One civil rights-era law has reshaped American society—and contributed to the country's ongoing culture wars. Few laws have had such far-reaching impact as Title IX of the Education Amendments of 1972. Intended to give girls and women greater access to sports programs and other courses of study in schools and colleges, the law has since been used by judges and agencies to expand a wide range of antidiscrimination policies—most recently the Obama administration's 2016 mandates on sexual harassment and transgender rights. In this comprehensive review of how Title IX has been implemented, Boston College political science professor R. Shep Melnick analyzes how interpretations of "equal educational opportunity" have changed over the years. In terms accessible to non-lawyers, Melnick examines how Title IX has become a central part of legal and political campaigns to correct gender stereotypes, not only in academic settings but in society at large. Title IX thus has become a major factor in America's culture wars—and almost certainly will remain so for years to come.

Recognizing and Reporting Red Flags for the Physical Therapist Assistant will help you develop skills to recognize signs and symptoms that can compromise patient care, It is the first text to present a consistent, three-step model for monitoring patients for red flags relating to neuromuscular and musculoskeletal problems, medical diseases, side effects of medications, and other co-morbidities that may be unknown to the PT. Combining the insights of physical therapist Catherine Cavallaro Goodman and physical therapist assistant Charlene Marshall, this resource is unmatched in providing clear guidelines for finding and documenting red flags. Coverage of warning flags includes red and yellow flags, risk factors, clinical presentation, signs and symptoms, helpful screening clues, and guidelines for communicating with the PT, allowing you as the PTA to quickly recognize the need for any re-evaluation of the patient. Three-

step approach to formative assessments of physical therapy patients provides a consistent way to watch for and report on adverse changes such as range of motion, strength, pain, balance, coordination, swelling, endurance, or gait deviations. PTA Action Plans show the clinical application of text material relating to observing, documenting, and reporting red (or yellow) flags to the physical therapist. Clinically relevant information includes the tools that you need to monitor the patient's response to selected interventions, and accurately and quickly report changes to the supervising PT. Picture the Patient sections address what to look for when assessing or working with patients, especially typical red flag signs and symptoms of emerging problems. Case examples and critical thinking activities connect theory to practice, showing the role of the PTA and how the PTA can integrate clinical observations with clinical reasoning skills so that they can. Cognitive processing-reasoning approach encourages you to learn to gather and analyze data, pose and solve problems, infer, hypothesize, and make clinical judgments, so that you can notify the supervising PT of clients who need further evaluation or may require a referral or consultation with other health care professionals. Summary boxes and tables highlight key information for quick reference. Key terminology is listed in each chapter, which each term bolded within the chapter and defined in a back-of-book glossary. Full-color illustrations and design clearly demonstrate pathologies and processes and make lookup easier in busy clinical settings. An Evolve companion website enhances your problem-solving and decision-making skills with additional case studies, problem-solving questions, and activities, as well as screening tools and checklists. Combined authorship by a physical therapist and physical therapist assistant provides an authoritative and unique voice in the PTA field.

Raising My Rainbow is Lori Duron's frank, heartfelt, and brutally funny account of her and her family's adventures of distress and happiness raising a gender-creative son. Whereas her older son, Chase, is a Lego-loving, sports-playing boy's boy, Lori's younger son, C.J., would much rather twirl around in a pink sparkly tutu, with a Disney Princess in each hand while singing Lady Gaga's "Paparazzi." C.J. is gender variant or gender nonconforming, whichever you prefer. Whatever the term, Lori has a boy who likes girl stuff—really likes girl stuff. He floats on the gender-variation spectrum from super-macho-masculine on the left all the way to super-girly-feminine on the right. He's not all pink and not all blue. He's a muddled mess or a rainbow creation. Lori and her family choose to see the rainbow. Written in Lori's uniquely witty and warm voice and launched by her incredibly popular blog of the same name, Raising My Rainbow is the unforgettable story of her wonderful family as they navigate the often challenging but never dull privilege of raising a slightly effeminate, possibly gay, totally fabulous son. From the high chair to a vinyl restaurant booth on date night, Lela Davidson has captured life on the cul-de-sac with a husband, two kids, and the occasional pet. Whether failing at cloth diaper origami or smug in knowledge that her children have never consumed a PopTart, Lela assures parents they are not alone, and that it's okay to laugh-at yourself, and at your kids. These are the stories of every parent--even if we don't always tell them out loud. Each of these 62 essays can be read in under five minutes for a quick laugh--either with or at the author. Whether tackling PTA meetings, neighborhood politics, or inflation-by-Tooth Fairy, Lela exposes the humor in every awkward moment and maternal meltdown. From a trendy Seattle condo, to a tidy Arkansas subdivision, Lela shares the comic side of family life.
