provides students with the tools needed to examine the economic impact of immigration and immigration policies over the past century. Students will develop an understanding of why and how people migrate across borders and will learn how to analyze the economic causes and effects of immigration. The main objectives of the book are for students to understand the decision to migrate; to understand the impact of immigration on markets and government budgets; and to understand the consequences of immigration policies in a global context. From the first chapter, students will develop an appreciation of the importance of immigration as a separate academic field within labor economics and international economics. Topics covered include the effect of immigration on labor markets, housing markets, international trade, tax revenues, human capital accumulation, and government fiscal balances. The book also considers the impact of immigration on what firms choose to produce, and even on the ethnic diversity of restaurants and on financial markets,

as well as the theory and evidence on immigrants' economic assimilation. The textbook includes a comparative study of immigration policies in a number of immigrant-receiving and sending countries, beginning with the history of immigration policy in the United States. Finally, the book explores immigration topics that directly affect developing countries, such as remittances, brain drain, human trafficking, and rural-urban internal migration. Readers will also be fully equipped with the tools needed to understand and contribute to policy debates on this controversial topic. This is the first textbook to comprehensively cover the economics of immigration, and it is suitable both for economics students and for students studying migration in other disciplines, such as sociology and politics.

### and Marriage Visas

In this new age of social media, the role of online ethnic networks is as important as offline ethnic networks—families, friends, etc.—in helping immigrants adjust to their new country. This is something that has received very little attention in the academic field of international immigration which Oh hopes to rectify through this book. He focuses on the five American social institutions (immigration, welfare, education, housing, and finance) to explore this topic through the lens of married Korean-American women. In their online "MissyUSA" community, the largest Korean-American

women's online community in North America, they share a wide range of information about the rules of each of these social institutions as they work together to navigate American society. Oh explores how the "MissyUSA" community creates two distinctive forms of social capital: social resources and social support. For some of its members (inquirers or information seekers), the "MissyUSA" community functions as an important source of their information (social resources) about the rules of the American social institutions. Likewise, it also functions as a network of social supporters (respondents

or information providers) for those information seekers. Here, what makes this book a significant one is the fact that these social supporters are distinctively identified as instrumental guiders (information describers, expositors, confirmers, and advisors) and emotional supporters (companions, encouragers, and critics). By researching the lives of Korean-American women who are members of the "MissyUSA" community, Oh's book works to understand how a sub-set of the Korean-American community shares information about American institutions and uses the internet to do so.
