The Clinician's Handbook of Natural Healing Elsevier Health Sciences

5* Doody's Review: 98/100! Featuring a new author team, this seminal book has been completely updated and significantly expanded. Following an outline of the basic elements of ophthalmic science relevant to study and practice, the authors provide a detailed description and discussion of each condition including etiology, clinical signs, diagnosis, prognosis, and therapy, as well as a section dedicated to presumed inherited eye disorders. The focus throughout remains on the clinical needs of the practitioner and the student. Beautifully illustrated in full

color, the book is aimed at trainee and practicing veterinarians interested in all types of ophthalmic diseases and disorders. Although the focus is on small animals, there is additional material on the horse and the cow. For this edition, a diverse group of authors from many geographic regions of training and practice offer a breadth of clinical expertise.

Ophthalmology, E-Book William Carey Publishing

The new edition of this established and highly respected text is THE definitive reference in its field. It details methods for the elimination or prevention/control of microbial growth, and features: New chapters on bioterrorism and community healthcare New chapters on microbicide regulations in the EU, USA and Canada Latest material on microbial resistance to microbicides Updated material on new and emerging technologies, focusing on special problems in hospitals, dentistry

and pharmaceutical practice Practical advice on problems of disinfection and antiseptics in healthcare A systematic review of sterilization methods, with uses and advantages outlined for each Evaluation of disinfectants and their mechanisms of action with respect to current regulations The differences between European and North American regulations are highlighted throughout, making this a truly global work, ideal for worldwide healthcare professionals working in infectious diseases and infection control.

Principles of Clinical Medicine for Space Flight CRC Press Practical, informative, and easy to read, Cloherty and Stark's Manual of Neonatal Care, 9th Edition, offers an up-to-date approach to the diagnosis and medical management of routine and complex conditions encountered in the newborn. Written by expert authors from major neonatology programs across the U.S. and edited by Drs. Eric C. Eichenwald, Anne R. Hansen, Camilia R. Martin, and Ann R. Stark, this popular manual has been fully updated to reflect recent advances in the field, providing NICU physicians, neonatal-perinatal fellows, residents, and neonatal nurse practitioners with quick access to key clinical information.

Shah of Cincinnati Children's Hospital Medical Center; and Robert C. Tasker of Boston Children's Hospital. Remains your indispensable

source for definitive, evidence-based answers on every aspect of pediatric care.

Communicable Diseases in Southern Africa Springer Nature
This volume collects for the first time interdisciplinary findings in ophthalmology concerning effectiveness and indications of antiseptics for the prophylaxis and therapy of infections. The first part discusses the use of various antiseptics against colonization, contamination and infection of the eye caused by viruses, bacteria, fungus and protozoa in comparison to topical antibiotics. The spectrum of action, the risk of resistance of only microbistatic active agents and the galenic requirements of antiseptics are included as well as the local and systemic tolerance. New data to iodophors, polyhexanide and magnesium monopropylphthalate are presented, and, for the first time, microbiologic requirements of ocular antiseptics are defined. In the second part the current scientific knowledge of prophylaxis and therapeutic antiseptics is presented including Credé's prophylaxis and requirements in cornea banks. The final part is reserved for additional topics such as isolation techniques, hand hygiene, hygiene of contact lenses and microbiological diagnostics. To ophthalmologists, optometrists and opticians this book will give indispensable information on latest clinical and experimental findings in the field. It will also be essential reading to hygienists, microbiologists, infectionists, pharmacologists, pharmacists, and pediatricians interested in ophthalmologic issues.

Ophthalmic Disease in Veterinary Medicine Lippincott Williams & Wilkins

Surgical site infections are caused by bacteria that get in through incisions made during surgery. They threaten the lives of millions of patients each year and contribute to the spread of antibiotic resistance. In low- and middle-income countries, 11% of patients who undergo surgery are infected in the process. In Africa, up to 20% of women who have a caesarean section contract a wound infection, compromising their own health and their ability to care for their babies. But surgical site infections are not just a problem for poor countries. In the United States, they contribute to patients spending more than 400 000 extra days in hospital at a cost of an additional US \$10 billion per year. No international evidence-based guidelines had previously been available before WHO launched its global guidelines on the prevention of surgical site infection on 3 November 2016, and there are inconsistencies in the interpretation of evidence and recommendations in existing national guidelines. These new WHO guidelines are valid for any country and suitable to local adaptations, and take account of the strength of available scientific evidence, the cost and resource implications, and patient values and preferences.

Infections of the Cornea and Conjunctiva Lippincott Williams & Wilkins

This book presents the clinical features, invasive and non-invasive modalities of diagnosis of conjunctival and corneal infections, especially atypical clinical situations in unusual cases of keratitis, and manage the disease entity. Infections of cornea continues to be the leading cause of ocular morbidity and blindness worldwide. Early diagnosis helps in better outcome. Proper understanding of the microbiological and clinical characteristics of this disease entity enables ophthalmologists to initiate appropriate therapy. Corneal infections, especially due to uncommon organisms, are difficult to diagnose and treat. With 17

chapters, this volume covers the entire spectrum of corneal and conjunctival infections. This is a quick go-to book for general as well as specialist ophthalmologists.

Conjunctivitis Elsevier Health Sciences

This book presents a number of interesting and useful aspects and facets concerning the clinical features, properties and therapeutical management of this condition. Dr. H. Mejía-López et al. present an interesting survey of the world-wide epidemiologic aspects of infectious conjunctivitis. Dr. U. Ubani evaluates conjunctival symptoms/signs participating in the clinical features of this disorder. Dr. A. Robles-Contreras et al. discuss immunologic aspects underlying possibly the conjunctivitis. Dr. Z. Pelikan presents the cytologic and concentration changes of some mediators and cytokines in the tears accompanying the secondary conjunctival response induced by the nasal challenge with allergen. Dr. S. Sahoo et al. summarize the treatment and pharmacologic control of particular clinical forms of conjunctivitis in general practice. Dr. S. Leonardi et al. explain the basic pharmacologic effects of leukotriene antagonists and their use for the treatment of allergic conjunctivitis. Dr. J.A. Capriotti et al. evaluate the therapeutical effects of various anti-adenoviral agents on the acute conjunctivitis caused by adenovirus. Dr. V. Vanzzini-Zago et al. assess the prophylactic use and efficacy of "povidone-iodium solution", prior the ocular surgery. Dr. F. Abazi et al. present the clinical features, diagnostic and therapeutical aspects of "neonatal conjunctivitis". Dr. I.A. Chaudhry et al. review the special sub-form of conjunctivitis, being a part of the "Trachoma". Dr. B. Kwiatkowska and Dr. M. Maślińska describe the clinical, pathophysiologic and immunologic features of conjunctivitis. Dr. S. Naem reviews the conjunctivitis form caused by *Thelazia nematodes*, occurring principally in animals.
