The long-awaited story of
the science, the business,
the politics, the intrigue
behind the scenes of the
most ferocious
competition in the history

of modern science—the
race to map the human
genome. On May 10,
1998, biologist Craig
Venter, director of the
Institute for Genomic
Research, announced that
he was forming a private
company that within three
years would unravel the
complete genetic code of
human life—seven years
before the projected finish
of the U.S. government’s
Human Genome Project.

Venter hoped that by
decoding the genome
ahead of schedule, he
would speed up the pace
of biomedical research
and save the lives of
thousands of people. He
also hoped to become
very famous and very
rich. Calling his company
Celera (from the Latin for
“speed”), he assembled a
small group of scientists
in an empty building in
Rockville, Maryland, and

set to work. At the same time, the leaders of the government program, under the direction of Francis Collins, head of the National Human Genome Research Institute at the National Institutes of Health, began to mobilize an unexpectedly unified effort to beat Venter to the prize—knowledge that had the potential to revolutionize medicine and society. The stage was set for one of the most thrilling—and important—dramas in the history of science. The

Genome War is the definitive account of that drama—the race for the greatest prize biology has had to offer, told by a writer with exclusive access to Venter’s operation from start to finish. It is also the story of how one man’s ambition created a scientific Camelot where, for a moment, it seemed that the competing interests of pure science and commercial profit might be gloriously reconciled—and the national repercussions that resulted when that

dream went awry.

A New York Times Notable Book The author of the acclaimed bestseller and National Book Award finalist, Imperial Life in the Emerald City, tells the startling, behind-the-scenes story of the US's political and military misadventure in Afghanistan. In this meticulously reported and illuminating book, Rajiv Chandrasekaran focuses on southern Afghanistan in the year of President Obama's surge, and reveals the epic tug of war that occurred

between the president and a military that increasingly went its own way. The profound ramifications this political battle had on the region and the world are laid bare through a cast of fascinating characters—disillusioned and inept diplomats, frustrated soldiers, headstrong officers—who played a part in the process of pumping American money and soldiers into Afghan nation-building. What emerges in Little America is a detailed picture of

unsavory compromise—warlords who were to be marginalized suddenly embraced, the Karzai family transformed from foe to friend, fighting corruption no longer a top priority—and a venture that became politically, financially, and strategically unsustainable. Words of Crisis as

Words of Power Vintage

Awarded the Navy Cross for gallantry under fire, Staff Sergeant Jeremiah Workman is one of the Marine Corps' best-known

contemporary combat veterans. In this searing and inspiring memoir, he tells an unforgettable story of his service overseas—and of the emotional wars that continue to rage long after our fighting men come home. Raised in a tiny blue-collar town in Ohio, Jeremiah Workman was a handsome and athletic high achiever. Having excelled on the sporting field, he believed that the Marine Corps would be the perfect way to harness his physical and professional drives. In

the Iraqi city of Fallujah in December 2004, Workman faced the challenge that would change his life. He and his platoon were searching for hidden caches of weapons and mopping up die-hard insurgent cells when they came upon a building in which a team of fanatical insurgents had their fellow Marines trapped. Leading repeated assaults on that building, Workman killed more than twenty of the enemy in a ferocious firefight that left three of his own men dead. But

Workman's most difficult fight lay ahead of him—in the battlefield of his mind. Burying his guilt about the deaths of his men, he returned stateside, where he was decorated for valor and then found himself assigned to the Marine base at Parris Island as a "Kill Hat": a drill instructor with the least seniority and the most brutal responsibilities. He was instructed, only half in jest, to push his untested recruits to the brink of suicide. Haunted by the thought that he had failed

his men overseas, Workman cracked, suffering a psychological breakdown in front of the men he was charged with leading and preparing for war. In *Shadow of the Sword*, a memoir that brilliantly captures both wartime courage and its lifelong consequences, Workman candidly reveals the ordeal of post-traumatic stress disorder: the therapy and drug treatments that deadened his mind even as they eased his pain, the overwhelming stress that pushed his marriage to

the brink, and the confrontations with anger and self-blame that he had internalized for years. Having fought through the worst of his trials—and now the father of a young son—Workman has found not perfection or a panacea but a way to accommodate his traumas and to move forward toward hope, love, and reconciliation.

The War Against

Future NYU Press

The vivid voices that speak from these pages are not those of historians

or scholars. They are the voices of ordinary men and women who experienced—and helped to win—the most devastating war in history, in which between 50 and 60 million lives were lost. Focusing on the citizens of four towns—Luverne, Minnesota; Sacramento, California; Waterbury, Connecticut; Mobile, Alabama;—The War follows more than forty people from 1941 to 1945. Woven largely from their memories, the compelling, unflinching narrative unfolds month

by bloody month, with the outcome always in doubt. All the iconic events are here, from Pearl Harbor to the liberation of the concentration camps—but we also move among prisoners of war and Japanese American internees, defense workers and schoolchildren, and families who struggled simply to stay together while their men were shipped off to Europe, the Pacific, and North Africa. Enriched by maps and hundreds of photographs, including many never

published before, this is an intimate, profoundly affecting chronicle of the war that shaped our world.

The volume explores crisis rhetoric in contemporary U.S. American presidential speechmaking. Rhetorical leadership constitutes an inherent feature of the modern presidency. Particularly during times of critical events, the president is expected to react and address the nation. However, the power of the office also

allows him or her to direct attention to particular topics and thus rhetorically create or exploit the notion of crisis. This monograph examines the verbal responses of George W. Bush and Barack Obama to pressing issues during their terms in office. Assuming an interdisciplinary approach, it illuminates the characteristics of modern crisis rhetoric. The aim of the book is to show that elements of Puritan rhetoric, and specifically the tradition of the jeremiad, although

taken out of their original context and modified to suit a modern multiethnic society, can still be detected in contemporary political communication. It will be of interest to students and scholars of presidential rhetoric, political communication, sociolinguistics, and cultural studies.

 Shadow people are some of the most mysterious entities in the known universe, and Mike Ricksecker has experienced many, starting with a tall, dark humanoid figure that appeared in his room as a child. While examining who or what these dark beings may actually be and sharing the ominous experiences of several others, Ricksecker recounts his interactions

with shadows, which also include a black mass that formed in a bedroom where a girl had seen an entity with red eyes, a crawler that crept its way around an abandoned desecrated church, and many more. *A Walk In The Shadows* addresses these tantalizing questions: What are the different types of shadow people and their characteristics? What's the relationship between shadow people and sleep paralysis? Are shadow entities interdimensional beings or, perhaps, players in a

simulated universe? Are shadow people evil, or have they been miscast as the darkest of the dark in the supernatural realm? Are some shadow people actually extraterrestrials? What does a renowned demonologist with nearly 50 years of experience have to say about shadow entities? *A Walk In The Shadows* explores the secrets of the dark while unveiling an enigmatic world feared by many and misunderstood by most. *A Walk In The Shadows*
