OMG PAW G2G. Oh my god, parents are watching, got to go. Today's text-messaging middle schoolers may seem like a different species from how parents remember themselves as sixth, seventh, and eighth graders. Children are often forced to confront serious issues like drugs, violence, sexuality, and technology at an age that would have been unthinkable even a decade ago. So it's natural for parents to worry about these crucial years. Still, educator Joe Bruzzese believes that this time can be full of positive transformation as your child gains independence and your parental role shifts from omnipresent manager to supportive coach. Timely topics include cyberbullying, depression, and choosing realistic and rewarding extracurricular activities. The middle school years can and should be a time of exciting change and opportunity; *A Parents' Guide to the Middle School Years* presents what you need to know to survive and thrive as a family.

American education is falling behind that of other countries, and we are continuing to battle a huge dropout rate in our country. Being without a high school diploma can lead to low-paying jobs, unemployment, government assistance and even incarceration. The effects on our country's economy are devastating. Rather than blaming our school systems, educator Lynne Klemens suggests that parents do certain things to prepare their children for education. Within the pages of this book are twenty basic reminders for parents on what should be taught at home. In order to gain a good education, a child needs parents who are doing their jobs at home and teachers doing their parts in school. Students also have a responsibility for their own learning. The ideas in this guide can help your child to become an active participant in his education. While raising successfully motivated students can be challenging, the advice given in this book is -practical -uncomplicated -inexpensive -necessary.

When children lose someone they love, they lose part of their very identity. Life, as they knew it, will never be quite the same. The world that once felt dependable and safe may suddenly seem a frightening, uncertain place, where nobody understands what they're feeling. In this deeply sympathetic book, Phyllis R. Silverman and Madelyn Kelly offer wise guidance on virtually every aspect of childhood loss, from living with someone who's dying to preparing the funeral; from explaining death to a two year old to managing the moods of a grieving teenager; from dealing with people who don't understand to learning how and where to get help from friends, therapists, and bereavement groups; from developing a new sense of self to continuing a relationship with the person who died. Throughout, the authors advocate an open, honest approach, suggesting that our instinctive desire to "protect" children from the reality of death may be more harmful than helpful. "Children want you to acknowledge what is happening, to help them understand it," the authors suggest. "In this way, they learn to trust their own ability to make sense out of what they see." Drawing on groundbreaking research into what bereaved children are really experiencing, and quoting real conversations with parents and children who have walked that road, the book allows readers to see what others have learned from mourning and surviving the death of a loved one. In a culture where grief is so often invisible and misunderstood, the wisdom derived from such first-hand experience is invaluable. Filled with compassion and common sense, *A Parent's Guide to Raising Grieving Children: Rebuilding Your Family after the Loss of a Loved One* offers readers a wealth of solace and sound advice, and even--where one might least expect it--a measure of hope.
