A Nobel Prize-winning biologist tells the riveting story of his race to discover the inner workings of biology's most important molecule "Ramakrishnan's writing is so honest, lucid and engaging that I could not put this book down until I had read to the very end." -- Siddhartha Mukherjee, author of *The Emperor of All Maladies* and *The Gene* Everyone has heard of DNA. But by itself, DNA is just an inert blueprint for life. It is the ribosome -- an enormous molecular machine made up of a million atoms -- that makes DNA come to life, turning our genetic code into proteins and therefore into us. *Gene Machine* is an insider account of the

race for the structure of the ribosome, a fundamental discovery that both advances our knowledge of all life and could lead to the development of better antibiotics against life-threatening diseases. But this is also a human story of Ramakrishnan's unlikely journey, from his first fumbling experiments in a biology lab to being the dark horse in a fierce competition with some of the world's best scientists. In the end, *Gene Machine* is a frank insider's account of the pursuit of high-stakes science.

“Astonishing. . . . The stories are surreal, with the sharpest edge and in one way or another, each story reveals something raw and powerful about being human in a world where so little is in our control.” — Roxane Gay A refreshingly imaginative, daring debut collection of stories which illuminates with audacious wit the complexity of human behavior, as seen through the lens of the natural world. Told with perfect rhythm and unyielding brutality, these stories expose unsuspecting men and women to the realities of nature, the primal instincts of man, and the dark humor and heartbreak of our struggle to not only thrive, but survive. In “Girl on Girl,” a high school freshman goes to disturbing lengths to help an old friend. An insatiable temptress pursues the one man she can’t have in “Meteorologist Dave Santana.” And in the title story, a long fraught friendship comes undone when three buddies get impossibly lost on a lake it is impossible to get lost on. In Diane Cook’s perilous worlds, the quotidian surface conceals an unexpected surreality that

illuminates different facets of our curious, troubling, and bewildering behavior. Other stories explore situations pulled directly from the wild, imposing on human lives the danger, tension, and precariousness of the natural world: a pack of not-needed boys take refuge in a murky forest and compete against each other for their next meal; an alpha male is pursued through city streets by murderous rivals and desirous women; helpless newborns are snatched by a man who stalks them from their suburban yards. Through these characters Cook asks: What is at the root of our most heartless, selfish impulses? Why are people drawn together in such messy, complicated, needful ways? When the unexpected intrudes upon the routine, what do we discover about ourselves? As entertaining as it is dangerous, this accomplished collection explores the boundary between the wild and the civilized, where nature acts as a catalyst for human drama and lays bare our vulnerabilities, fears, and desires.

In 1942, with a black-market chicken tucked under his arm by his mother, Leo Marks left his father's famous bookshop, 84 Charing Cross Road, and went off to fight the war. He was twenty-two. Soon recognized as a cryptographer of genius, he became head of communications at the Special Operations Executive (SOE), where he revolutionized the codemaking techniques of the Allies and trained some of the most famous agents dropped into occupied Europe. As a top codemaker, Marks had a unique perspective on one of the most fascinating and, until now, little-known aspects of the Second World War. This stunning memoir, often funny, always gripping and acutely sensitive to the human cost of each operation, provides a unique inside picture of the extraordinary SOE organization at work and reveals for the first time many unknown truths about the conduct of the war. SOE was created in July 1940 with a mandate from Winston Churchill to "set Europe ablaze." Its main function was to infiltrate agents into enemy-occupied territory to perform acts of sabotage and form secret armies in preparation for D-Day. Marks's ingenious codemaking innovation was to devise and implement a system of random numeric codes printed on silk. Camouflaged as handkerchiefs, underwear, or coat linings, these codes could be destroyed message by message, and therefore could not possibly be remembered by the agents, even under torture. *Between Silk and Cyanide* chronicles Marks's obsessive quest to improve the

security of agents' codes and how this crusade led to his involvement in some of the war's most dramatic and secret operations. Among the astonishing revelations is his account of the code war between SOE and the Germans in Holland. He also reveals for the first time how SOE fooled the Germans into thinking that a secret army was operating in the Fatherland itself, and how and why he broke the code that General de Gaulle insisted be available only to the Free French. By the end of this incredible tale, truly one of the last great World War II memoirs, it is clear why General Eisenhower credited the SOE, particularly its communications department, with shortening the war by three months. From the difficulties of safeguarding the messages that led to the destruction of the atomic weapons plant at Rjukan in Norway to the surveillance of Hitler's long-range missile base at Peenemünde to the true extent of Nazi infiltration of Allied agents, *Between Silk and Cyanide* sheds light on one of the least-known but most dramatic aspects of the war. Writing with the narrative flair and vivid characterization of his famous screenplays, Marks gives free rein to his keen sense of the absurd and wry wit without ever losing touch with the very human side of the story. His close relationship with "the White Rabbit" and Violette Szabo -- two of the greatest British agents of the war -- and his accounts of the many others he dealt with result in a thrilling and poignant memoir that celebrates individual courage and endeavor, without losing sight of the human cost and horror of war.
