Best Books for Toddlers Aged 2 (Kindergarten Subtraction/taking Away Level 2) W. W. Norton & Company

Visit the author's own website here! Children's Mathematics Network 'In Case Study 5 (a grassroots 'Children's Mathematics Network group') the initiative supported the participants in their professional change by giving them a space for the detailed and joint consideration of children's mathematical thinking. Another significant feature of this initiative is its focus on careful consideration and analysis of children's mathematics, and the ways in which professionals can support and encourage the children's mathematical thinking and reasoning... The standard of the mathematical understanding, thinking and reasoning that the displays revealed was far higher than the specified curriculum objectives for children of this age...' - Researching Effective CPD in Mathematics Education (RECME) project: (NCETM, 2009) 'The review also plays great score by play-based learning of a mathematical nature, and makes specific recommendations regarding early mark-making as a precursor to abstract mathematical symbolism'. Section 115 features children's mathematical graphics and emphasises: 'The role of mark-making in children's cognitive development is set out in the taxonomy (Carruthers and Worthington, 2006)'. The report recommends that 'local authorities, leaders, managers and head teachers should provide a culture with a significant focus on mathematical mark-

making' and 'a learning environment that encourages children to choose to use their own mathematical graphics to support their mathematical thinking and processes' - The Williams Maths Review: (DCSF, 2008) 'At the very heart of the success of the book is the authors' ability to see mathematics through young children's eyes by listening to and reflecting on the constant efforts made by children to make sense of their world. This is a liberating book which proposes that the teaching of mathematics could and should be a highly creative and enjoyable process' - Branwen Llewelyn Jones, Early Years Consultant at PACE Ltd / TACTYC 'Ground breaking... To single out any one chapter would be unfair because there is something thought-provoking and inspirational throughout. If you want to expand your understanding upwards and outwards then get a copy soon' - Times Educational Supplement 'I first read Children's Mathematics, Making Marks, Making Meaning a couple of years ago and it had an immediate impact on my own thinking and teaching, and the work I do with trainee teachers. I'm sure you will find it compelling reading too. I think it has the potential to change, in a fundamental way, how we think about early mathematical development' - Lynne McClure, Editor, Math Co-ordinator's File, Mathematics Association 'In their exceptionally readable and informative book, Children's Mathematics, Making Marks, Making Meaning Carruthers and Worthington (2006) draw attention to one of the main goals of early years teaching, that is, to help children make links between the mathematics they have already encountered (and continue to engage with) at home and the more abstract mathematics of the school. These authors suggest that by encouraging children to represent mathematical ideas in their own ways and, crucially, by talking to the pupils about the marks they have made, we are given a "window" onto their thinking that may otherwise be inaccessible' - Liz Pumphrey, NRICH This book draws on the authors' many years of teaching children aged three to eight years and also on their extensive research with children in the home, nursery and school. The authors explain the development and range of young children's mathematical marks and visual representations, showing how children make mental connections between their own early marks and subsequent abstract mathematical symbolism, and go on to

develop their own written methods. Combining theory and practice, this acclaimed book demonstrates how children's own mathematical graphics are highly creative and show deep levels of thinking. The authors show how this is the key to success in school mathematics and to higher levels of achievement. The authors are winners of TACTYC's (2003) Jenefer Joseph Award for the Creative Arts (3 - 8) - awarded for their innovative work with children on mathematical graphics.

Ten Apples Up On Top! Createspace Independent Publishing Platform

The beloved, modern children's nursery rhyme is sure to delight in this edition from the author and illustrator of Robins! and Vote! Five little monkeys jumping on the bed. One fell off and bumped his head. The mama called the doctor. The doctor said, "No more monkeys jumping on the bed!" Their teeth are brushed, their pajamas are on, and as soon as they say good night to Mama, the five little monkeys start to jump on their bed! But trouble awaits as, one by one, they fall off and bump their heads! The uproarious rhyme is brought to life in this family favorite. With its mischievous illustrations and surprising twist, this contemporary classic is the perfect addition to any home library.

Cool Kids Speak German - Book 1 Houghton Mifflin Harcourt Tracing Skills, Pen control Full-color Toddler workbook-LEARN WITH LOUIS VOL1 Teaches your Toddler line tracing, shape tracing & tracing of the full alphabet. The tracing worksheets in VOL1 start easy with big lines & dots. The lines, shapes, and letters will get smaller towards the end of the book to practice

their finer motor skills. This will keep their focus, and make sure they gain the necessary tracing skills they would need to start writing. At the end of the workbook, the kid will receive a LEARNING WITH LOUIS UNIVERSITY CERTIFICATE. This needs to be completed by the teacher, or the one who had overseen the completion. We motivate teachers or mommies to have a special award night to hand over the certificate. This will make your child feel proud. This will motivate him, or her to look forward to completing more worksheets successfully and be awarded again while learning new skills. Our goal is to make learning fun again while raising clever babies to run the world one day. Appropriate Age : 0-3 YEARS Keep an eye open for VOL2 FUN ILLUSTRATION WITH ANIMALS

Toddler Activity Books Ages 1-3 S&S Learning Materials

Cool Kids Speak German has been written with primary school aged children in mind by a qualified and experienced foreign languages teacher. This book may however also interest older children as it is filled full of fun worksheets, wonderful word searches and lovely colouring pages. The topics covered in this book include Greetings, Introductions, Numbers, Fruit, Colours, Clothes and Transport. Each topic begins with a page full of images and the German words for the topic. Progression

throughout each of the topics has been carefully planned as the activities practice only a few of the new words at any one time, and gradually introduce simple sentence structures. At the back of the book there is a useful German English word list and also the answer section. Learning a new foreign language at an early age can be an enjoyable and useful experience, and this book would be a great way for any child to learn German.

The Fun & Creative Classroom for 4- and 5-year-olds Kindergarten Workbooks

Learn from home and explore the world with these fun and easy board books! Young children love to look at bugs. Here's a Hello, World! board book that teaches toddlers all about the insects in their backyards—with colors, sounds, sizes, and super-simple facts. Hello, World! is a series designed to introduce first nonfiction concepts to babies and toddlers. Told in clear and easy terms and featuring bright, cheerful illustrations, Hello, World! makes learning fun for young children. And each sturdy page offers helpful prompts for engaging with your child. ("Chomp! A bright red ladybug munches on a leaf. Point to each of its spots.") It's a perfect way to bring science and nature into the busy world of a toddler, where learning never stops. Look for all the books in the Hello, World! series: • Solar System • Weather • Backyard Bugs • Birds • Dinosaurs • My Body • How Do Apples Grow? • Ocean Life • Moon Landing • Pets • Arctic Animals • Construction Site • Rainforest Animals • Planet Earth • Reptiles • Cars and Trucks • Music • Baby Animals • On the Farm • Garden Time • Planes and Other Flying Machines • Rocks and Minerals • Snow
