"Strategic Brand Management" deals with the concept and practice of brand management in its totality. The new edition is packed with fresh examples and case studies of brands from throughout the world, and pays particular attention to the development of global brands. Three new

chapters have been included which concentrate on the life span of brands by looking at: the sources of challenges to brand equity; factors which dictate a brand's life expectancy; and revitalisation strategies for declining brands. More attention is now given to multi-brand strategies and there is a new chapter on the growing practice of merging brands. Given the increasing attention paid to brands by the business to business sector, the service sector and producers of luxury goods, much more reference is made to these markets.

Bleach, Vol. 57 United Nations Publications Japanese woodblock prints, or ukiyo-e, are the most recognizable Japanese art form. Their massive popularity has spread from Japan to be embraced by a worldwide audience. Unlike previous examinations of this art form, Japanese Woodblock

Prints includes detailed histories of the publishers of woodblock prints—who were often the driving force determining which prints, and therefore which artists, would make it into mass circulation for a chance at critical and popular success. Invaluable as a guide for ukiyo-e enthusiasts looking for detailed information about their favorite Japanese woodblock print artists and prints, it is also an ideal introduction for newcomers to the world of the woodblock print. This lavishly illustrated book will be a valued addition to the libraries of scholars, as well as the general art enthusiast.

Along the streets of Manhattan, a young Nigerian doctor named Julius doing his residency wanders aimlessly. The walks are a release from the tightly regulated mental environment of work, and they give him the opportunity to process his relationships, his recent breakup, his present, his past. Though he’s navigating the busy parts of town, the impression of countless faces does nothing to assuage his feelings of isolation. Julius crisscrosses social territory as well, encountering people from different cultures and classes who provide insight on his journey—which takes him to Brussels, to the Nigeria of his youth, and into the most unrecognizable facets of his own soul. Seething with intelligence and written in a clear, rhythmic voice, *Open City* is a haunting, mature, profound work about our country and our world. This book attempts a coherent portrait of the heart of Japan's economic and political decision making. It presents the men occupying the core positions in Japan's ruling party, the central ministries, and in big business and its organizations. Elite career patterns, social origins, upbringing, university education, cognitive orientations and ways of life are reviewed, as are the interactions in the exclusive world of Japan's increasingly hereditary and bureaucratic class of power holders in conservative politics and big business.

Experience Sam Sykes' incredible Aeons' Gate trilogy together in one volume. There are only a few productive things a

man can do once he picks up a sword. And the very lowest of these is to become an adventurer, like Lenk and his companions. For the right price, no deed is too dirty, no task is too dangerous, no foe too ferocious. Not even a demon. From wars ancient and terrible, wounds are bleeding. From seas deep and fathomless, demons are rising. From the mouth of hell, the Kraken Queen is calling. And all that stands between the damned and the mortal world are a pack of degenerates and the steel they carry. Seas will rise. Heaven will fall.

"Satoyama" is a Japanese term describing mosaic landscapes of different ecosystems--secondary forests, farm lands, irrigation ponds and grasslands--along with human settlements managed to produce bundles of ecosystem services for human wellbeing. The concept of "satoyama," longstanding traditions associated with land management practices that allow sustainable use of natural

resources, has been extended to cover marine and coastal ecosystems ("satoumi"). These landscapes and seascapes have been rapidly changing, and the ecosystem services they provide are under threat from various social, economic, political, and technological factors. "Satoyama-Satoumi Ecosystems and Human Well-Being" presents the findings of the Japan Satoyama Satoumi Assessment (JSSA), a study of the interaction between humans and ecosystems in Japan. It was written by the 200-plus authors, stakeholders, and reviewers from Japan and elsewhere who make up the JSSA team. The study analyzes changes that have occurred in "satoyama-satoumi" ecosystems over the last 50 years and identifies plausible future scenarios for the year 2050, taking into account various drivers such as governmental and economic policy, climate change, technology, and sociobehavioral responses. This provides a new approach to land-use planning that addresses not only economic development but also cultural values and

ecological integrity. This book is a key reference text for development planners, policymakers, scientists, postgraduate students, and others interested in the environment and development.

As the financial services industry becomes increasingly international, the more narrowly defined and historically protected national financial markets become less significant. Consequently, financial institutions must achieve a critical size in order to compete. *Bank Mergers & Acquisitions* analyses the major issues associated with the large wave of bank mergers and acquisitions in the 1990's. While the effects of these changes have been most pronounced in the commercial banking industry, they also have a profound impact on other financial institutions:

insurance firms, investment banks, and institutional investors. Bank Mergers & Acquisitions is divided into three major sections: A general and theoretical background to the topic of bank mergers and acquisitions; the effect of bank mergers on efficiency and shareholders' wealth; and regulatory and legal issues associated with mergers of financial institutions. It brings together contributions from leading scholars and high-level practitioners in economics, finance and law.

This is a study of Malaysia's new political economy, with a focus on ownership and control of the corporate sector. It offers a pioneering assessment of government-linked investment companies (GLICs), a type of state-owned institution that has long prevailed in the corporate sector but has not been analysed. Malaysia's history of government-business ties is unique, while the nature of the nexuses between the state and the corporate sector has undergone major transitions. Corporate power has shifted from the hands of foreign firms to the state to the ruling party, and well-connected businessmen, and back to the state. Corporate wealth is now heavily

situated in the leading publicly-listed government-linked companies (GLICs), controlled through block shareholdings by a mere seven GLICs under the jurisdiction of the Minister of Finance. To indicate why these GLICs are important actors in Corporate Malaysia, this study provides a deep assessment of their ownership and control of Bursa Malaysia's top 100 publicly-listed enterprises.

The publication examines how six countries (Argentina, Mexico, Pakistan, Philippines, Ethiopia and Viet Nam) have been affected by the elimination of Trade-Related Investment Measures (TRIMs). The study suggests that the extent to which TRIMs have helped advance the objectives set out has varied considerably, reflecting the specific economic conditions and policy environment of the country using them.
