucci—and why Trump soured on him How Ivanka and Jared Kushner aren't the liberals the pundits want them to be—and why Trump tried to discourage them from joining the White House Why Trump believes some journalists harbor hatred for him—and how some liberals despise his voters How Trump is a far more pragmatic politician than the press often acknowledges (and how the press dismisses his flip-flops when he flops their way) What Trump got wrong about Charlottesville—and how Steve Bannon predicted the debacle How the media consistently overreached on the Russian "collusion" scandal Why Trump actually likes journalists, secretly meets with them, and allows the press unprecedented access Why Reince Priebus couldn't do his job—and the real reason he left the White House How Sean Spicer privately berated journalists for bad reporting—and why he and Kellyanne Conway were relentlessly attacked by the media Never before has there been such an eye-opening, shocking look at what the White House and the media think about each other. It's not pretty. But it also makes for the most important political book of the year.

The Case Against Barack Obama by National Review's David Freddoso blasts Obama for failing to take on the Chicago machine, for listening to "radical advisors," and for backing "doctrinaire liberal" causes from teachers unions to abortion rights. It does not, however, compare him to Paris Hilton, or dwell at length on his religion or race - making the substance of *The Case Against Barack Obama* sound unfamiliar amid a campaign cacophony of hyperbolic web ads, alleged race cards, and viral smears. Freddoso says John McCain's campaign and Republicans at large are making the wrong case against the Illinois senator. You don't beat him by comparing him to Paris Hilton, as McCain's latest advertising campaign did; the more important thing is really to look at who he is. Is he really a great reformer? Or just another liberal?

The Boys on the Bus Princeton University Press

A shocking and deeply reported account of the persistent plague of institutional racism and junk forensic science in our criminal justice system, and its devastating effect on innocent lives After two three-year-old girls were raped and murdered in rural Mississippi, law enforcement pursued and convicted two innocent men: Kennedy Brewer and Levon Brooks. Together they spent a combined thirty years in prison before finally being exonerated in 2008. Meanwhile, the real killer remained free. The Cadaver King and the Country Dentist recounts the story of how the criminal justice system allowed this to happen, and of how two men, Dr. Steven Hayne and Dr. Michael West, built successful careers on the back of that structure. For nearly two decades, Hayne, a medical

examiner, performed the vast majority of Mississippi's autopsies, while his friend Dr. West, a local dentist, pitched himself as a forensic jack-of-all-trades. Together they became the go-to experts for prosecutors and helped put countless Mississippians in prison. But then some of those convictions began to fall apart. Here, Radley Balko and Tucker Carrington tell the haunting story of how the courts and Mississippi's death investigation system -- a relic of the Jim Crow era -- failed to deliver justice for its citizens. The authors argue that bad forensics, structural racism, and institutional failures are at fault, raising sobering questions about our ability and willingness to address these crucial issues.

A New York Times Bestseller A Wall Street Journal Bestseller A New York Times Notable Book of 2020 A New York Times Book Review Editors' Choice Shortlisted for the Financial Times and McKinsey Business Book of the Year A New Statesman Book to Read From economist Anne Case and Nobel Prize winner Angus Deaton, a groundbreaking account of how the flaws in capitalism are fatal for America's working class Deaths of despair from suicide, drug overdose, and alcoholism are rising dramatically in the United States, claiming hundreds of thousands of American lives. Anne Case and Angus Deaton explain the overwhelming surge in these deaths and shed light on the social and economic forces that are making life harder for the working class. As the college educated become healthier and wealthier, adults without a degree are literally dying from pain and despair. Case and Deaton tie the crisis to the weakening position of labor, the growing power of corporations, and a rapacious health-care sector that redistributes working-class wages into the pockets of the wealthy. This critically important book paints a troubling portrait of the American dream in decline, and provides solutions that can rein in capitalism's excesses and make it work for everyone.

