edings of the Session of the Association of American Railroads, Operations and Maintenance Department Proceedings of the Session of the Association of American Railroads, Operations and Maintenance Department, Mechanical Division Awards ... Third Division, National Railroad Adjustment Board Papers [of The] Annual Meeting Proceedings Papers The Tunnel Engineering Handbook, Second Edition provides, in a single convenient volume, comprehensive coverage of the state of the art in the design, construction, and rehabilitation of tunnels. It brings together essential information on all the principal classifications of tunnels, including soft ground, hard rock, immersed tube and cut-and-cover, with comparisons of their relative advantages and suitability. The broad coverage found in the Tunnel Engineering Handbook enables engineers to address such critical questions as how tunnels are planned and laid out, how the design of tunnels depends on site and ground conditions, and which types of tunnels and construction methods are best suited to

different conditions. Written by the leading engineers in the fields, this second edition features major revisions from the first, including: * Complete updating of all chapters from the first edition * Seven completely new chapters covering tunnel stabilization and lining, difficult ground, deep shafts, water conveyance tunnels, small diameter tunnels, fire life safety, tunnel

rehabilitation and tunnel construction contracting *New coverage of the modern philosophy and techniques of tunnel design and tunnel construction contracting The comprehensive coverage of the Tunnel Engineering Handbook makes it an essential resource for all practicing engineers engaged in the design of tunnels and underground construction. In addition, the book

contains a wealth of information that government administrators and planners and transportation officials will use in the planning and management of tunnels. *Catalogue of the University of Michigan **Railway and Locomotive Engineering Awards of the Second Division, National Railroad Adjustment Board, with Index General Register Proceedings of the Session of***
