A Rhetoric of Literate Action Pearson
Laura Wilder fills a gap in the scholarship on writing in the disciplines and writing across the curriculum with this thorough study of the intersections between scholarly literary criticism and undergraduate writing in introductory literature courses. *Rhetorical Strategies and Genre Conventions in Literary Studies* is the first examination of rhetorical practice in the research and teaching of literary study and a detailed assessment of the ethics and efficacy of explicit instruction in the rhetorical strategies and genre conventions of the discipline. Using rhetorical analysis,

ethnographic observation, and individual interviews, Wilder demonstrates how rhetorical conventions play a central, although largely tacit, role in the teaching of literature and the evaluation of student writing. Wilder follows a group of literature majors and details their experiences. Some students received experimental, explicit instruction in the special topoi, while others received more traditional, implicit instruction. Arguing explicit instruction in disciplinary conventions has the potential to help underprepared students, Wilder explores how this kind of instruction may be incorporated into literature courses without being overly reductive. Taking into consideration student perspectives, Wilder makes a bold case for expanding the focus of research in writing in the

disciplines and writing across the curriculum in order to grasp the full complexity of disciplinary discourse. Pearson Higher Ed

The Decorative Mode HarperCollins
 Writing Strategies for the Education Dissertation offers a unique take on doctoral writing. It uses composition and rhetoric strategies to identify key activities for generating thought to keep students writing. It de-mythologizes the view of writing as a mere skill and promotes the view of writing as thinking. It uses writing to help students invent, think through, write, rethink, and rewrite as they develop and present their innovations. The book opens with this mindset and with the purposes of the

task (adding to knowledge); it helps define a "researchable topic," and provides advice on invention ("brainstorming"). It then addresses each of the key sections of the dissertation, from Problem Statement, through Literature Review and Methods, to Findings and Conclusions, while underscoring the iterative nature of this writing. For each chapter, the book provides advice on invention, argument, and arrangement ("organization") – rhetorical elements that are seldom fully addressed in textbooks. Each chapter also looks at possible missteps, offers examples of student writing and revisions, and suggests alternatives, not rules. The text concludes with an inventive approach of its own, addressing style (clarity, economy, and

coherence) as persuasion. This book is suitable for all doctoral students of education and others looking for tips and advice on the best dissertation writing. *Writing with Clarity and Style* Longman Publishing Group

Designed to help all writers learn to use style as a rhetorical tool, taking into account audience, purpose, context, and occasion, *The Writer's Style* is not only a style guide for a new generation but a new generation of style guide. The book helps writers learn new strategies inductively, by looking at firsthand examples of how they operate rhetorically, as well as deductively, through careful explanations in the text. The work focuses on invention, allowing writers to develop their own style as they analyze writing from varied genres.

In a departure from the deficiency model associated with other commonly used style guides, author Paul Butler encourages writers to see style as a malleable device to use for their own purposes rather than a domain of rules or privilege. He encourages writing instructors to present style as a practical, accessible, and rhetorical tool, working with models that connect to a broad range of writing situations—including traditional texts like essays, newspaper articles, and creative nonfiction as well as digital texts in the form of tweets, Facebook postings, texts, email, visual rhetoric, YouTube videos, and others. Though designed for use in first-year composition courses in which students are learning to write for various

audiences, purposes, and contexts, *The Writer's Style* is a richly layered work that will serve anyone considering how style applies to their professional, personal, creative, or academic writing. *Reading Rhetorically* Harvard University Press

Sharpening Her Pen demonstrates how six early modern authors exploit, or evade, a rhetorical discourse founded upon images, tropes, and dialectics of violence to secure authorization for their work as writers and empowerment for the personal agendas unique to each of them. Rhetorical violence functions both as a literary phenomenon, facilitating the polemics of each author, and as an analytical methodology enabling scholars to derive meaning from a particular organic facet of a writer's intellectual structure. The subjects of the study represent a balance between writers who have received considerable scholarly attention (Elizabeth I, Aemilia

Lanyer, and Lady Mary Wroth) and those who have received relatively little (Anne Askew, Anne Dorwiche, and Lade Anne Southwell). Exercising rhetorical strategies that reflect their idiosyncrasies as intellectuals, they share a canny awareness of the persuasive power, of violence in their age as physical reality and as metaphor. *Rhetorical Devices* Mercer University Press

In *The Art of Rhetoric*, Aristotle demonstrates the purpose of rhetoric—the ability to convince people using your skill as a speaker rather than the validity or logic of your arguments—and outlines its many forms and techniques. Defining important philosophical terms like ethos, pathos, and logos, Aristotle establishes the

earliest foundations of modern understanding of rhetoric, while providing insight into its historic role in ancient Greek culture. Aristotle's work, which dates from the fourth century B.C., was written while the author lived in Athens, remains one of the most influential pillars of philosophy and has been studied for centuries by orators, public figures, and politicians alike. What forces bring ordinary people

together in public to make their voices heard? What means do they use to break through impediments to democratic participation? *Unruly Rhetorics* is a collection of essays from scholars in rhetoric, communication, and writing studies inquiring into conditions for activism, political protest, and public assembly. An introduction drawing on Jacques Rancière and Judith Butler explores the conditions under which civil discourse cannot adequately redress suffering or injustice. The essays offer analyses of "unruliness" in case studies from both twenty-first-century and historical sites of social-justice protest. The collection concludes with an afterword highlighting and inviting further exploration of the ethical, political, and pedagogical questions

unruly rhetorics raise. Examining multiple modes of expression – embodied, print, digital, and sonic – Unruly Rhetorics points to the possibility that unruliness, more than just one of many rhetorical strategies within political activity, is constitutive of the political itself.

Rhetorical Refusals Bedford Books

In today's increasingly polarized political landscape it seems that fewer and fewer citizens hold out hope of persuading one another. Even among those who have not given up on persuasion, few will admit to practicing the art of persuasion

known as rhetoric. To describe political speech as "rhetoric" today is to accuse it of being superficial or manipulative. In *Saving Persuasion*, Bryan Garsten uncovers the early modern origins of this suspicious attitude toward rhetoric and seeks to loosen its grip on contemporary political theory. Revealing how deeply concerns about rhetorical speech shaped both ancient and modern political thought, he argues that the artful practice of persuasion ought to be viewed as a crucial part of democratic politics. He provocatively suggests that the aspects of rhetoric that seem most dangerous--the appeals to emotion, religious values, and the concrete commitments and identities of particular communities--are also those which can draw out citizens' capacity for good

judgment. Against theorists who advocate a rationalized ideal of deliberation aimed at consensus, Garsten argues that a controversial politics of partiality and passion can produce a more engaged and more deliberative kind of democratic discourse.