Every child in America deserves to know that a path to a successful life exists and that they have the power to follow it. But many never set foot on that path because they grow up hearing the message that systemic forces control their destinies, or that they are at fault for everything that has gone wrong in their lives. These children often come from difficult circumstances. Many are raised by young, single parents, live in disadvantaged neighborhoods, attend substandard schools, and lack the moral safeguards of religious and civic institutions. As a result, they can be dispirited into cycles of learned helplessness rather than inspired to pursue their own possibilities. Yet this phenomenon is not universal. Some children thrive where others do not. Why? Are there personal behaviors and institutional supports that have proven to make a difference in helping young people chart a course for their futures? Agency answers with a loud and clear "yes!" This book describes four pillars that can uplift every young person as they make the passage into adulthood: Family, Religion, Education, and Entrepreneurship. Together, these pillars embody the true meaning of freedom, wherein people are motivated to embrace the ennobling responsibilities of building healthy social structures and shaping the outcomes of their own lives. For that reason, Ian Rowe calls the four pillars the FREE framework. With this framework in place, children are empowered to develop agency, which Rowe defines as the force of one's free will, guided by moral discernment. Developing agency is the alternative to the debilitating 'blame-the-system' and 'blame-the-victim' narratives. It transcends our political differences and beckons all who dare to envision lives unshackled by present

realities. In addition to making the case for agency, Rowe shares his personal story of success coming from an immigrant family. He defends America as an ever-improving country worthy of our esteem. He corrects misguided calls for "anti-racism" and "equity," and champions a game plan for creating new agents of agency, dedicated to promoting the aspirational spirit of America's children, and showing them the path that will set them FREE.

*The Republican Workers Party Profile Books*

The 2016 Election, which altered American political history, was not decided by the Russians or in Ukraine or by Steve Bannon. The event that broke Hillary's blue wall in the Midwest and swung Florida and North Carolina was an October Surprise, and it was wholly a product of the leadership of the FBI. This is the inside story by the reporter closest to its center. In September 2016, Hillary Clinton was the presumptive next president of the US. She had a blue wall of states leaning her way in the Midwest, and was ahead in North Carolina and Florida, with a better than even shot at taking normally Republican Arizona. The US was about to get its first woman president. Yet within two months everything was lost. An already tightening race saw one seismic correction: it came in October when the FBI launched an investigation into the Clinton staff's use of a private server for their emails. Clinton fell 3-4 percent in the polls instantly, and her campaign never had time to rebut the investigation or rebuild her momentum so close to election day. The FBI cost her the race. October Surprise is a pulsating narrative of an agency seized with righteous certainty that waded into the most important political moment in the life of the nation, and has no idea how to back out with dignity. So it doggedly stands its ground, compounding its error. In a momentous display of self-preservation, James Comey, Andrew McCabe, and key Justice Department officials decide to protect their own reputations rather than save the democratic process. Once they make that determination, the race is lost for Clinton, who is helpless in front of their accusation even though she has not intended to commit, let alone actually committed, any crime. A dark true-life thriller with historic consequences set at the most crucial moment in the electoral calendar, October Surprise is a warning, a morality tale and a political and personal tragedy.

*The Smallest Minority Princeton University Press*

It is one of our most honored clichés that America is an idea and not a nation. This is false. America is indisputably a nation, and one that desperately needs to protect its interests, its borders, and its identity. The Brexit vote and the election of Donald Trump swept nationalism to the forefront of the political debate. This is a good thing. Nationalism is usually assumed to be a dirty word, but it is a foundation of democratic self-government and of international peace. National Review editor Rich Lowry refutes critics on left and the right, reclaiming the term "nationalism" from those who equate it with racism, militarism and fascism. He explains how nationalism is an American tradition, a thread that runs through such diverse leaders as Alexander Hamilton, Teddy Roosevelt, Martin Luther King, Jr., and Ronald Reagan. In The Case for Nationalism, Lowry explains how nationalism was central to the American Project. It fueled the American Revolution and the ratification of the Constitution. It preserved the country during the Civil War. It led to the expansion of the American nation's territory and power, and eventually to our invaluable contribution to creating an international system of self-governing nations. It's time to recover a healthy American nationalism, and especially a cultural nationalism that insists on the assimilation of immigrants and that protects

our history, civic rituals and traditions, which are under constant threat. At a time in which our nation is plagued by self-doubt and self-criticism, *The Case for Nationalism* offers a path for America to regain its national self-confidence and achieve continued greatness.

