Discourses on Livy Niccolo Machiavelli - Discourses on Livy (1531) is as essential to an understanding of Machiavelli as his famous treatise, The Prince. Equally controversial, it reveals his fundamental preference for a republican state. Comparing the practice of the ancient Romans with that of his contemporaries provided Machiavelli with a consistent point of view in all his works. Machiavelli's close analysis of Livy's history of Rome led him to advance his most original and outspoken view of politics - the belief that a healthy body politic was characterized by social friction and conflict rather than by rigid stability. His discussion of conspiracies in Discourses on Livy is one of the most sophisticated treatments of archetypal political

upheaval every written. In an age of increasing political absolutism, Machiavelli's theories became a dangerous ideology.

The opposition between 'religion' and 'modernity' has long held the status of a self-evident truth. Recently, however, there has been a growing realization that religion has not died out and may be more compatible with modern society than previously assumed. This development is particularly striking in France where laïcité has long been the official doctrine. How did religion become opposed to the secular and modern? If distinctions between sacred and secular are less adequate than commonly believed, how do these two categories interact? Addressing these questions, this book explores the persistence of religious categories on the cultural landscape of early modern France. France was the birthplace of Europe's first secular state and the centre of two movements considered indispensable to secularization - the Enlightenment and Revolution of 1789. As such France is vital for understanding how religious antecedents informed modern political institutions and ideals. By uncovering the role of religion in shaping categories most often associated with modernity this book offers a new perspective on the master narrative of secularization.

*Burying the Beloved* traces the relationship between the law and literature in Iran to reveal the profound ambiguities at the heart of Iranian ideas of modernity regarding women's rights and social status. The book reveals how novels mediate legal reforms and examines how authors have used realism to challenge and re-imagine notions of "the real." It examines seminal works that foreground acute anxieties about female subjectivity in an Iran negotiating its modernity from the Constitutional Revolution of 1905 up to and beyond the Islamic Revolution of 1979. By focusing on marriage as the central metaphor through which both law and fiction read gender, Motlagh critically engages and highlights the difficulties that arise as gender norms and laws change over time. She examines the recurrent foregrounding of marriage at five critical periods of legal reform, documenting how texts were understood both at first publication and as their importance changed over time.

Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why. It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity, history, and the contemporary world. All chapters include lesson ideas, a sample lesson plan with activity sheets, primary source documents, and helpful charts, graphs, photographs, and maps. High school students' responses are woven in throughout. Additional material corresponding to each chapter is posted online at [http://people.hofstra.edu/alan\\_j\\_singer](http://people.hofstra.edu/alan_j_singer). The traditional curriculum tends to highlight the Western heritage, and to race through epochs and regions, leaving little time for an in-depth exploration of concepts and historical themes, for the evaluation

of primary and secondary sources, and for students to draw their own historical conclusions. Offering an alternative to such pre-packaged textbook outlines and materials, this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it.

Excerpt from *The Great Events by Famous Historians, Vol. 20: A Comprehensive and Readable Account of the World's History, Emphasizing the More Important Events, and Presenting These as Complete Narratives in the Master-Words of the Most Eminent Historians* Even more surprising was the revolution in Persia. Here was a nation of people who had been long regarded as utterly spiritless, trampled on by one native oppressor after another, only saved from European aggression by their remoteness and their poverty. Now even these Persians seemed suddenly to recall their two-thousand-year-old ancestry, the days when they had been a great, free race. They rose in revolt against their Shah, not fighting at first, but employing a weird, peculiar method of silent protest, all their own. They entreated help from England, and received it. They mastered one Shah by their protests, drove a second into exile by force of arms, and set up a parliamentary government. History is not made by kings, politicians, or a few rich individuals—it is made by all of us. From the temples of ancient Egypt to spacecraft orbiting

Earth, workers and ordinary people everywhere have walked out, sat down, risen up, and fought back against exploitation, discrimination, colonization, and oppression. Working Class History presents a distinct selection of people's history through hundreds of "on this day in history" anniversaries that are as diverse and international as the working class itself. Women, young people, people of color, workers, migrants, Indigenous people, LGBT+ people, disabled people, older people, the unemployed, home workers, and every other part of the working class have organized and taken action that has shaped our world, and improvements in living and working conditions have been won only by years of violent conflict and sacrifice. These everyday acts of resistance and rebellion highlight just some of those who have struggled for a better world and provide lessons and inspiration for those of us fighting in the present. Going day by day, this book paints a picture of how and why the world came to be as it is, how some have tried to change it, and the lengths to which the rich and powerful have gone to maintain and increase their wealth and influence. This handbook of grassroots movements, curated by the popular Working Class History project, features many hidden histories and untold stories, reinforced with inspiring images, further reading, and a foreword from legendary author and dissident Noam Chomsky.
