How To Really Ruin Your Financial Life and Portfolio

One morning while reading Barron's, Kara Newman took note of a casual bit of advice offered by famed commodities trader Jim Rogers. "Buy breakfast," he told investors, referring to the increasing value of pork belly and frozen orange juice futures. The statement inspired Newman to take a closer look at agricultural commodities, from the iconic pork belly to the obscure peppercorn and nutmeg. The results of her investigation, recorded in this fascinating history, show how contracts listed on the Chicago Mercantile Exchange can read like a menu and how market behavior can dictate global economic and culinary practice. *The Secret Financial Life of Food* reveals the economic pathways that connect food to consumer, unlocking the mysteries behind culinary trends, grocery pricing, and restaurant dining. Newman travels back to the markets of ancient Rome and medieval Europe, where vendors first distinguished between "spot sales" and "sales for delivery." She retraces the storied spice routes of Asia and recounts the spice craze that prompted Christopher Columbus's journey to North America, linking these developments to modern-day India's bustling peppercorn market. Newman centers her history on the transformation of corn into a ubiquitous commodity and uses oats, wheat, and rye to recast America's westward expansion and the Industrial Revolution. She discusses the effects of such mega-corporations as Starbucks and McDonalds on futures markets and considers burgeoning markets, particularly "super soybeans," which could scramble the landscape of food finance. The ingredients of American power and culture, and the making of the modern world, can be found in the history of food commodities exchange,

and Newman connects this unconventional story to the how and why of what we eat.

Yes, You Can Get a Financial Life! Simon and Schuster

It was a German soldier's chance decision to reach for a cigarette and absently wave a car through a checkpoint outside Marseille in 1940 that allowed Felix Rohatyn and his Jewish family to escape from Nazi-occupied France. In the States, a chance summer job led him to the small, private investment bank of Lazard Frères, where he came under the tutelage of legendary financier André Meyer. The summer job turned into an extraordinary fifty-year career. Hailed as "the preeminent investment banker of his generation," Rohatyn was a creator of the merger-and-acquisition business that revolutionized investment banking and transformed the worlds of finance and entertainment. In this very personal account, Rohatyn takes us behind the headlines to offer readers a telling look at some of the era's most renowned figures in the worlds of finance, entertainment, and politics. We are alongside Rohatyn as he meets Steve Ross in the back of the funeral parlor Ross is managing as they strategize to take control of Warner Brothers, and in André Meyer's art-filled apartment as they negotiate with Frank Sinatra. We are with Rohatyn as he assists Harold Geneen of ITT weather a series of congressional investigations, and as he stays one step ahead of the canny Michael Ovitz as Matsushita attempts to win control of Lew Wasserman's Universal Pictures. We also watch Rohatyn defending shareholders' interests as the RJR-Nabisco buyout becomes a cautionary tale of executive greed. We have a front-row seat as

Rohatyn and Governor Hugh Carey forge a desperation plan to save New York City from bankruptcy. And we accompany Rohatyn when he returns to Paris as the U.S. ambassador to the country he barely escaped alive as a young boy. Full of headline-making revelations, insider stories, keen personal observations, and relevant financial wisdoms, *Dealings* is the page-turning story of a life well lived. *Get a Financial Life* Princeton University Press

The Life Cycle of Wealth John Wiley & Sons

This isn't your father's personal finance book. The way we currently save and invest is confusing, frustrating, and quite simply doesn't work. Get ready for a personal finance book that is actually unique. Get ready for financial strategies that you've never seen or heard before. Get ready to transform your financial life in less than a week! Robert Pagliarini has taken budgeting, investing, insurance, and retirement planning—subjects that most of us find stressful and overwhelmingly complex—and made it approachable and even manageable through his unsinkable optimism and relentless simplification process. He says, "We're going to take the pie-in-the-sky theories and turn them into bite-size pieces that you can and will be able to implement in your life immediately." THE SIX DAY FINANCIAL MAKEOVER does a lot of things really well, but I'll just tell you about three. First and foremost it actually provides advice—yes, real advice. Not wishy-washy "maybe you should do this" or "it all depends on your situation" nonsense (what Robert calls "financial fog"). Second, it has an action bias. No, not really a bias, more like a mantra. Implement, implement, implement is the theme in every chapter and on every page (there's even a patent-pending free website at "Six Day Financial Makeover" readers can use to help them take the advice they read and

