BRADSHAW KARSYN

International Symposium on the Vultures

Univ of California Press
 A revelatory resituation of Van Gogh's familiar works in the company of the surprising variety of nineteenth-century art and literature he most revered Vincent van Gogh's (1853-1890) idiosyncratic style grew out of a deep admiration for and connection to the nineteenth-century art world. This fresh look at Van Gogh's influences explores the artist's relationship to the Barbizon School painters Jean-François Millet and Georges Michel--Van Gogh's self-proclaimed mentors--as well as to Realists like Jean-François Raffaëlli and Léon Lhermitte. New scholarship offers insights into Van Gogh's emulation of

Adolphe Monticelli, his absorption of the Hague School through Anton Mauve and Jozef Israëls, and his keen interest in the work of the Impressionists. This copiously illustrated volume also discusses Van Gogh's allegiance to the colorism of Eugène Delacroix, as well as his alliance with the Realist literature of Charles Dickens and George Eliot. Although Van Gogh has often been portrayed as an insular and tortured savant, *Through Vincent's Eyes* provides a fascinating deep dive into the artist's sources of inspiration that reveals his expansive interest in the artistic culture of his time. They consider the nature of prehistoric occupation at seven of these sites, and they relate what is known about the sites of the broader prehistory of the Goleta Slough vicinity and beyond. In addition, two of these papers concern what is known about the Chumash inhabitants of the Goleta Slough

The analyses presented in the papers demonstrate that the rich variety and quantity of natural resources of the estuary and the lands and ocean waters immediately surrounding it were undoubtedly the main attraction in the eyes of many generation of Chumash people who occupied sites along its margins. Santa Barbara and the neighboring counties of San Luis Obispo and Ventura comprise a transitional zone where the plants and animals of Northern California mix with those of the south, creating diverse and dynamic habitats. Lucid explications of the geological and ecological forces that continue to shape and reshape the area are interspersed with personal accounts, as the author delights in the salty breath of a two-hundred-ton whale near the Channel Islands, the antics of beach hoppers along the shoreline, the explosion of wildflowers on the Carrizo Plain, memories of exploring the chaparral with her father, excursions into oak woodlands, and hikes to lofty peaks and canyons cloaked with pinyon pine and juniper. Enhanced with ample, specially commissioned photographs, maps, and charts, this book will broaden our understanding and deepen our enjoyment of a unique and constantly surprising region."--Back cover. *Chumash Ethnobotany* Hauser Publishing Santa Barbara Museum of Natural History Monographs Annual Report - Santa Barbara Museum of Natural History Santa Barbara Museum of Natural History Contributions in Science Santa Barbara Museum of Natural History [Report] 1929 Santa Barbara Museum of Natural History Monographs Contributions in Science Santa Barbara, Land of Dynamic Beauty Special Bulletin California's Chumash Indians Museum Talk Goleta Slough Prehistory [Catalog of Recent and Fossil Molluscan](#)

"From islands off the shore of Santa Barbara to the chaparral-covered mountains of the dry inland regions, the land of the Chumash is a storehouse of plants, an area of great biological richness and variety. Living intimately within this land for more than nine thousand years, the Chumash developed an intense and sophisticated relationship with the plants around them. They collected and processed nuts, seeds, berries, roots, leaves, twigs, shoots, and wood from

which they created practically everything they needed to live, from medicines to weapons to decorative items. Covering both historical and contemporary use of plants, this book--the result of three decades of research in archives and among the native people--celebrates more than just the variety of plants; it celebrates the resourcefulness and ingenuity of the people who have always known them best"--Back cover.
