In a new compact edition, a luxurious celebration of the elegant craftsmanship behind the timeless French men's fashion and lifestyle labels. Home of haute couture and the world's leading fashion houses, Paris and its inhabitants represent sophistication and refinement to the rest of the world. Debonair Parisian men continue to participate in a centuries-long tradition of sartorial craftsmanship and quality. In its newly accessible compact edition, The Parisian Gentleman is like a

dream shopping excursion to the leading men's style-makers, from hidden ateliers and little-known studios to internationally renowned labels such as shirtmakers Charvet, shoemakers Berluti, and the recently revived trunk-makers Moynat. The stories behind each house, and the creative minds and artisans who give each brand its unique identity, bring the clothes alive, capturing an unceasing dedication to quality in an era overrun with new, mass-produced trends. Author Hugo Jacomet's portraits of these often-inaccessible marques (or brands) are intimate and illuminating, thanks to his personal connections to many of the leading figures. His text is accompanied by beautifully shot photographs of the designers, studios, garments, and locations, the majority of which were taken exclusively for this book.

Crafting Magick with Pen and Ink
Linden Publishing

This book examines the materiality of writing. It adopts a multimodal approach to argue that writing as we know it is only a small part of the myriad gestures we make, practices we engage in, and media we use in the process of trace-making. Taking a broad view of the act of writing, the volume features contributions from both established and up-and-coming scholars from around the world and

incorporates a range of methodological and theoretical perspectives, from fields such as linguistics, philosophy, psychology of perception, design, and semiotics. This interdisciplinary framework allows readers to see the relationships between writing and other forms of "trace-making", including architectural drawings, graphic shapes, and commercial logos, and between writing and reading, with a

number of illustrations highlighting the visual data used in the forms and studies discussed. The book also looks forward to the future, discussing digital media and new technology and their implications for trace-making. This pioneering volume will be of interest to scholars and researchers in multimodality, literacy, cognitive neuroscience, design theory, discourse analysis, and applied linguistics.
