This text begins by linking the ACOTE Accreditation Standards with current practice in chapters for students and educators, and sets the stage with two foundational concepts vital to the study of occupation: flow and culture. It presents a summary of interconnected constructs that define and direct occupational therapy practice. Inside are included: Basic tenets of occupational therapy; Occupational therapy theoretical perspectives; Screening, evaluation, and referral; Formulation and implementation of an intervention plan; Context of service delivery; Context of delivery service; Management of occupational therapy services; Professional ethics, values, and responsibilities; Culture and its role in occupational choice and performance. It also includes student activities at the end of each chapter, as well as on-line material that consists of multiple choice questions, chapter objectives, teacher activities, and PowerPoint slides. Some additional features include: Examples as viewed and analyzed from multiple perspectives; Evidence-based practice reviews that provide a starting point to have each topic explored in depth; Evaluation of the mastery of application and self-assessment exercises; Integration throughout the text of Occupational Therapy Practice Framework: Domain and Process, Second Edition. The text overall incorporates adult learning theory as its basis to assist in establishing cognitive interest, using the organization format of grouping concepts together to reinforce and facilitate learning.

In this volume, international contributors discuss the philosophical basis and history of harm reduction policies and examine their outcomes. They also cover controversial topics related to harm reduction especially conflicts between the public health system, where most programs are located, and a worldwide criminal justice system that further marginalizes drug users. The book describes programs from the United States, the United Kingdom, Canada, Brazil, The Netherlands, Switzerland and Australia.

This book focuses on safer sex discussion and practice in close, personal relationships, emphasizing research on individuals in personal relationship types that are experiencing a rise in HIV infection and AIDS. Moving beyond studies of gay adult males and IV drug-users, this work paints a clear picture of the very real risk that exists for these less-studied, more general populations, so individuals may better personalize the risk and engage in more preventative measures. Authors Tara

M. Emmers-Sommer and Mike Allen examine issues surrounding safer sex, utilizing research that focuses on how individuals struggle with personalizing the HIV and AIDS risk and how they cope with safer sex issues. Safer Sex in Personal Relationships takes readers on a journey through a variety of close relationship types. It begins by highlighting awareness to the global enormity of HIV and AIDS and providing a link between the global and personal, and the need to make HIV and AIDS awareness part of everyday talk and personal relationship structure. It then focuses on: *safer sex in close relationships, both heterosexual and homosexual; *marital relationships and the importance of safe sex discussion and awareness in marriages; *HIV and AIDS from a multicultural perspective; *HIV and AIDS in aged populations; and *increasing awareness, understanding, and compassion of those living with HIV and AIDS. This book will appeal to scholars and students concerned with HIV and AIDS in personal relationships. It will be an invaluable text for courses on interpersonal communication and relationships; family, marital, human sexuality, sex and gender, gay and lesbian relationships, and sexual education; and relational conflict across communication, psychology, and sociology disciplines.

Praise for the Previous Edition: "This is a valuable resource for readers seeking basic to advanced information on measurement. It should be on the bookshelf of all researchers, and a requirement for graduate nursing students." Score: 100, 5 stars -- Doody's Medical Reviews "...this book is a wonderful shelf reference for nurse researcher mentors and investigators who may need to explore content or use content to design, test, select, and evaluate instruments and methods used in measuring nurse concepts and outcomes." --Clinical Nurse Specialist "Presents clearly the methodological principles for research planning in nursing with examples that facilitate the understanding of them. Excellent." 5.0 out of 5 stars --Nursing Research This highly popular resource—written in an easy-to-read style and format-- delivers everything nurses and other health researchers need to know about designing, testing, selecting, and evaluating instruments and methods for measurement in nursing. The Fifth Edition features the most current content, strategies, and procedures available with direct applicability to nurses and health researchers engaging in interprofessional research, collaboration, education, and evidence-based practice. Five new chapters focus on challenges to using big data, evaluation and measurement in interprofessional practice and education, metrics and benchmarking in health professions education and practice, and measurement issues in translational science. The book gives particular attention to measurement issues resulting from changes in nursing, health research, and the increased emphasis on and undertaking of interprofessional research and evaluation. Presenting the material in step-by-step format, the book is designed for readers with little or no experience in measurement, statistics, or interprofessional issues. It focuses on increasing the reader's ability to use measures that are operationalized within the context of theories and conceptual frameworks, derived from sound measurement principles and practices and adequately tested for reliability and validity. Additionally, the text provides a pragmatic account of the processes involved in all aspects of measurement.

Studies conducted by nurses and researchers in varied settings illustrate the measurement processes. New to the Fifth Edition: Thoroughly updated and revised Delivers new and emerging strategies Reflects recent changes to nursing, health research, and emphasis on interprofessional research Includes five completely new chapters addressing challenges to using big data, evaluation and measurement in interprofessional practice and education, metrics and benchmarking in health professions education and practice, and measurement issues in translational science Key Features: Easy-to-read content and format Assumes no prior knowledge of measurement, statistics, or interprofessional issues Provides studies conducted by nurses and researchers in varied settings Offers a pragmatic account of the processes involved in all aspects of measurement

The Framework, an official AOTA document, presents a summary of interrelated constructs that define and guide occupational therapy practice. The Framework was developed to articulate occupational therapy's contribution to promoting the health and participation of people, organizations, and populations through engagement in occupation. The revisions included in this second edition are intended to refine the document and include language and concepts relevant to current and emerging occupational therapy practice. Implicit within this summary are the profession's core beliefs in the positive relationship between occupation and health and its view of people as occupational beings. Numerous resource materials include a glossary, references and a bibliography, as well as a table of changes between the editions.
