This introductory text, written from a conflict perspective, emphasizes four themes: diversity, the struggle by the powerless to achieve social justice, the changing economy, and globalization.
Love, Money, and HIV
Courier Corporation

A modern classic from the Booker-shortlisted author of *This Mournable Body*
The groundbreaking first novel in Tsitsi Dangarembga's award-winning trilogy, *Nervous Conditions*, won the Commonwealth Writers Prize and has been "hailed as one of the 20th century's most significant works of African literature" (The New York Times). Two decades before Zimbabwe would win independence and

ended white minority rule, thirteen-year-old Tambudzai Sigauke embarks on her education. On her shoulders rest the economic hopes of her parents, siblings, and extended family, and within her burns the desire for independence. She yearns to be free of the constraints of her rural village and thinks she's found her way out when her wealthy uncle offers to sponsor her

schooling. But she soon learns that the education she receives at his mission school comes with a price.

Strangers in Their Own Land Penguin

The New York Times bestselling work of undercover reportage from our sharpest and most original social critic, with a new foreword by Matthew Desmond, author of *Evicted* Millions of Americans work full time, year round, for poverty-level wages. In 1998, Barbara Ehrenreich decided to join them. She

was inspired in part by the rhetoric surrounding welfare reform, which promised that a job—any job—can be the ticket to a better life. But how does anyone survive, let alone prosper, on \$6 an hour? To find out, Ehrenreich left her home, took the cheapest lodgings she could find, and accepted whatever jobs she was offered. Moving from Florida to Maine to Minnesota, she worked as a waitress, a hotel maid, a cleaning woman, a nursing-home aide, and a Wal-Mart sales clerk. She

lived in trailer parks and crumbling residential motels. Very quickly, she discovered that no job is truly "unskilled," that even the lowliest occupations require exhausting mental and muscular effort. She also learned that one job is not enough; you need at least two if you int to live indoors. *Nickel and Dimed* reveals low-rent America in all its tenacity, anxiety, and surprising generosity—a land of Big Boxes, fast food, and a thousand desperate stratagems for survival.

Read it for the smoldering clarity of Ehrenreich's perspective and for a rare view of how "prosperity" looks from the bottom. And now, in a new foreword, Matthew Desmond, author of *Evicted: Poverty and Profit in the American City*, explains why, twenty years on in America, *Nickel and Dimed* is more relevant than ever. *Quasi-Religions* Oxford University Press, USA Using engaging stories and a diverse cast of characters, Lisa Wade memorably delivers what

C. Wright Mills described as both the terrible and the magnificent lessons of sociology. With chapters that build upon one another, *Terrible Magnificent Sociology* represents a new kind of introduction to sociology. Recognizing the many statuses students carry, Wade goes beyond race, class, and gender, considering inequalities of all kinds—and their intersections. She also highlights the remarkable diversity of sociology, not only of its methods and approaches but also of

the scholars themselves, emphasizing the contributions of women, immigrants, and people of color. The book ends with an inspiring call to action, urging students to use their sociological imaginations to improve the world in which they live. *Nickel and Dimed* Random House Trade Paperbacks *Introduction to American Deaf Culture* provides a fresh perspective on what it means to be Deaf in contemporary hearing society. The book offers an overview of Deaf art,

literature, history, and humor, and touches on political, social and cultural themes.

Named one of the most important nonfiction books of the 21st century by Entertainment Weekly, Slate, Chronicle of Higher Education, Literary Hub, Book Riot, and Zora A tenth-anniversary edition of the iconic bestseller—"one of the most influential books of the past 20 years," according to the Chronicle of Higher Education—with

a new preface by the author "It is in no small part thanks to Alexander's account that civil rights organizations such as Black Lives Matter have focused so much of their energy on the criminal justice system." —Adam Shatz, London Review of Books Seldom does a book have the impact of Michelle Alexander's *The New Jim Crow*. Since it was first published in 2010, it has been cited in judicial decisions and has been adopted in campus-wide and community-wide reads; it helped inspire

the creation of the Marshall Project and the new \$100 million Art for Justice Fund; it has been the winner of numerous prizes, including the prestigious NAACP Image Award; and it has spent nearly 250 weeks on the New York Times bestseller list. Most important of all, it has spawned a whole generation of criminal justice reform activists and organizations motivated by Michelle Alexander's unforgettable argument that "we have not ended racial caste in America; we have merely

redesigned it." As the Birmingham News proclaimed, it is "undoubtedly the most important book published in this century about the U.S." Now, ten years after it was first published, The New Press is proud to issue a tenth-anniversary edition with a new preface by Michelle Alexander that discusses the impact the book has had and the state of the criminal justice reform movement today.

