The Six Voyages of John Baptista Tavernier - through Turkey into Persia and the East-Indies finished in the Year, giving an Account of the State of those Countries is an unchanged, high-quality reprint of the original edition of 1678. Hansebooks is editor of the literature on different topic areas such as research and science, travel and expeditions, cooking and nutrition, medicine, and other genres. As a publisher we focus on the preservation of historical literature. Many works of historical writers and scientists are available today as antiques only. Hansebooks newly publishes these books and contributes to the preservation of literature which has become rare and historical knowledge for the future.

[User's Guide to the Mammal Collection, National Museum of Natural History](#) Smithsonian Institution Imagine having a sleepover at the museum for your birthday! The perfect story for museum lovers and adventure-seekers alike! Mason couldn't wait to celebrate his birthday with a sleepover at the museum of natural history--his favorite place to visit. Armed with headlamps for the dark hallways, a map, and a list of clues, Mason and his two best friends take off on a scavenger hunt through each hall of the museum. But they aren't just trying to solve the clues. They're scouting for the best place to spend the night. Sleeping next to a T. rex in the Hall of Dinosaurs felt too scary. And sleeping with the monarch butterflies would probably tickle. This decision isn't as easy as Mason thought it would be.... Wherever they end up, the museum at night is the best place for a birthday adventure!

Greek vases in the National Museum of Natural History, Smithsonian Institution, Washington, D.C. Dragonfly Books

Rising on the National Mall next to the Washington Monument, the National Museum of African American History and Culture is a tiered bronze beacon inviting everyone to learn about the richness and diversity of the African American experience and how it helped shape this nation. *Begin with the Past: Building the National Museum of African American History and Culture* is the story of how this unparalleled museum found its place in the nation's collective memory and on its public commons. *Begin with the Past* presents the long history of efforts to build a permanent place to collect, study, and present African American history and culture. In 2003 the museum was officially established at long last, yet the work of the museum was only just beginning. The book traces the appointment of the director, the selection of the site, and the process of conceiving, designing, and constructing a public monument to the achievements and contributions of African Americans. The careful selection of architects, designers, and engineers culminated in a museum that embodies African American sensibilities about space, form, and material and incorporates rich cultural symbols into the design of the building and its surrounding landscape. The National Museum of African American History and Culture is a place for all Americans to understand our past and embrace our future, and this book is a testament to the inspiration and determination that went into creating this unique place.

What do giant squids, a possibly cursed diamond, dinosaur bones, and a man made of soap all have in common? These are some of the amazing artifacts at the Smithsonian's National Museum of Natural History. Take a tour through the museum's collections. Engaging text, graphs, maps, and colorful images help readers discover the stories behind some of these treasured pieces of natural history.

The National Museum of Natural History Smithsonian Books (DC)

With more than 124 million specimens, the Smithsonian's National Museum of Natural History houses one of the world's most important collections of natural history artifacts. This lavishly illustrated guidebook offers a beautiful tour and souvenir of the exciting collections. Starting with the history of the museum and a peek behind the scenes, readers then enter the museum through the

Rotunda, where they are greeted by the famous elephant diorama—the world's largest mounted specimen of this enormous mammal. The tour continues into the Janet Annenberg Hooker Hall of Geology, Gems, and Minerals, home to the legendary Hope Diamond. The Fossils section traces the history of life on earth, from the earliest organisms to the great diversity of plants and animals in the modern world. Biology features living species, including the incredible array of furry creatures in the brand new Kenneth E. Behring Family Hall of Mammals. The Anthropology section examines human evolution, exploring cultures from all over the globe. The book's final section is devoted to experiences beyond the museum galleries—the IMAX theater, Jazz Café, and naturalist center in Leesburg, Virginia, where visitors get hands-on experience doing scientific research. This sturdy, flexibound guide also includes phone numbers, directions, hours, and all the other essential information needed to ensure a rewarding visit.

[Le progrès par le Christianisme](#) Smithsonian Institution

This souvenir book showcases some of the most influential and important treasures of the National Museum of African American History and Culture's collections. These include a hymn book owned by Harriet Tubman; ankle shackles used to restrain enslaved people on ships during the Middle Passage; a dress that Rosa Parks was making shortly before she was arrested; a vintage, open-cockpit Tuskegee Airmen trainer plane; Muhammad Ali's headgear; an 1835 Bill of Sale enslaving a young girl named Polly; and Chuck Berry's Cadillac. These objects tell us the full story of African American history, of triumphs and tragedies and highs and lows. This book, like the museum it represents, uses artifacts of African American history and culture as a lens into what it means to be an American.

