I'm a millionaire plumber. I went from being a North London street urchin to owning London's biggest independent plumbing firm, which I built myself from scratch. We turn over more than ?20 million a year, and we're growing. The country's best plumbers and heating engineers queue up to

work for me. We are the plumbers of choice for London's high society - movie stars and celebrities of all kinds. I count David Cameron, George Osborne and Boris Johnson among my friends. How did that happen?In this frank and absorbing memoir, Charlie Mullins describes his meteoric rise from an impoverished childhood in London, to owner of one of the most renowned and respected businesses in the UK - Pimlico Plumbers. He reveals how he survived his tough upbringing, became a parent himself and had to bid a painful farewell to his first passion - boxing.In this honest and moving account, Charlie explains how he worked his way up from apprentice, through sheer hard graft and determination, to conquer the plumbing world - and met a few interesting characters in the process. Larger than life, and full of humour, this is a valuable insight into how to build a business and the courage required to make it a success.

From the celebrated author of the best-selling *Physics for Future Presidents* comes "a provocative, strongly argued book on the fundamental nature of time" (Lee Smolin). You are reading the word "now" right now. But what does that mean? "Now" has bedeviled philosophers, priests, and modern-day physicists from Augustine to Einstein and beyond. In *Now*, eminent physicist Richard A. Muller takes up the challenge. He begins with remarkably clear explanations of relativity,

entropy, entanglement, the Big Bang, and more, setting the stage for his own revolutionary theory of time, one that makes testable predictions. Muller's monumental work will spark major debate about the most fundamental assumptions of our universe, and may crack one of physics' longest-standing enigmas.
