"Studies show that use of computer-based information communication technologies (ICTs) can have positive impacts on student motivation and learning. The present study examines the issue of ICT adoption in the classroom by expanding the technology acceptance model (TAM) to identify factors that contribute to teacher acceptance and use of

these technologies in the classroom. A survey was conducted of 57 high school teachers from around the United States. Results show that the variables of teacher belief profile and teacher efficacy can determine high school teacher acceptance of these technologies, when added to the TAM. Additionally, the study confirms previous research that indicates perceived media richness as an important variable to consider in TAM studies of digital media and ICTs."--

"Our Best 357 Colleges is the best-selling college guide on the market because it is the voice of the students. Now we let graduate students speak for themselves, too, in these brand-new guides for selecting the ideal business, law, medical, or arts and humanities graduate school. It includes detailed profiles; rankings based on student

surveys, like those made popular by our Best 357 Colleges guide; as well as student quotes about classes, professors, the social scene, and more. Plus we cover the ins and outs of admissions and financial aid. Each guide also includes an index of all schools with the most pertinent facts, such as contact information. And we've topped it all off with our school-says section where participating schools can talk back by providing their own profiles. It's a whole new way to find the perfect

match in a graduate school." *Rochester Institute of Technology Self-study for Presentation to Middle States Association of Colleges and Schools November 2-5, 1986* College Prowler, Inc For well over a half century, American Universities and Colleges has been the most comprehensive and highly respected directory of four-year institutions of higher education in the United States.