Jean-Baptiste Tavernier (1605-89) was one of the most renowned travelers of 17th century Europe. The son of a French Protestant who had fled Antwerp to escape religious persecution, Tavernier was a jewel merchant who between 1632 and 1668 made six voyages to the East. The countries he visited (most more than once) included present-day Cyprus, Malta, Turkey, Syria, Iraq, Iran, Afghanistan, Pakistan, India, Sri Lanka, and Indonesia. In 1676 he published his two-volume *Les six voyages de Jean Baptiste Tavernier* (The six voyages of Jean Baptiste Tavernier). An abridged and very imperfect English translation of the book appeared in 1677. The first modern scholarly edition in English, presented here, was published in 1889, with translation, notes, and a biographical sketch of Tavernier by Dr. Valentine Ball (1843-95), a British civil servant with the Indian Geological Service. Among the most memorable chapters in the book are those that recount Tavernier's visits to the diamond mines of India and his inspection of the jewels of the Great Mogul. Tavernier was not a scholar or an educated linguist, and after his initial popularity in the 17th century his authority waned, as historians and others questioned the accuracy of his observations. In the 20th century, however, Tavernier's reputation rose, as such important historians as Lucien Febvre and Fernand Braudel used the detailed information he recorded about the prices and qualities of goods and about business and commercial practices in their pioneering studies of economic and social history. The book contains several appendices by Ball about famous diamonds (including the historic Koh-i-Noor Diamond now belonging to the British royal family), diamond mines in India and Borneo, ruby mines in Burma, and sapphire washings in Ceylon (Sri Lanka). A fold-out map shows Tavernier's voyages in India and the mines he visited.

A fun, pocket-sized book presenting the remarkable dinosaurs and other creatures that roamed Earth billions of years ago Smithsonian Dinosaurs and Other Amazing Creatures from Deep Time traces the journey of life on Earth from its origins some 4.6 billion years ago. Beginning with the first evidence of life in the form of single-celled microbes, it moves through the Cambrian era's explosion of biodiversity around 540 million years ago through the mass extinction event 252 million years ago that cleared the stage for the first turtles, pterosaurs, and other dinosaurs and mammals of the Triassic era. It offers a rare look at some of the world's most fascinating creatures: from sauropods, the largest creatures to ever walk the land, to the top carnivorous predator Tyrannosaurus rex, as well as the mastodons, saber-toothed cats, dire wolves, walrus-whales, and other beasts that seem outlandish to us now. Profiling these and many other fascinating creatures throughout prehistory, the book is sure to delight young dinosaur enthusiasts.

[Official Guide to the Smithsonian National Museum of African American History and Culture](#) Routledge

Smithsonian's National Museum of African American History and Culture is truly groundbreaking! The first national museum whose mission is to illuminate for all people, the rich, diverse, complicated, and important experiences and contributions of African Americans in America is opening. And the history of NMAAHC--the last museum to be built on the National Mall--is the history of America. The campaign to set up a museum honoring black citizens is nearly 100 years old; building the museum itself and assembling its incredibly far-reaching collections is a modern story that involves all kinds of people, from educators and activists, to politicians, architects, curators, construction workers, and ordinary Americans who donated cherished belongings to be included in NMAAHC's thematically-organized exhibits. Award-winning author Tonya Bolden has written a fascinating chronicle of how all of these ideas, ambitions, and actual objects came together in one incredible museum. Includes behind-the-scenes photos of literally "how to build a museum" that holds everything from an entire segregated railroad car to a tiny West African amulet worn to ward off slave traders.