The Time Bind Columbia University Press
 When Betty Friedan produced *The Feminine Mystique* in 1963, she

could not have realized how the discovery and debate of her contemporaries' general malaise would shake up society. Victims of a false belief system, these women were following strict social convention by loyally conforming to the pretty image of the magazines, and found themselves forced to seek meaning in their lives only through a family and a home. Friedan's controversial book about these women - and every woman - would ultimately set Second Wave

feminism in motion and begin the battle for equality. This groundbreaking and life-changing work remains just as powerful, important and true as it was forty-five years ago, and is essential reading both as a historical document and as a study of women living in a man's world.  Children from poor families generally do a lot worse than children from affluent families. They are more likely to develop behavior problems, to score lower on standardized tests, and to become adults in need of public assistance. Susan Mayer asks whether income directly affects children's life chances, as many experts believe, or if the factors that cause parents to have low

incomes also impede their children's life chances. She explores the question of causation with remarkable ingenuity. First, she compares the value of income from different sources to determine, for instance, if a dollar from welfare is as valuable as a dollar from wages. She then investigates whether parents' income after an event, such as teenage childbearing, can predict that event. If it can, this suggests that income is a proxy for unmeasured characteristics that affect

both income and the event. Next she compares children living in states that pay high welfare benefits with children living in states with low benefits. Finally, she examines whether national income trends have the expected impact on children. Regardless of the research technique, the author finds that the effect of income on children's outcomes is smaller than many experts have thought. Mayer then shows that the things families purchase as their income

increases, such as cars and restaurant meals, seldom help children succeed. On the other hand, many of the things that do benefit children, such as books and educational outings, cost so little that their consumption depends on taste rather than income. Money alone, Mayer concludes, does not buy either the material or the psychological well-being that children require to succeed. Simon and Schuster Revised edition of the authors' Introduction to

This fascinating book considers systems of belief and practice which are not religions in the full-blown sense, but which nevertheless affect human life in ways similar to the role played by the recognised religions. Professor Smith's thorough account compares the features which Humanism, Marxism and Nationalism

share with recognised religions, analysing each in turn, and asks whether there is not always a threat of the demonic when any contingent reality - man, the economic order, or the state - is made absolute. *The Feminine Mystique* Houghton Mifflin Harcourt
 Three basic premises guide this highly successful introductory text - first that theory and research must be both comprehensive and clear, second that the text must show how sociology is relevant both to the study

of society and to students' lives and third that sociology can play a valuable role in teaching critical thinking skills. To that end, this solid, well respected text combines a balanced three-perspective approach with excellent student oriented examples, and distinctive social policy sections in a concise presentation that offers an alternative to full length books.

The Marriage-Go-Round illuminates the shifting nature of America's most

cherished social institution and explains its striking differences from marriage in other Western countries. Andrew J. Cherlin's three decades of study have shown him that marriage in America is a social and political battlefield in a way that it isn't in other developed countries. Americans marry and divorce more often and have more live-in partners than Europeans, and gay Americans have more interest in legalizing same-sex marriage. The difference comes from

Americans' embrace of two contradictory cultural ideals: marriage, a formal commitment to share one's life with another; and individualism, which emphasizes personal choice and self-development. Religion and law in America reinforce both of these behavioral poles, fueling turmoil in our family life and heated debate in our public life. Cherlin's incisive diagnosis is an important contribution to the debate and points the way to slowing down the partnership merry-go-

round. From the Trade Paperback edition. The Yellow Wallpaper Univ of California Press Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of its fast-food restaurants to standardize every aspect of service and product. Learning how to sell life insurance at a large midwestern firm, she is coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting "I

feel happy! I feel terrific!" Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their

jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the

belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome. Among the Hidden Xist Publishing Required Reading for every Feminist "I'm sure I never used to be so sensitive. I think it is due to this nervous condition."