incorporate it into their lives). Three, it is full of brand-new, never seen before financial shortcuts and strategies such as: Why your seven year old is a better investor than you are. Kids intuitively understand how to save and invest better than most adults. The trick is focus and creating separate physical accounts for the myriad goals we have. There is no "right" way to invest. What's crucial is that people determine their investment personality – particularly how involved they want to be with investing – and let that be their guide. Disregarding one's investment personality and pursuing an approach that's not compatible with it is a recipe for disaster. Why you shouldn't work for a paycheck. Most of us work to earn a paycheck, right? Well that's the wrong way to think about work. Once we can align our life's vision and deepest goals to our income, we start to see our purpose for waking up each morning entirely differently. Work is no longer work—it becomes a catalyst that helps us achieve our goals. The most important thing you should save for (and it's not retirement!). What's more important and more satisfying than retirement? Financial independence. Discover how many days your passive income could support your lifestyle (if your score is less than 31, don't quit your day job). The more information and choices you have, the worse your finances will be. There are more financial books, magazines, journals, newspapers, radio shows, TV shows, web sites, Podcasts, and free information available today, yet most of us still feel completely overwhelmed, confused, and frustrated than before. The solution is to cut through the fluff and focus on what really works. Budgets don't work. Instead, Robert offers a ten step process

for taking control of one's cash flow. While there is careful assessment and prioritization involved, budgets are nowhere in sight. If it's not possible to save for a child's education and for retirement, save for retirement first. While retirement may be farther off in the future, if people don't save today, they'll have no options tomorrow – whereas college students have financial aid, scholarships, and student loans at their disposal. And a whole lot more... Offering clear, practical, no-nonsense advice along with all the tools needed to implement it, *THE SIX-DAY FINANCIAL MAKEOVER* is a comprehensive guide that delivers on Robert's promise to revolutionize the way you think about and invest your money.

What the financial diaries of working-class families reveal about economic stresses, why they happen, and what policies might reduce them Deep within the American Dream lies the belief that hard work and steady saving will ensure a comfortable retirement and a better life for one's children. But in a nation experiencing unprecedented prosperity, even for many families who seem to be doing everything right, this ideal is still out of reach. In *The Financial Diaries*, Jonathan Morduch and Rachel Schneider draw on the groundbreaking U.S. *Financial Diaries*, which follow the lives of 235 low- and middle-income families as they navigate through a year. Through the *Diaries*, Morduch and Schneider challenge popular assumptions about how Americans earn, spend, borrow, and save—and they identify the true causes of distress and inequality for many working Americans. We meet real people, ranging from a casino dealer to a street vendor to a tax

preparer, who open up their lives and illustrate a world of financial uncertainty in which even limited financial success requires imaginative—and often costly—coping strategies. Morduch and Schneider detail what families are doing to help themselves and describe new policies and technologies that will improve stability for those who need it most. Combining hard facts with personal stories, *The Financial Diaries* presents an unparalleled inside look at the economic stresses of today's families and offers powerful, fresh ideas for solving them.

There are entire sections of bookstores and libraries devoted to helping you achieve financial success, yet most individuals seem more overwhelmed and confused than ever when it comes to their money. More, their financial interactions and beliefs are compartmentalized from the rest of their lives, devoid of meaning and a broader sense purpose, as if one set of values applies to money and another to the pew, the mosque, the prayer rug, or the meditation mat. Morgan Rangstrom, an expert in personal finance who is fluent in matters of money and meaning, shows us that the roots of financial success lie beyond spreadsheets and budgeting calculators, but are often buried beneath a negative money mindset that keeps us firmly within the grasp of zombie economics. Money with Purpose helps us overcome our mental money barriers, achieve lasting financial well-being, and receive the dividends of an undivided financial life.

Does fear and insecurity keep you from looking at your bank account? Is your financial anxiety holding you captive? You don't have to stress about money anymore. YOU can take back control. As a newly divorced single mom making \$24,000 per year and facing down \$77,000 in debt, Kumiko Love worried constantly about money. She saw what other moms had—vacations, birthday parties, a house full of furniture—and felt ashamed that she and her son lived in a

small apartment and ate dinner on the floor. Worse, when her feelings began to exhaust her, she binge-shopped, reasoning that she'd feel better after a trip to the mall. On the day she needed to pay for a McDonald's ice cream cone without her credit card, she had an epiphany: Money is not the problem. Self-Doubt is the problem. Shame is the problem. Guilt is the problem. Society's expectations for her are the problem. She is the solution. Once she reversed the negative thinking patterns pushing her toward decisions that didn't serve her values or goals, her financial plan wrote itself. Now, she's not only living debt-free in her dream home, which she paid for in cash, but she has spread her teachings around the world and helped countless women envision better lives for themselves and their families. Now, building on the lessons she's taught millions as the founder of The Budget Mom, she shares a step by step plan for

taking control back over your financial life—regardless of your level of income or your credit card balance. Through stories from navigating divorce to helping clients thrive through recessions, depression, eviction, layoffs and so much more, you will learn foundational practices such as: How to use your emotions to your financial advantage, instead of letting them control you How to create a budget based on your real life, not a life of self-denial How to create a motivating debt pay-off plan that makes you excited about your future, instead of fearing it My Money My Way will give you the tools to align your emotional health with your financial health—to let go of deprivation and embrace desire.
