The Porter Hypothesis and the Economic Consequences of Environmental Regulation Oxford University Press

Combining the public choice literature on political decision making with the Neo-Schumpeterian literature on innovation, this valuable new book develops a conceptual model of how environmental regulation is designed. The author presents a novel perspective on the Porter Hypothesis, arguing that the effect of environmental regulation is too weak to induce technological change. This implies that environmental policy intervention has little, if any, economic consequences which has significant repercussions for environmental decision-making. Since radical technological advance is unpredictable, this implies that environmental regulation induces, at the very most, incremental improvements of existing designs. Moreover, due to the high political costs of disrupting existing industry structures, regulation objectives are often adjusted or the compliance costs reduced through subsidies. Due to this limited inducement effect, the author finds that environmental regulation does not produce outcomes consistent with the Porter Hypothesis, nor does it have any palpable negative economic impact. Using detailed case-study evidence, each step of his argument is skilfully illustrated. The book conc.

Four men walked into a bar and over booze, beer and laughs they created a new art organization that represented America's historical heritage. They called this creation The Cowboy Artists of America. The year was 1965; the place was the Oak Creek Tavern in Sedona, Arizona. Fred Harman couldn't attend the Oak Creek Tavern meeting, but he was there at the organizational meeting in Charlie Dye's studio, three months later, with the other four founders. This is when the nitty-gritty of bylaws and rules were established. The creation of this organization was not a whimsical act, nor was it a delusionary one. These men were fine artists and perfected their skill over many years. What made them unique is that they were also cowboys. Men who had worked the range, branded

cattle and rode the long trail. Now, over fifty years later, these cowboy artists, or artist cowboys, are together again in an informative and delightful biography of the founders of the Cowboy Artists of America called: Paint 'n Spurs.

This Selected Poems, Alli Warren's first UK collection, presents work from her first three full-length books: Here Come The Warm Jets (2013), I Love It Though (2017), and Little Hill (2020). Shot through with clear-sighted hope, yet intensely attentive to the specific cruelties of our present epoch, Warren asks "who is permitted unhindered breath". This work aims to "study the past to denaturalize the present", to reverse the mirrored and self-perpetuating notions of nature and culture, human and animal. Warren knows that poetry can't sing from beyond mediation, but insists that poetry can acknowledge mediation's more mendacious disguises and bring them out into the open. Carried through by a prosody alternately razor-sharp and capaciously crowded, in lines and sentences harshly yet lovingly aware of the "possible future in the tender measure", poet-as-ventriloquist throws multiple voices to see what's revealed under poetry's light. With glamour and imagination and biting humour in abundance, Warren seeks to walk to the end of the world-system, "the terror of the totally plausible future" at once post-apocalyptic and utopian—"When I said I was going / to the bar I meant / no death, no death". Such work may "begin from economic fact", but it's where you go from there that matters. Operating within the flows and constraints of racialised capitalism—a space of horror, shared with monsters—Warren's poetry also throws up multiple pleasures, guilty and otherwise, and glimmers of collective possibility, of possible futures we can sometimes glimpse and live within. This is poetry written from community, poetic and otherwise, living and dead and otherwise: from Oakland, El Cerrito, San Francisco; from the meadow, from the street, in a car; marching to shut down the port, walking to breathe in a charged air everyday and Orphic, "buoyant" and "forked". These poems give us the measures, the strength, the breath to propel ourselves through the circumscribed day. ALLI WARREN is the author of Here Come The Warm Jets (City Lights, 2013), I Love It Though (Nighboat, 2017), Little Hill (City Lights, 2020), and numerous chapbooks. She edited the literary magazine Dreamboat, co-curated the (New) Reading Series at 21 Grand, and co-edited the Poetic Labor Project. She has lived and worked in the Bay Area since 2005.

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book

explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

This study brings to life the community of trans-Atlantic merchants who established strong economic, political and cultural ties between the United States and the city-republic of Bremen, Germany in the nineteenth century. Lars Maischak shows that the success of Bremen's merchants in helping make an industrial-capitalist world market created the conditions of their ultimate undoing: the new economy of industrial capitalism gave rise to democracy and the nation-state, undermining the political and economic power of this mercantile elite. Maischak argues that the experience of Bremen's merchants is representative of the transformation of the role of merchant capital in the first wave of globalization, with implications for our understanding of modern capitalism, in general.

Cordell Strug has always loved collages, those jumbled forms assembled from parts of other, usually

more coherent, forms. During the pandemic, when everyone had time to meditate and entertain possibilities, it came to him that by extracting the stories, wisecracks, and reflections from the sermons he'd given through the years, he might construct a kind of collage-commentary on the passages of Scripture that he had addressed. This book is what he came up with from the sermons preached on Matthew's Gospel. Like any living tradition, Christianity is always hearing the voices of its past. It echoes them, expands them, argues with them; it finds light in them or stands bewildered by their darkness. In every living Christian voice, we hear the present both questioning the past and trying to guide the future. In this book, the reader can hear some of the layers of those overlapping conversations in one pastor's preaching ministry.
