American Sign Language Rockridge Press

First in the Sabuda Reinhart Pop-Ups series, this book marries form and function, with pop-up babies taking center stage while additional babies, whose hands move via pull-tabs, form simple hand signs. Examples include eat (Place closed fingertips to lips), hurt (Touch index fingers together over painful area), and Mommy (Spread fingers, tap thumb on chin). The playful bordershapes, fruits, animals and toys and the large three-dimensional figures, give it crib appeal, while giving parents an alternative to more instructional books on baby sign language. Talking Hands Simon and Schuster

In this volume, the Gardners and their co-workers explore the continuity between human behavior and the rest of animal behavior and find no barriers to be broken, no chasms to be bridged, only unknown territory to be charted and fresh discoveries to be made. With the beginning of Project Washoe in 1966, sign language studies of chimpanzees opened up a new field of scientific inquiry by providing a new tool for looking at the nature of language and intelligence and the relation between human and nonhuman intelligence. Here, the pioneers in this field review the unique procedures that they developed and the extensive body of evidence accumulated over the years. This close look at what the chimpanzees have actually done and said under rigorous laboratory conditions is the best answer to the heated controversies that have been generated by this line of research among ethologists, psychologists, anthropologists, linguists, and philosophers.

"The house is a Babel tonight. There are snatches of English.

There is Hebrew. There is a great deal of Arabic. But in the illuminated room, it is the other languages that catch the eye.

They are signed languages, the languages of the deaf. As night engulfs the surrounding desert and the cameraman's lights throw up huge, signing shadows, it looks as though language itself has become animate, as conversations play out in grand silhouette on the whitewashed walls. "There are three signed languages going. There is American Sign Language, used by one of the visitors, a deaf linguist from California. There is Israeli Sign Language, the language of the deaf in that country. And there is a third language, the one the linguists have journeyed here to see: a signed language spoken in this village and nowhere else in the world." Book jacket.