Cheap booze. Flying fleshpots. Lack of sleep. Endless spin. Lying pols. Just a few of the snares lying in wait for the reporters who covered the 1972 presidential election. Traveling with the press pack from the June primaries to the big night in November, Rolling Stone reporter Timothy Crouse hopscotched the country with both the Nixon and McGovern campaigns and witnessed the birth of modern campaign journalism. *The Boys on the Bus* is the raucous story of how American news got to be what it is today. With its verve, wit, and psychological acumen, it is a classic of American reporting. NOTE: This edition does not include photographs.

Dr. Tim Groseclose, a professor of political science and economics at UCLA, has spent years constructing precise, quantitative measures of the slant of media outlets. He does this by measuring the political content of news, as a way to measure the PQ, or "political quotient" of voters and politicians. Among his conclusions are: (i) all mainstream media outlets have a liberal bias; and (ii) while some supposedly conservative outlets—such the Washington Times or Fox News' Special Report—do lean right, their conservative bias is less than the liberal bias of most mainstream outlets. Groseclose contends that the general leftward bias of the media has shifted the PQ of the average American by about 20 points, on a scale of 100, the difference between the current political views of the average American, and the political views of the average resident of Orange County, California or Salt Lake County, Utah. With Left Turn readers can easily calculate their own PQ—to decide for themselves if the bias exists. This timely, much-needed study brings fact to this often overheated debate.

This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only

do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

Left Turn Bold Type Books

This book acts as a battering ram against the distortions, myths and outright lies that have been shoved down our throats by the government, the media, corporations, organized religion, the scientific establishment and others who want to keep the truth from us. A group of researchers - investigative reporters, political dissidents, academics, media watchdogs, scientist-philosophers, social critics and rogue scholars - paints a picture of a world where crucial stories are ignored or actively suppressed and the official version of events has more holes in it than Swiss cheese. A world where real dangers are downplayed and nonexistent dangers are trumpeted. In short, a world where you are being lied to. You'll discover that a human being has already been cloned; Joseph McCarthy was not paranoid; museums refuse to display artifacts that conflict with the theory of evolution; the CIA has admitted to involvement in the drug trade; parents don't affect who their children become; plus further revelations involving Columbine, WWII, textbooks, Al Gore, George W. Bush, Timothy Leary and much more.

The Republican Workers Party is the future of American presidential politics, says F.H. Buckley. It's a socially conservative but economically middle-of-the-road party, offering a way back to the land of opportunity where our children will have it better than we did. That is the American Dream, and Donald Trump's promise to restore it is what brought him to the White House. As a Trump speechwriter and key transition advisor, Buckley has an inside view on what "Make America Great Again" really means—how it represents a program to restore the American Dream as well as a defense of nationalism rooted in a sense of fraternity with all fellow Americans. The call to greatness was a repudiation of the cruel hypocrisy of America's New Class, the dominant 10 percent who deploy the language of egalitarianism while jealously guarding their own privileges. The New Class talks like Jacobins but behaves like Bourbons. Its members claim to support equality and social mobility, but resist the very policies that promote mobility and equality: a choice of good schools for everyone's children, not just the well-to-do; a sensible immigration policy that doesn't benefit elites at the expense of average Americans; and regulatory reform to trim back the impediments that

frustrate competitive enterprise. It isn't complicated. What's been lacking is political will. This book pulls no punches in describing how liberals and conservatives had become indifferent to those left behind. On the left, identity politics offered an excuse to hate an ideological enemy. On the right, a tired conservatism defined itself through policies that callously ignored the welfare of the bottom 90 percent. Trump told us that both Left and Right had betrayed the American people, and his Republican Workers Party promises to renew the American Dream. Buckley shows how it will do so.