National Museum of Natural History Courier Corporation

Tells the story of the building of the American Museum of Natural History and Hayden Planetarium, a story of history, politics, science, and exploration, including the roles of American presidents, New York power brokers, museum presidents, planetarium directors, polar and African explorers, and German rocket scientists. The American Museum of Natural History is one of New York City's most beloved institutions, and one of the largest, most celebrated museums in the world. Since 1869, generations of New Yorkers and tourists of all ages have been educated and entertained here. Located across from Central Park, the sprawling structure, spanning four city blocks, is a fascinating conglomeration of many buildings of diverse architectural styles built over a period of 150 years. The first book to tell the history of the museum from the point of view of these buildings, including the planned Gilder Center, *The American Museum of Natural History and How It Got That Way* contextualizes them within New York and American history and the history of science. Part II, "The Heavens in the Attic," is the first detailed history of the Hayden Planetarium, from the museum's earliest astronomy exhibits, to Clyde Fisher and the original planetarium, to Neil deGrasse Tyson and the Rose Center for Earth and Space, and it features a photographic tour through the original Hayden Planetarium. Author Colin Davey spent much of his childhood literally and figuratively lost in the museum's labyrinthine hallways. The museum grew in fits and starts according to the vicissitudes of backroom deals, personal agendas, two world wars, the Great Depression, and the Cold War. Chronicling its evolution—from the selection of a desolate, rocky, hilly, swampy site, known as Manhattan Square to the present day—the book includes some of the most important and colorful characters in the city's history, including the notoriously corrupt and powerful "Boss" Tweed, "Father of New York City" Andrew Haswell Green, and twentieth-century powerbroker and master builder Robert Moses; museum presidents Morris K. Jesup, Henry Fairfield Osborn, and Ellen Futter; and American presidents, polar and African explorers, dinosaur hunters, and German rocket scientists. Richly illustrated with period photos, *The American Museum of Natural History and How It Got That Way* is based on deep archival research and interviews.

Travels in India Fordham Univ Press

English summary: The first complete catalogue of all the Greek vases in the National Museum of

Natural History, Smithsonian Institution. It includes all the Attic painted pottery, both black- and red-figure, a Spartan and an Ionic cup, as well as two vases in the National Museum of American History. Italian description: Il primo catalogo completo di tutti i vasi greci conservati nel National Museum of Natural History, Smithsonian Institution. Comprende tutti i vasi attici dipinti, a figure nere e a figure rosse, una tazza di manifattura spartana e una ionica, oltre a due vasi conservati nel National Museum of American History.

[National Museum of African American History and Culture](#) L'ERMA di BRETSCHNEIDER

Natural history museums are changing, both because of their own internal development and in response to changes in context. Historically, the aim of collecting from nature was to develop encyclopedic assemblages to satisfy human curiosity and build a basis for taxonomic information. Today, with global biodiversity in rapid decline, there are new reasons to build and maintain collections, while audiences are more diverse, numerous, and technically savvy. Institutions must learn to embrace new technology while retaining the authenticity of their stories and the value placed on their objects. The Future of Natural History Museums begins to develop a cohesive discourse that balances the disparate issues that our institutions will face over the next decades. It disassembles the topic into various key elements and, through commentary and synthesis, explores a cohesive picture of the trajectory of the natural history museum sector. This book contributes to the study of collections, teaching and learning, ethics, and running non-profit businesses and will be of interest to museum and heritage professionals and academics and senior students in Biological Sciences and Museum Studies.

[The American Museum of Natural History and How It Got That Way](#) DK Publishing (Dorling Kindersley)

A landmark in reference publishing and overseen and authenticated by the Smithsonian Institution's National Museum of Natural History, *Natural History* presents an unrivaled visual survey of Earth's natural history. Giving a clear overview of the classification of our natural world-over 6,000 species-*Natural History* looks at every kingdom of life, from bacteria, minerals, and rocks to fossils to plants and animals. Featuring a remarkable array of specially commissioned photographs, *Natural History* looks at thousands of specimens and species displayed in visual galleries that take the reader on an incredible journey from the most fundamental building blocks of the world's landscapes, through the simplest of life forms, to plants, fungi, and animals.

Directory of Scientists in the National Museum of Natural History, Smithsonian Institution Smithsonian Institution

Singapore's collection of Southeast Asian animals—one of the world's largest—dates back to the old Raffles Museum, officially established in 1878. With the opening of the Lee Kong Chian Natural History Museum in 2015, the original Raffles Museum has "reincarnated" and the loop on its remarkable 127-year history has closed. Beneath the sleek exterior of today's modern museum building lies a saga of titanic struggles and changes. That the collections survived at all—through the multiple challenges of the nineteenth century, the disruption of World War Two, and its potential disintegration in the face of Singapore's modernization—is nothing short of miraculous. This book is not only an institutional history of the museum but also tells the story of frustrations, commitment and courage of the numerous individuals who battled officialdom, innovated endlessly and overcame the odds to protect Singapore's natural history heritage. The book features 108 historical photographs and natural history illustrations printed in full colour throughout.
